General information

In the context of this document ASC represents ASC Technologies AG, its subsidiaries, branch offices, and distributors. An up-to-date overview of the aforementioned entities can be found at <https://www.asctechnologies.com>

ASC assumes no guarantee for the actuality, correctness, integrity or quality of the information provided in the manuals.

ASC regularly checks the content of the released manuals for consistency with the described hardware and software. Nevertheless, deviations cannot be excluded. Necessary revisions are included in subsequent editions.

Some aspects of the ASC technology are described in general terms to protect the ownership and the confidential information or trade secrets of ASC.

The software programs and the manuals of ASC are protected by copyright law. All rights on the manuals are reserved including the rights of reproduction and multiplication of any kind, be it photo mechanical, typographical or on digital data media. This also applies to translations. Copying the manuals, completely or in parts, is only allowed with written authorization of ASC.

Representative, if not defined otherwise, is the technical status at the time of the delivery of the software, the devices and the manuals of ASC. Technical changes without specified announcements are reserved. Previous manuals lose their validity.

The general conditions of sales and delivery of ASC in their latest version apply.

2 Introduction

This document describes the installation of the interface to the software Google Stackdriver.

Google Stackdriver is a cloud computing systems management service offered by Google. The neosoftware is integrated into the central logging services of Google Stackdriver by sending the default logging and monitoring events.

For information about how to set up and configure the Google Stackdriver drive refer to the administration manual for system providers *Configuration drives*.

For information about how to configure notifications to the Stackdriver recipient refer to the administration manual for system providers *Notifications module* and in the administration manual for tenants *Notifications module*.

3

Installation

3.1

Install Google Stackdriver

To install Google Stackdriver proceed as follows:

1. Start the Windows Explorer.
2. Change to the directory *Program Files (x86)\ASC\ASC Product Suite\thirdparty\Stack-DriverLoggingAgent*.
3. Execute the file *StackdriverLogging-v1-11.exe*.
⇒ Closes the window of the installation wizard is opened automatically.
4. From the drop-down list, select a language and click on the button OK.

3.2 Configuration file

1. Start the Windows Explorer.
2. Change to the directory *C:\Program Files (x86)\ASC\ASC Product Suite\thirdparty\Stack-Driver\LoggingAgent*.
3. Copy the file *asc.conf* to the directory *C:\Program Files (x86)\Stackdriver\LoggingAgent\config.d*.

3.3 Authorizing the agent

Install private-key service account credentials on a VM instance to authorize the Cloud Logging agent.

For more information about how to authorize agents see <https://cloud.google.com/logging/docs/agent/authorization>.
