## INTRODUCTION

System prompts are sound media objects that contain words such as numbers, days and months of the year, and time. These prompts are used by the play `etpPlay()` service. (For additional information, see the Open Application Server API Programmer's Guide.)

Each system prompt is contained in a single voice file known as a `SoundMediaObject`. The system prompts for each language are stored in separate containers (directories). Read the following about system prompts:

1. OAS is installed with a number of languages (listed below). Support for additional languages can be developed separately and added to an OAS installation at any time.
2. Some languages have variations for some numbers. For example, in German the number "one" is spoken differently in each of the numbers 1, 21, and 1000. Therefore, the `SoundMediaObject` files for the German number one are named "1," "1a," and "1b."
3. `SoundMediaObject` files "DOM1" through "DOM31" are used to say the day of the month when announcing dates.
4. The 12-hour format for time is supported only for English languages.
5. All the files listed below should have a `.wav` extension and are recorded in G.711 A-Law format (64 Bbps A-Law).

This section lists system prompts (`SoundMediaObjects` name and sound content) for the languages installed with OAS. It also describes how the prompts are combined to announce numbers, dates, and so on.

The languages with recorded system prompts installed with OAS are:

1. Albanian
2. Arabic (Saudi Arabia)
3. Danish
4. Dutch
5. English (Australia)
6. English (UK)
7. English (US)
8. Finnish
9. Flemish
10. French
11. French (Belgium)
12. German
13. Italian
14. Korean (South)

- 15. Norwegian
- 16. Portuguese (Brazil)
- 17. Spanish
- 18. Spanish (Latin America)
- 19. Swedish

*In Danish:*

- 1100 can be “Ellevehundrede” or “Ettusinde Ethundrede”.
- 1000 is “Tusinde” for singular and “Tusind” for plural; however, the final “e” is optional. Hence we can say “Tusind” in all cases.
