All rights on the manuals are reserved including the rights of reproduction and multiplication of any kind, be it photo mechanical, typographical or on digital data media. This also applies to translations. Copying the manuals, completely or in parts, is only allowed with written authorization of ASC.

Representative, if not defined otherwise, is the technical status at the time of the delivery of the software, the devices and the manuals of ASC. Technical changes without specified announcements are reserved. Previous manuals lose their validity.

The general conditions of sales and delivery of ASC in their latest version apply.

## 2 Introduction

In the Style Editor module of the application System Configuration, you can edit graphic elements of the user interface.

This refers to images such as the logo and the background as well as to font colors and the colors of elements with a color gradient such as buttons, tabs or group fields.

This function comes in handy if you would like to adjust the interface to your corporate identity (so-called “white labeling”). If you have the individual function right to the Style Editor module (see administration manual *System Configuration - User management (for system providers)*), you can make the changes yourself.

Open the Style Editor module by clicking on the menu item *More* in the navigation bar and subsequently on the sub-menu item *Style Editor*.

Basic information about using the application System Configuration can be found in the user manual for administrators *System Configuration - General information*.

In the main view, a tree structure displays all elements the appearance of which can be changed.

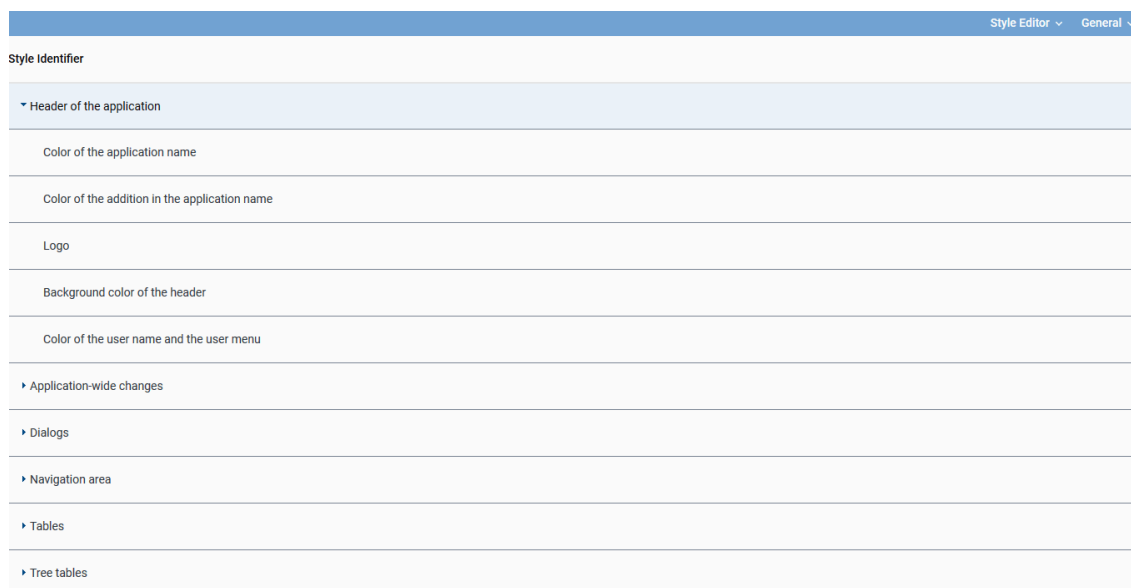

Fig. 1: Main view Style Editor

Fig. 2: Style Editor module - toolbar

The toolbar offers the following functions:

<i>Style Editor</i>	<i>Export of Tenant-Specific Styles</i>	Exports the styles which have been created by the tenant, see <a href="#">chapter "Export tenant-specific styles", p. 10.</a>
	<i>Import of Tenant-Specific Styles</i>	Imports tenant-specific styles from an external source, see <a href="#">chapter "Import tenant-specific styles", p. 11.</a>
	<i>Expand/Collapse All Nodes</i>	Opens or closes all nodes in the tree structure in the main view.
	<i>Restore Default Settings</i>	Resets all entries.  If you would like to reset all changes you have made, confirm the security prompt by clicking on the button <i>Reset</i> . If you would like to keep the changes, click on the button <i>Keep</i> .
<i>General</i>	<i>General Help</i>	Opens the online help.
	<i>Module Help</i>	Opens the module-specific online help.

If you click on the menu item *Style Editor > Restore Default Settings*, **all** changes you have made are reset, not only those in the element which has currently been selected in the main view.

If you would like to reset the changes made for just one specific element, select the respective element in the main view and subsequently go to the detail view and click on the icon  behind the entry field in which the change has been made.

For detailed information on default functions such as *Print*, *Adjust table*, or *Help* refer to the user manual for administrators *System Configuration - General Information*.

## 4

## Detail view

The detail view contains additional information about the element selected in the main view.

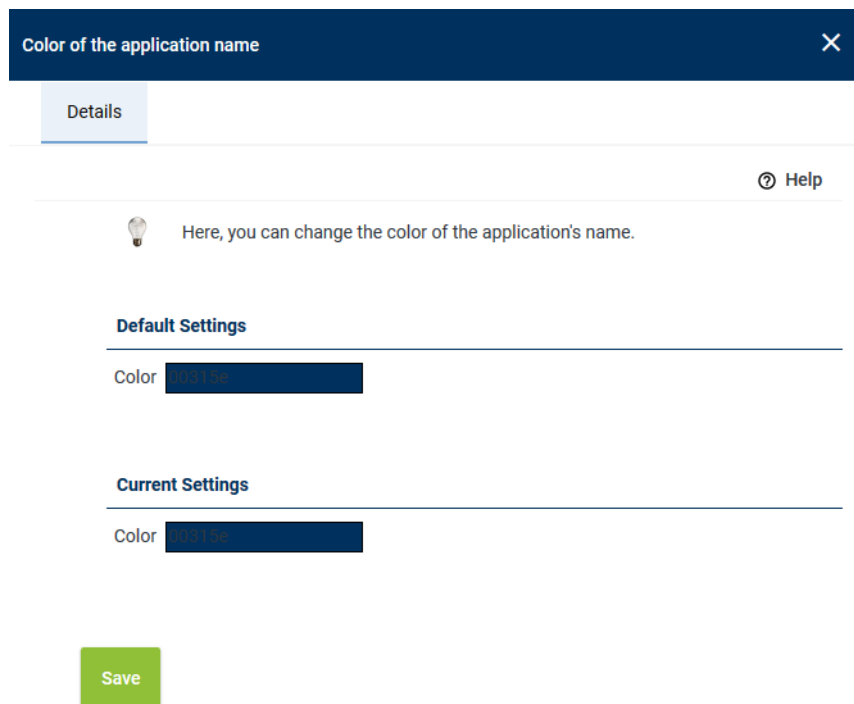

Fig. 3: Style Editor module - detail view (example)

The detail view contains the following tab:

- *Details*

Here, you can display and edit the settings of the element selected in the main view.

See [chapter "Tab Details", p. 8](#).

## 4.1

## Tab Details

Here, you can display the default settings of the element selected in the main view and edit the current settings.

Fig. 4: Style Editor - tab Details (example)

Depending on the element you are editing, you have the following configuration possibilities to change the appearance of the element:

- Change color, see [chapter "Change color", p. 12](#)
- Change colors of color gradient, see [Change colors of color gradient](#)
- Upload images, see [chapter "Upload image", p. 13](#).

## 5 Export tenant-specific styles

1. To export tenant-specific styles, click on the menu item *Style-Editor > Export of Tenant-Specific Styles*).

⇒ The following window appears:

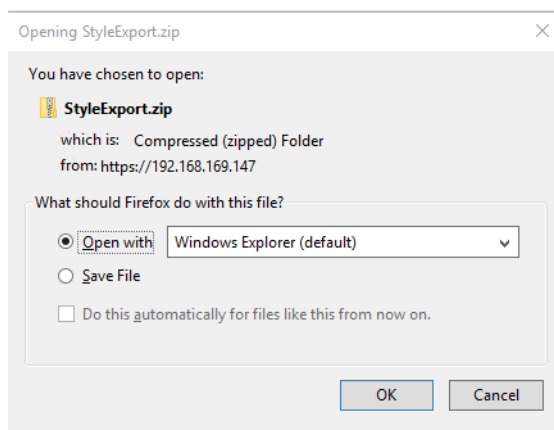

Fig. 5: Export tenant-specific styles

2. To open the tenant-specific styles, select the option *Open with* and in the drop-down list the program you would like to open the styles with.  
To save the tenant-specific styles, select the option *Save File*.
3. Click on the button *OK*.  
⇒ The tenant-specific styles are opened or saved in the local download directory.

## 6

## Import tenant-specific styles

1. To import tenant-specific styles, click on the menu item *Style Editor > Import of Tenant-Specific Styles*.  
⇒ The window *Upload File* appears.
2. Click on the button *Choose File*.

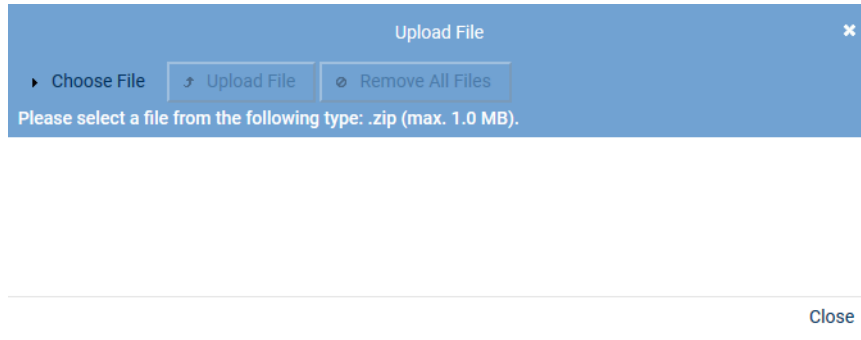

Fig. 6: Upload File

3. Select the .zip file with the tenant-specific styles via the Explorer and click on the button *Open*.
4. To remove the selected file, click on the button  next to the file or on the button *Remove All Files* to empty the clipboard.  
To close the window *Upload File* without emptying the clipboard, click on the button *Close*.  
To apply the file from the clipboard in the detail view, click on the button *Upload File*.

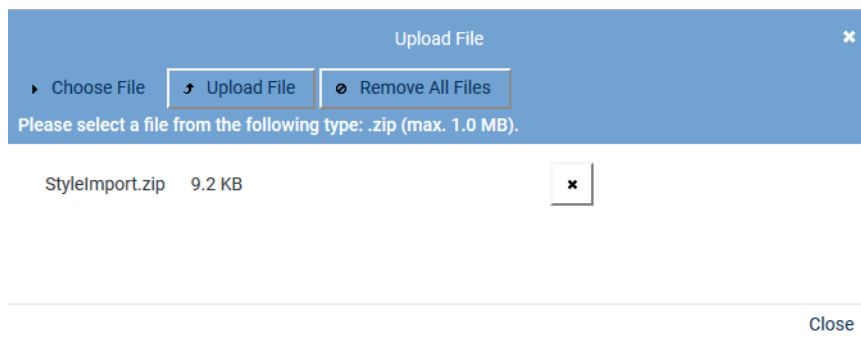

Fig. 7: Import tenant-specific styles

## Change color

To change the font color of the selected element, click on the entry field behind the respective color in the group field *Current Settings*.

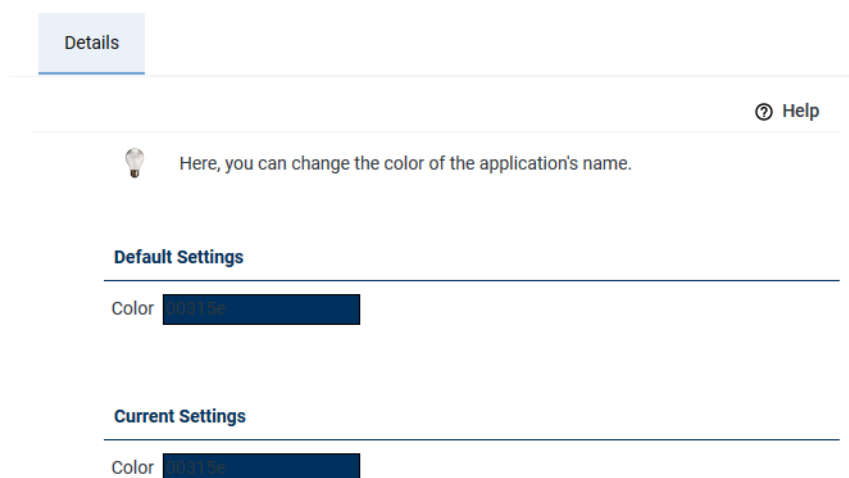

Fig. 8: Change color (example)

1. You have 2 options to select a color:
  - Enter the RGB value
  - Select color from the color palette

Fig. 9: Define color

2. To apply the color, click on the icon  (*Apply selected color*). To cancel the process and close the window, click on the working area.
3. Once you have finished adjusting the settings, click on the button *Save* to save the settings.

## 8

## Upload image

1. To change a logo or a background image, click on the button *Upload File* in the group field *Current Settings*.

Fig. 10: Change image (example)

⇒ The window *Upload File* appears.

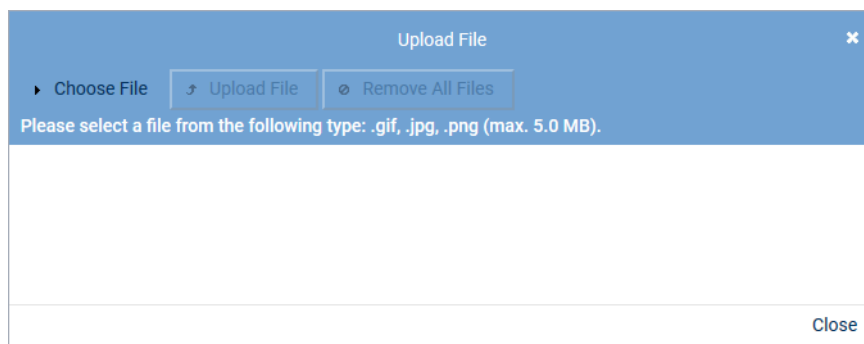

Fig. 11: Upload File

2. Click on the button *Choose File*.
3. Select the file via the Explorer and click on the button *Open*.
4. To remove the selected file, click on the button  next to the file or on the button *Remove All Files* to empty the clipboard.  
To close the window *Upload File* without emptying the clipboard, click on the button *Close*.  
To apply the file from the clipboard in the detail view, click on the button *Upload File*.
- ⇒ The file is displayed in the detail view.
5. If you have not yet saved the change by clicking on the button *Save* in the detail view, you can discard the changes by clicking on the main view and confirming the security prompt. If you have already saved the change by clicking on the button *Save*, you can discard the changes and restore the default settings by clicking on the menu item *Style Editor > Restore Default Settings* and confirming the security prompt.

---

If you click on the menu item *Style Editor > Restore Default Settings*, **all** changes you have made are reset, not only those in the element which has currently been selected in the main view.

If you would like to reset the changes made for just one specific element, select the respective element in the main view and subsequently go to the detail view and click on the icon  behind the entry field in which the change has been made.
