## OVERVIEW

---

OpEasy is a tool that helps an administrator quickly and easily bring up a Mitel or Polycom phone device within an Enterprise on the Clearspan platform, ready to use for a specific user. When an administrator sets up a phone using profiles and templates in OpEasy, and designates a user for that phone, a unique configuration file is generated that is loaded onto the phone when it starts up. The configuration file defines the lines and features that are enabled on the phone. This file is generated and stored on the Clearspan system, but OpEasy controls the content of the file when an OpEasy template is assigned.

An OpEasy administrator's ability to access certain settings depends on the administrator's login level and assigned privileges.

This document provides instructions on the following functions, which are generally available to Group Administrators (GA), Enterprise Administrators (EAs), and above:

- Users—Add, Modify, Delete, or Search for Users.
- Virtual Users—Add a new virtual user or search for virtual users to edit or delete, including Auto Attendants and Hunt Groups.
- Import—Use spreadsheets to create users and user features.
- Export—Export Clearspan data to a spreadsheet.
- Phone Management—Add, Modify, Delete, or Search for Phone devices. A list of devices can be exported to a spreadsheet. Devices must be created before creating User Profiles.
- Phone Templates—Add, Modify, Delete, Copy, or Search for phone templates. Templates must be created before creating User Profiles.
- User Profiles—Add, Modify, Delete, or Search for User Profiles. The User Profile is a set of rules that is applied to a User. The User Profile must be created before the Basic OpEasy Admin can create Users.
- Enterprise Settings—Add or modify departments, phone numbers, or service packs for an Enterprise.
- Group Settings—Configure authorization codes, call pickup groups, departments, custom device type tags, night forwarding, phone directory management, or phone numbers for groups.

Basic provisioning functions generally available to Department Administrators (DAs) such as adding, modifying, and removing users are covered in the *Clearspan OpEasy Basic Provisioning Guide*.

**Note:** OpEasy highlights all table rows with view or edit links, with a darker background color when you hover the mouse over the row, and a lighter background color when there are no links in the row.

Click anywhere on a row containing edit or view links to navigate to the edit link. To execute view, click on the view link or anywhere within the column containing the view link.

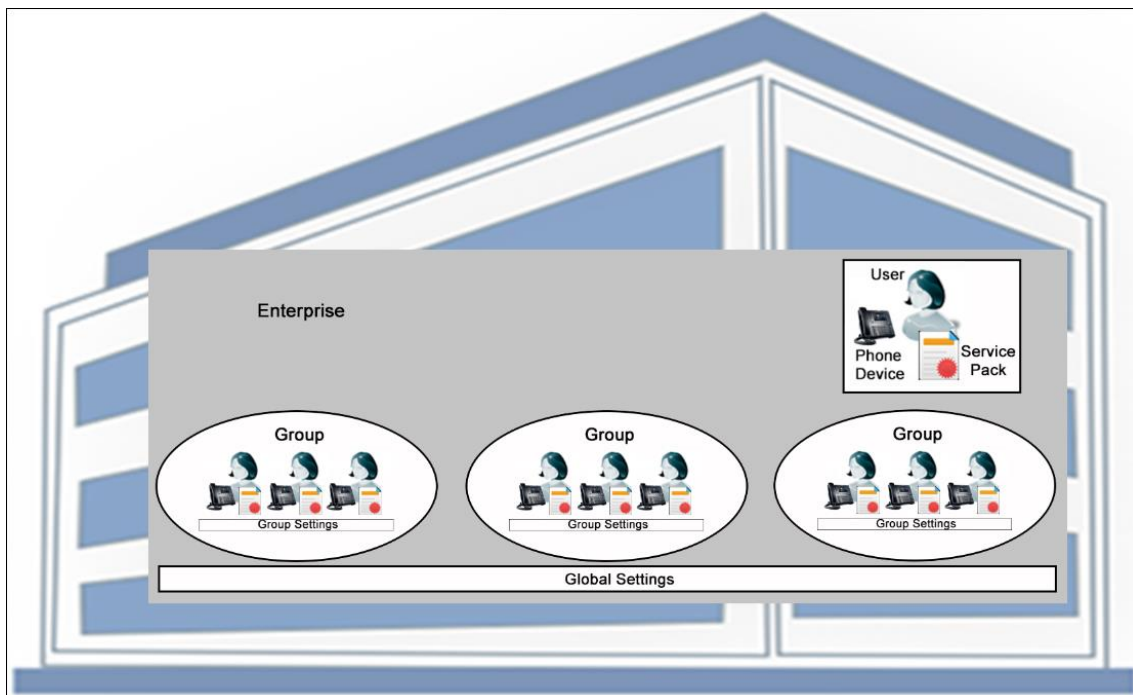

Whenever a row contains multiple links in the row, click on any column of the row for edit or view navigation, except columns containing links for other functions (such as, copy or delete) to navigate to the column's link instead of the edit or view link.

## INITIAL SYSTEM-LEVEL SETUP

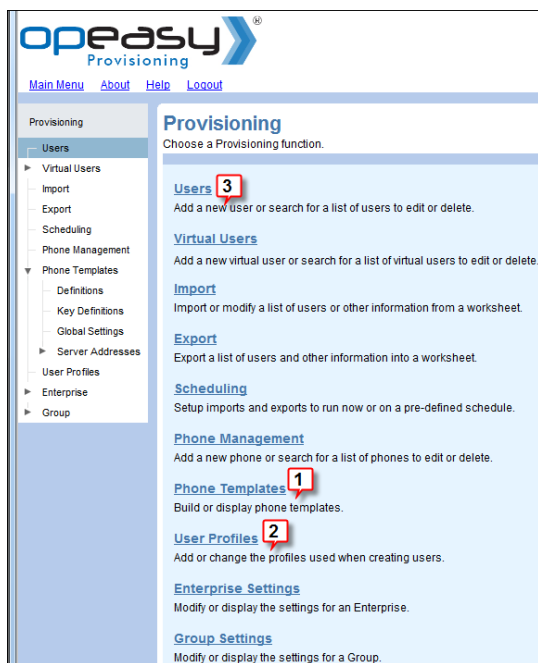

Using the customer's requirements for features and functionality, OpEasy comes set up with an Enterprise, one or more Groups within the Enterprise, Global Settings, and Service Packs to be used across the Enterprise. An *Enterprise* is the highest level organization in OpEasy, typically representing an institution or business. At least one Group must exist within an Enterprise. Individual *Users* are assigned to *Groups*. *Global Settings* are set at the System, Enterprise, and Group levels for a specified phone device manufacturer. Mitel creates the phone device types that OpEasy administrators can provision and assign to users on the Clearspan platform. A *device type* is typically a phone model, such as the Mitel 6869i SIP phone.

Mitel and OpEasy administrators may work together to define the Service Packs that will be used within an Enterprise. *Service Packs* include features, some of which are must be licensed on a per-user cost basis. Administrators should be familiar with the Enterprise Settings, Global Settings, Groups, and Service Packs configured, so that they can set up devices and users appropriately.

## SETTING UP USERS WITH PHONES

After the system-level and global settings have been configured, and you are ready to set up a phone for someone, create a user in OpEasy with an associated phone device. The typical steps for creating a user and a phone for that user in OpEasy are as follows:

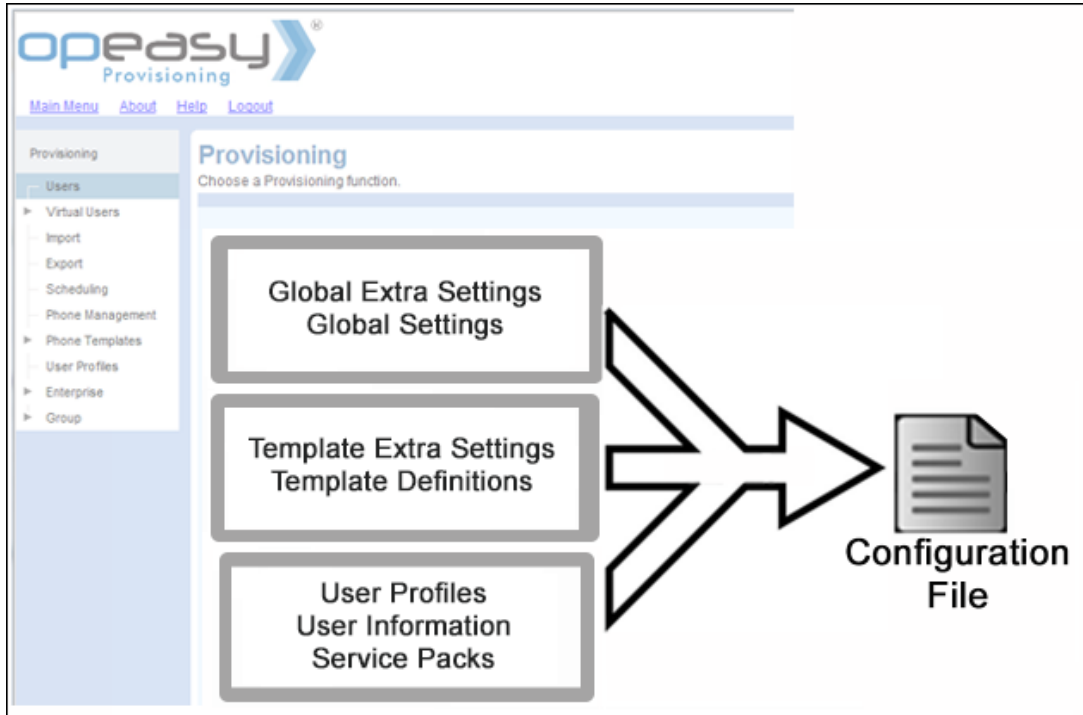

1. Choose or create a phone Template Definition. Templates define a reusable set of features for a specific type of phone. They control the behavior of each button and softkey, the ring tones, how items are displayed on the screen, and so on. For more information, refer to the Phone Templates section.
2. Choose or create a User Profile. User Profiles are reusable sets of rules to be applied when new users are created. User Profiles contain such information as which phone template to use, which Service Packs to assign, what phone number to assign, Voice Mail settings to use, and so on. For more information, refer to the User Profiles section.
3. Create a User in OpEasy for each person who will be using a phone. User information includes first and last name, Email, passwords, phone numbers, phone assignments, location, optional services configuration, and so on. Choosing a User Profile when creating a User simplifies the configuration requirements by automatically filling in many of the details. For more information, refer to the Users section.

OpEasy allows you to create a primary Phone Device for a User as part of creating the User. A Phone Device includes identifying information such as the brand and model of phone, associated Phone Template, number of lines/ports, MAC address, assigned phone number or extension, and so on.

You can create one user at a time in the Users section of OpEasy, or you can create multiple users at once using the OpEasy Import feature. For more information, refer to the Import section.

4. After a User and an associated Phone Device are created, OpEasy sends setup instructions to the user's Email. New User E-mail Notifications are configured in General Settings under Users.
5. OpEasy also generates a phone configuration file based on device, profile, template, and user information. For more information about how these settings are combined, refer to the Viewing or Editing Global Settings section.

6. Install the phone at the user's location. When a phone is connected to the network and started up, it prompts you for a Device ID or device credentials depending on the device type, in order to apply the appropriate configuration file. For more information, refer to the Set Up a New Phone for a New User section.
7. The phone is ready to use.

## PHONE TEMPLATES

---

The Phone Templates function allows you to manage device configuration files for phones by creating and assigning phone templates to a phone. The Clearspan system uses the assigned template when building or rebuilding the configuration files for the associated phone. Templates are edited, deleted, or copied using the Provisioning application of OpEasy. You can also create a template for Clearspan Communicator clients and certain AudioCodes devices. The following illustration shows a graphical representation of a phone template.

Templates must be built before Phone Management, User Profiles, and Users. Building a phone template consists of the following:

- **Definitions (Templates)**—Creates the phone template definitions.
- **Key Definitions**—Displays and configures system-wide or Enterprise-wide definitions for keys.
- **Global Settings**—Displays and changes the global Clearspan settings for a specified Phone Manufacturer.
- **EMS Addresses**—Displays the list of EMS Server addresses (host names/IP addresses). The EMS server is used by the phone soft keys.

**Note:** For new settings added to Templates and Global Settings, the '(Unspecified)' selection option or text value is displayed. The '(Unspecified)' value indicates no value has ever been set, causing OpEasy to NOT generate configuration file fields for that new OpEasy setting. As such, any existing Global Extra Settings for that configuration file field continue to be used.

However, once a setting has been changed to an actual value (replacing the '(Unspecified)' value), then OpEasy generates configuration file fields for that setting from then on. These actual values then override any Global Extra Settings for that field. Once a value is selected to replace the '(Unspecified)' value, the '(Unspecified)' value is no longer an option.

## POLYCOM PHONE SUPPORT

You can use OpEasy to configure certain Polycom phones when the Polycom Phone Support system license for Clearspan is installed. Refer to the appendix of this guide for more information about using OpEasy to provision Polycom phones.

## VIEWING PHONE TEMPLATE DEFINITIONS

Phone Templates are displayed and configured from the Template Definitions page. There can be many templates for the same device/phone type, depending upon the needs of an organization.

1. From the main menu, select **Provisioning**, and then select **Phone Templates**.
2. Click **Definitions** in the menu tree, or click **Definitions** in the Phone Templates menu. The Template Definitions page displays.

**Figure 1 Template Definitions Page**

3. Choose the **Template Level** from the drop-down list.
4. Select the **Enterprise** and **Group** from the drop-down lists, if needed.
5. Select the **Device Type** (phone type) from the drop-down list. All existing templates, including the default for this phone type under this Template Level, display in the list. As soon as you choose the device type, the remaining part of the page displays.

## VIEWING, ADDING, OR EDITING KEY DEFINITIONS

There may be times when a new key must be added to a template to access new applications, speed dials, etc. The Key Definitions page allows you to add additional feature keys to the default list that will be used when building phone templates. All of the defined feature keys display in the Key Definitions page.

Each key added requires a label that will appear on the phone key and a value which can be a URL, an XML application, a feature access code, a number, blank, etc. The value is the action taken when the key is pressed.

Note: The default feature codes for Clearspan are described in the Feature Access Codes Quick Reference Guide, which is available on the Mitel Technical Publications website.

1. From the main menu in OpEasy, select **Provisioning**, and then select **Phone Templates**.
2. From the Phone Templates page, click **Key Definitions** from the menu tree, or click **Key Definitions** in the Phone Templates menu.
3. Select an **Enterprise** to view key definitions for a specific Enterprise. or select **(System Keys)** to view key definitions for all Enterprises in the system.
4. Select one of the following options from the **Template Keys** drop-down menu to view Key definitions of the System, the Enterprise or both:
  - Both System and Enterprise Keys
  - System Keys Only
  - Enterprise Keys Only

5. Select the **Phone Manufacturer**, if necessary. The available manufacturers depend on the device types configured for the Enterprise. The Key Definitions page displays, as shown in the following figure.

**Figure 5 Key Definitions – Added Speed dial**

11. Click **OK** or **Apply**.

12. If you make changes that affect any templates, the Rebuild Configuration Files page appears. Click **Save and Rebuild** to save the changes and start the configuration file rebuild process, or click **Cancel**.

**Key Definitions: Rebuild Configuration Files**

Review the number of Enterprises, Groups, and Templates affected by modifying this Enterprise-Level Key. All devices in the Enterprise that use this Key will be rebuilt. Click "Save and Rebuild" to save the Template changes and rebuild all configuration files using this template. Click "Cancel" to return without saving or rebuilding.

The following areas may require Phone Device configuration files to be rebuilt as a result of this change:

Template Name: GrpHersh6869i  
 Template Level: Group  
 Device Type: Aastra 6869i (DMS)  
 Phone Manufacturer: Mitel (Aastra)  
 Enterprise: Moorehouse -- Moore Enterprises of Texas  
 Group: Hershey -- Hershey

**Figure 6 Key Definitions: Rebuild Configuration Files Page**

13. Click **OK**. Rebuild Status is shown on the Template pages and Global Settings page.

## DELETING A KEY DEFINITION

**Caution: Deleting a Key Definition affects all phones using that definition.**

You can delete a key definition from the Key Definitions page as in the following examples.

1. From the main menu, select **Provisioning**, and then select **Phone Templates**.
2. From the Phone Templates page, click **Key Definitions** from the menu tree, or click **Key Definitions** in the Phone Templates menu. The Key Definitions page displays.
3. Select an **Enterprise** to remove a key definition at the Enterprise level only, or select **(System Keys)** to remove a key definition for the system.
4. Select one of the following options from the **Template Keys** drop-down menu to view Key definitions of the System, the Enterprise or both:
  - Both System and Enterprise Keys
  - System Keys Only
  - Enterprise Keys Only
5. Click **Delete** on the far-right side of the row of the key to delete.

Figure 7 Key Definitions – Delete

- Click **OK** in the confirmation dialog box. The key definition is deleted and no longer appears in the list.
- Click **OK**. The Phone Templates page displays.

## CREATING A NEW PHONE TEMPLATE

- From the main menu, select **Provisioning**, and then select **Phone Templates**.
- Click **Definitions** in the menu tree, or click **Definitions** in the Phone Templates menu. The Template Definitions page displays.
- Select a **Template Level** from the drop-down list if necessary.
- Select the **Enterprise** and **Group**, if necessary.
- Select a **Device Type** and **New Template Level**.
- Enter the name of the template in the **New Template Name** text box. In the following example, the new template will be assigned to phones in the Support area.

### Template Definitions

Display and configure phone template definitions.

OK Refresh

Figure 8 Enter New Template Name

- Click **Add Template** as shown in the example. The Template Add page displays. The General tab displays by default.
- Configure the general settings, lines, and keys for the new template as described in the following sections, and then click **OK**.

## Configuring General Settings

On the Template Add page:

- Enter a **Description** of the template.
- Select the **URI for Soft Keys** from the drop-down list. You cannot save the configuration unless you choose the URI. This entry is used to point to the appropriate EMS server for certain key definitions.

**Template Add**  
Create a new phone template.

OK Cancel Apply

Template Name: test3  
 Template Level: Enterprise  
 Enterprise: Moorehouse -- Moore Enterprises of Texas  
 Device Type: Aastra 6867i (DMS)  
 Rebuild Status:  Enterprise: None pending.

Restart Phones: ☐ NOTE: If Restart Phones is unchecked, the template will not take effect until a resync or when the phone is rebooted.

 Conference Server:   
 Static Call Park/Pickup:

**Display Settings**

Background Image URL:  
 Idle Screen Mode:   
 Idle Screen Font Color:

**Figure 9 Template Add Page**

- If an expansion module will be used, select the **Type of Expansion Module**. Choices depend on the phone device type. Also select the number of **Expansion Modules**. The maximum allowed is no more than three, but it depends on the type of phone and expansion module. When expansion modules are specified, new tabs appear to allow assignment of the additional keys.

4. Select the **Time Zone** from the drop-down list. **Use Global Settings** uses the time zone from Global Settings in Phone Templates. **User Time Zone** uses the time zone of the first primary user assigned to the phone. **Use DHCP** uses the time zone from the DHCP server. You can also select a specific time zone.
5. Select **Use VLAN** to add support for configuring phones to use their VLAN capability.
6. Enter the **Outbound Proxy Address** and **Outbound Proxy Port** used by this phone. These optional fields can contain text up to 256 characters, as well as tags.
7. Select the setting for Encryption (TLS/SRTP). For the Encryption Certificate File, enter the certificate filename for the device type. Enabling encryption affects both encryption of signaling using Transport Layer Security (TLS) and encryption of the media (voice) using Secure Real-time Transport Protocol (SRTP). These settings are available for only 6863i, 6865i, 6867i, 6869i, 6873i phone models, AudioCodes MP-11X (DMS) and AudioCodes MP-124 (DMS).
8. When **Encryption (TLS/SRTP)** is required, the transport protocol is set to TLS. Otherwise, the transport specified by the device (UDP or TCP) is used as the transport protocol.
9. Use Global Settings for subscription time (as-feature-event), or uncheck the **Use Global Settings** check box and enter the subscription time in seconds.
10. Select **Disable Missed Calls Message** to disable the Missed Calls message from displaying on Mitel (Aastra) phones.
11. Select **Conference Server Enable** if you want to use centralized conferencing with a SIP phone.
12. Enable **Static Call Park/Pickup** if you want Park and Pickup keys to appear on the phone automatically, without the need to specifically define a Park or Pickup key. If you enable this setting when those keys are also defined, then two Park/Pickup keys appear on the phone. This setting appears only for phone models that support display of these keys.

Note: For information about General Settings for templates specific to Polycom or Panasonic phones, refer to the appendixes of this guide.

13. Enter the location of the Image to be used as the background image on the idle screen of the phone in the **Background Image** field. The Background Image is a text field. This setting applies to only the 6867i, 6869i, and 6873i phones. The requirements for the file are as follows:
  - 320x240 pixels (6867i)
  - 480x272 pixels (6869i)
  - 800x480 pixels (6873i)
  - 24 or 32-bit color depth
  - 1MB maximum file size
  - JPG and PNG are supported
  - There should be no frame around the image
14. Set the **Idle Screen Font Color** to control the font color used on the idle screen of the phone. This setting applies to only the 6867i, 6869i, and 6873i phones. The options are Blue (Default setting for System level), White, or Black.

15. Set the **Idle Screen Mode** to control the screen display mode when the phone is idle. Primary Screen Mode displays the user's name and line number in the top status bar, along with a larger date and time. Secondary Screen Mode displays the user's name and phone number or extension. Along with a smaller repositioned date and time.

## Assigning Lines

The Lines tab provides Clearspan Line Position to Phone Key mapping. Lines can be assigned to soft keys, programmable keys, and specific hard keys (for some Mitel phone models such as the 6867i). You can also select the Line Label and Ring type for a line.

1. On the Template Add page, select the **Lines** tab. The number of lines displayed depends on the number of lines that the phone supports.
2. Change the **BLF Line/User** if necessary. This value applies when the Busy Lamp Field (BLF) feature is assigned. The default of 1 is generally the desired setting. The value is used to identify which line will be associated with the BLF list URI.
3. Select the **Clearspan Line Position** that you want to assign.

The screenshot shows the 'Template Add' page with the 'Lines' tab selected. The 'BLF Line / User' is set to 1. Below this is a table titled 'Phone Line to Clearspan Line Position Mapping'.

Phone Line	Clearspan Line Position	Phone Key	Line Label	Ring
1	(Unassigned) ▼	Line 1		
2	(Unassigned) ▼	Line 2		

**Figure 10 Phone Line to Clearspan Line Position Mapping**

4. Choose the **Line Label**, which determines the label shown on the phone display. Choosing **Text** allows you to enter up to 16 characters of text along with the Extension, represented by the tag {Ext}, or phone number, represented by the tag {Number}. To display a name, set the Text label to "{First Name} {Last Name}" or "{Last Name}, {First Name}".
5. Choose the **Ring** type. The default can be changed on the phone, but initially it is the common ring: "2-4", or two seconds of ringing followed by four seconds of silence.
6. Repeat these steps for every line on the phone that you wish to assign.

Note: For information about configuring the ringtone for a line on Polycom or Panasonic phones, refer to the appendixes of this guide.

## Configuring Soft Keys

The Soft Keys Top Soft Keys, and Programmable Keys tabs allow you to assign specific functions to programmable keys on the phone. Top Soft Keys are those placed physically higher on the phone.

1. On the Template Add page, select the **Soft Keys**, **Top Soft Keys**, or **Programmable Keys** tab. The list of available keys displays. The tabs available, number of lines, and the number of programmable keys depends on the phone.

**Template Add**  
Create a new phone template.

OK Cancel Apply

Template Name: Grp2Temp  
 Template Level: Enterprise  
 Enterprise: Moorehouse -- Moore Enterprises of Texas  
 Device Type: Aastra 6869i (DMS)  
 Rebuild Status:  Enterprise: None pending.

Restart Phones: ☐ NOTE: If Restart Phones is unchecked, the template will not take effect until a resync or when the phone is rebooted.

2	Voice Mail (System) ▼	Line 14 ▼

**Figure 11 Template Add – Soft Keys Tab**

2. Select a feature or line from the **Label** drop-down list for Key 1. This drop-down list of features comes from the list of Key Definitions.
3. Choose a **Phone Line** for the key if presented; some features such as Do Not Disturb are not tied to a specific phone line.
4. Continue configuring the keys until you have assigned all the features desired to the programmable keys in the template.

Note: In addition to the standard Polycom soft keys, some OpEasy-configured soft keys can be assigned to Polycom or Panasonic phones. For more information, refer to the appendixes of this guide.

## Configuring Hard Keys

On the Template Add page, select the **Hard Keys** tab. The Hard Keys list displays. The number of lines and keys depends on the phone. For Mitel (Aastra) phones that support reprogrammable hard keys, the Hard Keys section displays the functions for keys that can be reassigned.

**Template Add**  
Create a new phone template.

OK Cancel Apply

Template Name: Grp2Temp

**Hard Keys**

Key	Label	Phone Line
Line 1 (hardkey1)	<Manufacturer Default> ▼	
Line 2 (hardkey2)	<Manufacturer Default> ▼	
Redial (hardkey3)	<Manufacturer Default> ▼	

**Figure 12 Template Add – Hard Keys Tab**

1. Select a feature from the **Label** drop-down list for each key.

Note: For some Mitel phone models, selected hard keys (such as Callers List and Redial for the Mitel 6867i) can also be assigned as a Line, BLF, BLF/List, BLF/Xfer, or Auto Call Distribution. Only the selected hard keys can be used as Line keys.

2. Choose a **Phone Line** for the key.
3. Continue configuring the keys until you have assigned all the features desired to the hard keys in the template.

## Configuring MiVoice Conference Phone Applications

Templates for the Mitel MiVoice Conference Phone (UC360 Collaboration Point) include an Applications tab. Check the box next to an application to enable it on the phone: MiCollab Conference, Browser, Smart Office 2, Cisco WebEx Meetings, Join.me, Remote RDP, and Remote VNC.

## Configuring Extra Settings

1. On the Template Add page, select the **Extra Settings** tab to view or change configuration information. The Extra Settings tab allows entry of additional configuration file information that is specific to this template, as shown in the following example.

**Template Add**  
Create a new phone template.

OK Cancel Apply

Template Name: Test\_57

Choose File No file chosen Upload File

**Figure 13 Template Extra Settings Tab**

2. Click **Browse** to choose a configuration settings file that was previously created, if necessary, and use the **Upload File** button to get the file. You can create a text file that contains extra settings that apply to many templates. The text file can be uploaded using this field to reduce the risk of typos and provide consistency of content.

Note: For information about configuring items for Polycom or Panasonic phone templates on phone template tabs, refer to the appendixes of this guide.

## EDITING A PHONE TEMPLATE

1. From the main menu, select **Provisioning**, and then select **Phone Templates**.
2. Click **Definitions** in the menu tree, or click **Definitions** in the Phone Templates menu. The Template Definitions page displays.
3. Choose the **Template Level** from the drop-down list.
4. Choose the **Enterprise** from the drop-down list.
5. Choose the **Group** from the drop-down list.
6. Choose the **Device Type** from the drop-down list. A list of templates that were created for this device type displays.
7. For the template you want to edit, click on the **Edit** link in the **Action** drop-down list at the end of the row. The Template Edit page displays.
8. Follow the procedures in the *Creating a New Phone Template* section to make any changes on the Template Edit tabs.
9. Select the **Template Users** tab to search for users or devices that use this template.

**Template Modify**  
Change an existing phone template.

OK Cancel Apply

Template Name: 6863i for testing

My Room: ☒ My Room Enabled

**Figure 26 Template Add – General for Clearspan Communicator**

**9. Configure Communicator Settings on the General tab.**

Choose to **Use Global Settings**, or enter the **Outbound Proxy**, and **Outbound Proxy Port** in the **Outbound Proxy Port (No Encryption)** box when encryption is not being used by the client, or in the **Outbound Proxy Port (Encryption)** box when encryption is being used by a phone device used by this client. These optional fields can contain text up to 256 characters, as well as tags.

**Outbound Proxy Discovery Domain Override** is optional and defines an alternate domain to use during SRV record lookup.

**10. Select the **Encryption (TLS/SRTP)** setting.**

Select the Functionality for the client, depending on the Device Type.

- Business Communicator – Mobile: Basic, Audio, or Video
- Business Communicator – PC: Basic, Audio or Video
- Business Communicator – S4B: Video
- Business Communicator – Tablet: Basic, Audio, or Video

11. On the **Features** tab, select the features to enable for the client. Refer to the *Clearspan Communicator User Guide* for more information about these settings and features.
12. On the **Extra Settings** tab, enter any custom configuration information for the template.
13. If you are modifying an existing template, select the **Template Users** tab to display a list of users or devices that use this template.
14. Click **OK**.

## CREATING OR EDITING AN AUDIOCODES TEMPLATE

1. From the main menu, select **Provisioning**, and then select **Phone Templates**.
2. Click **Definitions** in the menu tree, or click **Definitions** in the Phone Templates menu. The Template Definitions page displays.
3. Select a **Template Level** from the drop-down list.
4. Select the **Enterprise** and **Group**, if necessary.
5. For the **Device Type**, choose the AudioCodes device.
6. Select a **New Template Level**.
7. Enter the name of the template in the **New Template Name** text box.
8. Enter the **New Template Name**, and Click **Add Template**. The Template Add page displays. The General tab displays by default.
9. Click edit in the **Templates** table to edit a template, or click anywhere in the template row. The Template Modify page displays.

On the General tab:

10. Enter a **Name** and **Description** of the template as shown in the following figure.
11. Select the **Time Zone** from the drop-down list.
12. Select the Encryption Settings from the **Encryption (TLS/SRTP)** drop box.

OpEasy supports enabling encryption for the following AudioCodes devices:

- AudioCodes MP-11X (DMS)
- AudioCodes MP-124 (DMS)

**Note:** An error is displayed when the number of ports exceeds the maximum number of encryption ports supported when the Encryption Settings is set to Required or Use Global Settings, where the Global Settings encryption is set to Required.

Maximum number of AudioCodes ports supported when encryption is used is listed in the following table:

DEVICE TYPE	MAXIMUM NUMBER OF ANALOG PORTS	MAXIMUM ENCRYPTION PORTS SUPPORTED
AudiCodes MP 11	2	2
AudiCodes MP 114	4	3
AudiCodes MP 118	8	6
AudiCodes MP 124	24	18
AudiCodes MP 124E	24	16

13. For the **Encryption Certificate File**, enter the certificate filename for the device type. The Encryption Certificate File can be obtained from the path specified in the Encryption Certificate File Path field in the Admin Tools | System Settings page.
14. Select the **Audiocodes Settings** that you want to enable.
  - Survivable Mode: Enables the AudioCodes device for survivability. When this box is checked, Stand-Alone Survivability is enabled using the configuration information in the AudioCodes Global Settings.
  - 3-Way Conference: Enables 3-way conferencing. Choose the configured conference server from the Conference Server drop down box or choose Use Global Settings.
  - Message Waiting Indicator: Enables the Message Waiting Indicator (MWI).
  - FAX Support: Enables FAX support.
  - Voice Quality Monitoring: Enables voice quality monitoring. When this box is checked, Voice Quality Monitoring is enabled using the configuration information in the AudioCodes Global Settings.
15. Select **Use Global Settings** to use the global settings for External Proxy, or uncheck the **Use Global Settings** check box and depending on the device model, enter the **Proxy**, **Proxy Port** with encryption or **Proxy Port** without encryption, and **Backup Proxy values** used by this device. These optional fields can contain text up to 256 characters, as well as tags.

**Template Add**

4	FXO	1	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>

Figure 28 Template Add – Ports for AudioCodes

- If the Groups tab appears for your device model, choose the Channel Select Mode for each group.

- By Destination Phone Number - The channel is selected according to the called (destination) number. If the number is not located, the call is released. If the channel is unavailable (busy), the call is put on call waiting (if call waiting is enabled and no other call is on call waiting); otherwise, the call is released.
- Cyclic Ascending - The next available channel in the Hunt Group, in ascending cyclic order, is selected. After the device reaches the highest channel number in the Hunt Group, it selects the lowest channel number in the Hunt Group, and then starts ascending again.
- Ascending - The lowest available channel in the Hunt Group is selected, and if unavailable, the next higher channel is selected.
- Cyclic Descending - The next available channel in descending cyclic order is selected. The next lower channel number in the Hunt Group is always selected. When the device reaches the lowest channel number in the Hunt Group, it selects the highest channel number in the Hunt Group, and then starts descending again.
- Descending - The highest available channel in the Hunt Group is selected, and if unavailable, the next lower channel is selected.
- Destination Number + Cyclic Ascending - The channel is selected according to the called number. If the called number isn't found, the next available channel in ascending cyclic order is selected.
- Source Phone Number - The channel is selected according to the calling number.
- Ring to Trunk Group - The device allocates IP-to-Tel calls to all the FXS ports (channels) in the Hunt Group. When a call is received for the Hunt Group, all telephones connected to the FXS ports belonging to the Hunt Group start ringing. The call is eventually received by whichever telephone first answers the call (after which the other phones stop ringing). This option is applicable only to FXS interfaces.
- Destination Number + Ascending - The device allocates a channel to incoming IP-to-Tel calls as follows:
  - The device attempts to route the call to the channel that is associated with the destination (called) number. If located, the call is sent to that channel.
  - If the number is not located or the channel is unavailable (busy), the device searches in ascending order for the next available channel in the Trunk Group. If located, the call is sent to that channel.
  - If all the channels are unavailable, the call is released.

4	Cyclic Descending	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
	Dest Number + Cyclic Ascending	- End of Groups -			
	Source Phone Number				
	Ring to Hunt Group				
	Dest Number + Ascending				

**Figure 29 Template Add – Groups for AudioCodes**

- Select the Group Definitions for each group.
  - Reverse Polarity: Enables or disables the reverse polarity signaling used by the ports in the group. If enabled the FXS interface changes the line polarity on call answer and then changes it back on call release. The FXO interface sends a 200 OK response when polarity reversal signal is detected (applicable only to one-stage dialing) and releases a call when a second polarity reversal signal is detected.
  - Current Disconnect: Enables or disables the detection of the current disconnect signal by the ports in the group. If enabled the FXO interface releases a call when a current disconnect signal is detected on its port, and the FXS interface generates a 'Current Disconnect Pulse' after a call is released from IP.
  - Two Stage Dial: Enables or disables Two Stage Dial for the ports in the group. With Two Stage Dial, the caller is presented with a secondary dial tone and must enter additional digits to reach the destination.
  - Register: Indicates whether the endpoints in the group are to register.

18. On the **Extra Settings** tab, enter any custom configuration information for the template.
19. If you are modifying an existing template, select the **Template Users** tab to display a list of users or devices that use this template.
20. Click **OK**.

## VIEWING OR EDITING GLOBAL SETTINGS

The Global Settings page allows you to view or change the global Clearspan settings at the System, Enterprise, and Group levels. After being saved, the change for the individual phones occurs at the next scheduled re-sync or reboot of the phones.

This feature should not be used without a thorough understanding of the device configuration files. All settings on the Global Configuration File Settings pages are optional, and some of them override others. For duplicated and conflicting configuration information, the following hierarchy is applied when creating the configuration file for the device.

Highest  
Priority

Overrides

Overrides

### Global Extra Settings

<h2>SYSTEM CONFIGURATION FILE EXTENSION SETTINGS</h2>	<div> <h3>Global Configuration File Settings</h3> <p>Display and change the global Clearspan settings for a selected Phone Manufacturer. After being saved, the change occurs at the next resync or reboot of the affected phones.</p> <p>OK Cancel Apply</p> <p>Enterprise: Moorehouse - Moore Enterprises of Texas</p> <p>Group: Hershey</p> <p>Phone Manufacturer: Mitel (Aastra)</p> <p>General Settings Extra Settings <b>System Config File Extension</b> Dial Plan</p> <div> <h4>System Config File Extension</h4> <pre> sip subscription timeout retry timer: 60 sip subscription failed retry timer: 30 sip as feature-event subscription period: 300 ##### # Encryption Settings ##### sip transport protocol: 1 sips persistent tts: 1 sip persistent tts keep alive: 10 sips symmetric tts signaling: 0 sip send sip over tts: 0 sip sip mode: 0 </pre> </div> <p>Browse... Upload System Config File Extension</p> </div>
---	--

The System Configuration File Extension settings are an extension of the system-wide phone configuration file specific to each phone manufacturer (such as “aastra.cfg” for Mitel (Aastra) phones).

This tab only appears for the following devices:

- Mitel (Aastra) – Settings extend the “aastra.cfg” file.
- Polycom Phones – Settings extend the “sys.cfg” file.
- Panasonic Phones – Settings extend the “KX-TGP600.cfg” file.

Just as with the phone configuration files, the settings on the Extension tab have a lower-priority than ALL other Global Settings (including Global Extra Settings) and Template Settings. However, the Extension tab settings have higher-priority than the settings in the phone configuration file being extended. Unlike changes to other Global Settings, when settings in the System Config File Extension tab are changed, the configuration file for all affected phones will NOT be rebuilt. Instead, the next time each phone’s configuration file is rebuilt, it will include the System Config File Extension settings.

#### Notes:

- Super Users, System Administrators, and Mitel Support Solution Resellers can modify the System Configuration File Extension settings and the Global Extra Settings (at all levels).
- Mitel Support Enterprise Administrators can modify the Global Extra Settings at both the Enterprise and Group levels.
- Mitel Support Group Administrators can modify the Global Extra Settings for Groups.

All other administrators can only view the System Configuration File Extension settings and Global Extra Settings.

To view or edit global settings:

1. From the main menu, select **Provisioning**, and then select **Phone Templates**.
2. Select **Global Settings** from the Phone Templates menu. The Global Configuration File Settings page displays.
3. Select the **Enterprise** from the drop-down list.
4. Select the **Group** from the drop-down list.
5. Select the **Phone Manufacturer**. The available manufacturers depend on the device types configured for the Enterprise.
6. To change any global configuration settings on the General Settings tab, click the **System/Enterprise/Group Settings** buttons and make your selections.
7. You can click **Force System Rebuild**, **Force Enterprise Rebuild**, or **Force Group Rebuild** to rebuild the configuration files for the selected phone manufacturer without making any changes. Rebuild Status is shown on the Template pages and Global Settings page.
8. Certain device-specific settings not available in OpEasy menus can be set manually on the Extra Settings tab by typing into the text fields or uploading a text file that contains the appropriate settings.

The following sections describe the global settings for Mitel (Aastra) phones, AudioCodes devices, and Clearspan Communicator. For global settings information for Panasonic and Polycom phones, refer to Phone Templates: Global Settings for Panasonic Phones, and System, Enterprise, and Group Global Settings for Polycom Phones.

Notes: The \*.conf file format is not supported in extra settings.

9. Click **OK** or **Apply**.
10. On the Rebuild Configuration Files page that appears, click **Save and Rebuild** to save the changes and start the configuration file rebuild process, or click **Cancel**.

### Global Configuration File Settings: Rebuild Configuration Files

All devices in this Group from this manufacturer are affected by the change to Global Settings. Click "Save and Rebuild" to save the Template changes and rebuild all configuration files using this template. Click "Cancel" to return without saving or rebuilding.

**This change may cause Phone Device configuration files to be rebuilt in the following areas:**

Phone Manufacturer: Mitel (Aastra)

Enterprise: Moorehouse -- Moore Enterprises of Texas

Group: Hershey -- Hershey

**Figure 30 Global Configuration File Settings: Rebuild Configuration Files Page**

Rebuild Status is shown on the Template pages and Global Settings page.

## SYSTEM, ENTERPRISE, AND GROUP MITEL (AASTRA) PHONE GLOBAL SETTINGS

The Global Configuration File Settings page contains the following settings for contain the following settings for Mitel phones:

- SIP Settings – Outbound Proxy, Outbound Proxy Port (No Encryption) and Outbound Proxy Port (Encryption), Encryption settings, Encryption Certificate File (Name for certificate file. Must be entered if Encryption is set to Required), and Subscription Time (as-feature-event).
- Time Settings
  - **Time Server** 1, 2, and 3 are text fields that contain the FQDN/IP address of the first, second, and third time servers, respectively
  - SIP Phone **Time Zone**
- Device Settings
  - **LAN Port Mode**
  - **Admin Password** and **User Password**. Valid password characters are a-z, A-Z, 0-9, or special characters – (dash), \_ (underscore), . (period), or @ (at symbol).
  - **Web Interface** enables/disables the web interface for the phone
  - **Phone Lock** enables/disables the ability to lock the phone.
- Voice Codecs – Voice Codec #1 (highest priority), #2, #3, and #4 (lowest priority).
- Quality Monitoring – Quality Monitoring Enable, Collector Server Address, and Collector Server Port. The Collector Server Address is the fully qualified domain name, for example telchemy@tb20.mitel.com.
- General Settings
  - If **Static Call Park/Pickup** is enabled, Park and Pickup keys appear on the phone automatically without the need to specifically define a Park or Pickup key. If you enable this setting when those keys are also defined, then two Park/Pickup keys appear on the phone.
  - **Conference Server** is the conference server to be used for conference calls. The drop-down list contains a list of configured conference servers.
  - **Firmware Server** is a text field that contains the location of the firmware to be loaded.

- **Image Server** is a text field that contains the URI of the image server where pictures are stored for the display on the phone during incoming and outgoing calls, in the Directory, Received Callers list, and Outgoing Redial List entries. This setting applies to only the 6867i, 6869i, and 6873i phones. The requirements for the file are as follows:
  - o Pictures must be PNG format
  - o 150x150 pixels
  - o 24 or 32-bit color
  - o Filenames must be stored using the phone number as the filename (eg. 9995551234.png)
- **Upload System Info Server** contains the location where the phone sends the system and crash files (server.cfg, local.cfg, and crash.gz) if **Upload System Info On Crash** is enabled.

### Global Configuration File Settings

Display and change the global Clearspan settings for a selected Phone Manufacturer. After being saved, the change occurs at the next resync or reboot of the affected phones.

Figure 31 Global Configuration File Settings Page – Aastra/Mitel Phones

## SYSTEM, ENTERPRISE, AND GROUP MITEL MIVoice CONFERENCE PHONE GLOBAL SETTINGS

The Global Configuration File Settings page contains the following settings for Mitel MiVoice phones:

- SIP Settings – Outbound Proxy, Outbound Proxy Port.
- Time Settings – Time Server and SIP Phone Time Zone.
- Voice Codecs – Voice Codec #1 (highest priority), #2, #3, and #4 (lowest priority).
- General Settings – Firmware Server is a text field that contains the location of the firmware to be loaded.

## SYSTEM, ENTERPRISE, AND GROUP AUDIOCODES GLOBAL SETTINGS

The Global Configuration File Settings page contains the following settings for AudioCodes MP-1xx/MP-1288 devices:

- SIP Settings – External Proxy, External Proxy Port with encryption or External Proxy Port without encryption, External Backup Proxy, Local SIP Port, Local SIP TLS Port, Encryption Certificate File (Name for certificate file. Must be entered if Encryption is set to Required) and Encryption (TLS/SRTP) settings for Group and Enterprise Settings.
- Stand-Alone Survivability – Local SIP Port, Local SIP TLS Port, SAS Local SIP Port, SAS Local SIP TLS Port, SAS Default Gateway Settings, SAS Default Gateway, and SAS Default Gateway Port.
- DNS Servers – DNS Server Settings, Primary DNS Server and Secondary DNS Server.
- Time Settings – Time Server Settings, Time Server, Backup Time Server, and Time Zone.
- Device Settings – LAN Port Mode.
- Voice Codecs – Voice Codec Settings, Voice Codec #1 (highest priority), #2, #3, and #4 (lowest priority).
- SNMP Settings – SNMP Traps, SNMP Server 1, SNMP Server 2, SNMP Server 3, SNMP Server 4, and SNMP Server 5.
- Quality Monitoring – Quality Monitoring (Session Only or Session and Periodic), Collector Server Address, and Collector Server Port. The Collector Server Address is the fully qualified domain name, for example telchemy@tb20.mitel.com.
- Conference Server is the conference server to be used for conference calls. The drop-down list contains a list of configured conference servers.

## SYSTEM, ENTERPRISE, AND GROUP CLEARSPAN COMMUNICATOR GLOBAL SETTINGS

The Global Settings: Clearspan Communicator pages contain the following settings for Clearspan Communicator devices:

- SIP Settings – Outbound Proxy, Proxy Discovery Domain, Outbound Proxy Port (No Encryption) and Outbound Proxy Port (Encryption). Encryption (TLS/SRTP) – Required or Not Allowed.
- Codecs – Adaptive Quality (Mobile and Tablet only).
- Voice Codecs – Voice Codec #1 (highest priority), #2, #3, #4, and #5 (lowest priority).

**Note:** G711 u-law, G711 A-law, G722, G729AB and OPUS are the supported voice codecs.

- Video Codecs – Video Codec #1 (highest priority), and #2 (lowest priority).
- Quality Monitoring – Quality Monitoring, Collector Server Address, and Collector Server Port. The Collector Server Address is the fully qualified domain name, for example telchemy@tb20.mitel.com.

## VIEWING OR EDITING DIAL PLANS

The Global Settings: Dial Plans page allows you to view or change the dial plans at the System, Enterprise, or Group level, for a selected Phone Manufacturer.

1. From the main menu, select **Provisioning**, and then select **Phone Templates**.
2. Select **Global Settings** from the Phone Templates menu. The Global Configuration File Settings page displays.
3. Select the **Enterprise** and **Group** from the drop-down lists.
4. Select the **Phone Manufacturer**. The available manufacturers depend on the device types configured for the Enterprise.
5. Click the **Dial Plan** tab.

**Global Configuration File Settings**  
Display and change the global Clearspan settings for a selected Phone Manufacturer. After being saved, the change occurs at the next resync or reboot of the affected phone.

Enterprise: Moorehouse - Moore Enterprises of Texas  
Group: Hershey  
Phone Manufacturer: Mitel (Aastra)

General Settings | Extra Settings | **Dial Plan**

Refresh | Block Mode

**Group Dial Plan**  
Digit Timeout: 4 seconds | Clear | Copy | Paste

**Enterprise Dial Plan**  
Digit Timeout: 4 seconds

**System Dial Plan**  
Digit Timeout: 10 seconds

11-7700X  
972555XXXX  
812-8800000000X

**Figure 32 Global Configuration File Settings: Dial Plans Tab**

6. Enter or modify the dial plans at the System, Enterprise, and Group levels. A dial plan is the expected sequence of digits dialed from a phone to make calls or activate certain features.
  - Use the Clear button to delete a dial plan.
  - Use the Copy and Paste buttons to copy an existing dial plan to another field.
  - Use the Line Mode and Block Mode buttons to toggle between the two format views.
  - Enter or change the Digit Timeout values as desired. The Digit Timeout is the time that the phone waits between key presses before timing out and returning to the idle state.
  - If values are entered in multiple fields, Enterprise settings take precedence over System settings, Group settings take precedence over System and Enterprise settings, and phone template Extra Settings take precedence over all others.
7. Dial Plan changes might also require changes to the configuration settings in the Phone Number Formatting phone application. Contact your system administrator. If modifications have been made, click **OK**. If no modifications have been made, or you wish to cancel your changes, click **Cancel**.

Note: For information about Dial Plans specific to Panasonic phones, refer to the appendix of this guide.

## VIEWING EMS ADDRESSES

Each Phone Template is assigned an EMS Server address, which is used by the Soft Keys. You can view the EMS Server addresses that have been set up by your administrator.

1. From the main menu, select **Provisioning**, and then select **Phone Templates**.
2. Click **Server Addresses** from the menu tree, or click **Server Addresses** from the Phone Templates menu. Then click **EMS Server Addresses**. The EMS Addresses page displays. The current EMS servers are displayed in the list.

### EMS Addresses

Display or change the list of EMS Server addresses (host names / IP addresses). Each Phone Template is assigned an EMS Server address, which is used by Soft Keys.

OK Cancel Add

Rebuild Status: [Refresh](#) System: None pending.

3. Click **OK**.

# PHONE MANAGEMENT

Phone Management allows you to view, add, modify, and restart phone devices. Phone Templates must already exist.

## POLYCOM PHONE SUPPORT

You can use OpEasy to configure certain Polycom phones when the Polycom Phone Support system license for Clearspan is installed. Refer to the appendix of this guide for more information about using OpEasy to provision Polycom phones.

## VIEWING PHONE DEVICE TEMPLATES

To view existing Phone Templates:

1. Select **Provisioning** from the main menu, and then select **Phone Management**.
2. Select the **Enterprise** and **Group**. You can also select (All Enterprises) and All Groups.
3. Select the Device Levels. Click **Search** to display all phone devices.
4. Click the **View** button next to the Template column, in the row of the phone device for which you want to view the template. The phone template appears as shown in the following figure.

**Note:** Enterprise-level devices do not use Group-level Global Settings. Instead, they use Enterprise-level Global Settings.

**Phone Management: Phone Template**  
View the details of the phone template that is assigned to a phone device.

Enterprise: Moorehouse -- Moore Enterprises of Texas

## RESTARTING PHONE DEVICES

1. From the main menu, select **Provisioning**, and then select **Phone Management**.
2. Select the **Enterprise** and **Group** from the drop-down lists, if necessary.
3. Select the **Device Levels**.
4. Click **Search** to display all phone devices for the group.
5. Check the box in the **Selected** column for phone devices that you want to restart. Check the **Select All Phones** box if you want to place a check mark in the column for all phones.
6. Check **Restart Phones on Save** to restart the selected phones when settings are saved.
7. Click **Restart Selected Phones** to restart only those phones where there is a check mark in the **Selected** column.

The screenshot shows a light blue rectangular box containing two sections. The top section, titled "Phone Restart:", includes a label "Select All Phones:" followed by an unchecked checkbox, a button labeled "Restart Selected Phones", and a label "Restart Phones on Save:" followed by an unchecked checkbox. The bottom section, titled "Display Selection:", includes a checked checkbox next to "Template Information" and an unchecked checkbox next to "Registration Status".

**Figure 36 Phone Restart and Display Selection Sections**

8. Under Display Selection, check the **Template Information** box to include Phone Template information in the "Phone Devices" table. Check **Registration Status** to displays column for this additional information in the table.

## ADDING A PHONE DEVICE

You can add a phone, gateway, or communicator application device in Phone Management or under Users when adding or modifying a user. To add a device in Phone Management:

1. From the main menu, select **Provisioning**.
2. Click **Phone Management** from the menu tree, or click **Phone Management** from the Provisioning page menu.
3. Select the **Device Levels**.
4. Click **Add**. The Phone Device Add page displays as in the following figure.

Note: If the Add button does not appear, then you are not authorized to add or delete devices.

**Phone Device Add**  
Add a new Clearspan phone device

MAC Address:   
Device Protocol: SIP 2.0  
Transport Protocol: Unspecified (VLAN is not enabled in the template)  
VLAN ID:   
WARNING: Modifying the VLAN ID may cause the phone to stop operating.  
Encryption: None

Figure 37 Phone Device Add Page

5. Enter the **Device Name**.
6. Select the **Device Level** and **Device Type** from the drop-down lists.
7. Select the **Template** from the drop-down list. To see the template you selected, use the **View Template** button. Do not set Mitel (Aastra), Polycom, or Panasonic phone templates to <None>. If an OpEasy template has not been created for those phone devices, set the value to <Default>.
8. In the Device Description section, enter a **Description** and **Serial Number** of the phone, both optional.
9. Enter the physical **Phone Location**.
10. The Device Configuration section includes the following optional information:
  - Host Name/IP Address
  - Port Number
  - Outbound Proxy
  - Stun Server
  - MAC Address
11. The **Device Protocol** is "SIP 2.0" by default.
12. The **Transport Protocol** is "Unspecified" by default.
13. Enter the **VLAN ID**. Note that modifying the VLAN ID may cause the phone to stop operating.
14. Enter the **ERL Record Name** (Optional Emergency Response Location data for E911 Emergency services).

15. The **Encryption (TLS/SRTP)** field displays the encryption status of the device, **Unsupported** appears in the field for devices that do not support encryption.

Encryption (TLS/SRTP) setting of the phone is specified by the template or global settings. If **Encryption Override** has been temporarily enabled, you can disable it.

**Note:** An error is displayed when the number of ports exceeds the maximum number of encryption ports supported when the Encryption Settings is set to Required or Use Global Settings, where the Global Settings encryption is set to Required.

16. Click **Custom Tags** to configure the name and value of any custom tags for the device. Click **Add** or **Edit** on the Phone Custom Tags page to create or modify a custom tag.

Figure 38 Phone Custom Tags Add Page

17. Click **Custom Rings** to customize the ring selections for each line on the device. Enable **Define Custom Ring Tones**, and then change any **Selected Ring** from the default to another ring tone.

Clearspan Line Position	Line User Id	Template Ring	Selected Ring
1		Ring 7	Ring 7
2		Ring 2	Ring 2
3		Ring 2	Ring 2
4		Default	Default

**Figure 43 Changing Template for a Phone Device**

- If you want to restart the device so it can pick up the new template, check **Restart Phones on Save**.
- Under Display Selection, check the **Template Information** box to include Phone Template information in the "Phone Devices" table. Check **Registration Status** to displays column for this additional information in the table.
- Click **OK** or **Apply**.

## ASSIGNING, REMOVING, OR RE-ORDERING USERS ON A PHONE DEVICE

- From the main menu, select **Provisioning**.
- Click **Phone Management** from the menu tree, or click **Phone Management** from the Provisioning page menu.
- Select the **Enterprise** and **Group** from the drop-down lists.
- Select the **Device Levels**.
- Click **Search** to display all devices, or enter search parameters to filter your search. A list of phone devices configured for this group displays.
- Click **Edit** at the end of the row for the device you want to modify.

**Phone Management**  
Add a new phone device, import a list of phone devices (from a worksheet), or search for a list of phone devices to edit or delete.

8. The Phone Device Modify: Manage Users page displays, where you can add new users, remove users, replace users, or reorder users as described in the following sections.

## Assigning New Users to a Phone Device

Follow these steps to add a user to a phone device using Phone Management:

1. On the Manage Users page, Click **Search for Users** to see all available users.
2. Select the user you want to add from the **Select User** drop-down menu. You can use search criteria to filter the list of users in the drop-down, and you can choose to list users **Ordered by Name**, **Ordered by Phone Number/Extension**, or **Ordered by User ID**.

**Phone Device Modify: Manage Users**

Display the users assigned to a phone device and details of the associated phone template. Assign, Unassign, or Re-order Users on the page.

# USER PROFILES

The User Profile is a set of rules applied at the time of user creation. Having this set of rules simplifies the user creation process because it allows certain user fields to be derived based on the rules. User Profiles must be created before adding Users. User Profiles can be exported and imported using Group Import and Group Export.

Note: In order to allow administrators to quickly set up users with Polycom or Panasonic phones, one or more User Profiles should be created for each type of Polycom and Panasonic phone that will be used. For more information, refer to the appendixes of this guide.

## ADDING A USER PROFILE

Many of the parameters on this page are set to default values and may not need to be changed.

1. From the main menu, select **Provisioning**.
2. Click **User Profiles** from the menu tree, or click **User Profiles** from the Provisioning page menu.
3. Select the **Enterprise** and **Group** from the drop-down lists.
4. Click **Add**. The User Profile Add page displays as shown in the following example.

**User Profile Add**  
Enter the configuration rules needed to create a new Clearspan user.

OK Cancel Apply

Enterprise: SystemValidation - System Validation  
Group: SmallSatelliteBranch2 - SSB2 MSBR

**User Profile**

**Configuration Rules**

Site ID: (Required to create Extension-only users)  
 User ID: (First Name) (Last Name)@tb20usb2.mitel.com

Figure 47 User Profile Add Page - Top

5. Enter the **User Profile Name**.
6. Enter a **Description** for the user profile.

7. Select the **User Type**. The options are Normal and Voice Mail Only.
8. Choose the E-mail notifications that you want sent when a new user is created that uses this profile. E-mail notifications are supported only for Mitel, Panasonic, and Polycom phones.
9. Select the **Device Type** from the drop-down list. Note that if a selection of “Trunk User” is made, the screen refreshes with different fields. See section *Creating a Trunk User Profile* for more information.
10. Select the **Device Level** and **Template** from the drop-down list.
11. Click **View Phone Configuration** button to confirm this device and template are correct.
12. Check one or more of the **Service Packs** required by the user. A Service Pack is a grouping of one or more Clearspan services and is created on Clearspan. In this section, all Service Packs available to this Enterprise and Group will be listed. You should know the content of the Service Pack before assigning it to the profile.
13. User Defined Fields– This field is displayed only if the User Fields are defined at the Enterprise level. To change the default value of the User Defined Fields, uncheck the **Use Default** checkbox and enter the value of the User Defined Field in the **Value** box.
14. Select the **User Domain** from the drop-down list in the **User Information** section. The drop-down list contains all domains assigned to this Enterprise and Group.
15. Select the **User Billing Type**. The **User Billing Type** drop down box appears only if the Billing User Types are defined in the System Settings (Only SU administrators are allowed to configure System Settings).

**Configuration Rules**

Site ID:  (Required to create Extension-only users)

User ID:  (First Name).(Last Name)@moorehouse.com

Line/Port:  (Phone Number / Extension) @ moorehouse.com

Template:  (Select Template)

Figure 48 User Profile Add Page – Bottom

16. Enter the **Site ID**, if necessary. The Site ID is appended to an extension number for provisioning of *extension-only users*. This is useful when a Clearspan User ID is to be the user's phone number. The Site ID is appended to make the User ID unique.
17. Select the format for the **User ID** from the drop-down list. The options include, FirstNameLastName, PhoneNumber, or the User's E-mail Address.

18. Check the **User Password** checkbox to initialize the password to a randomly generated value; leaving the box unchecked requires the administrator to enter a password.
19. Click one of the following for **New Phone Number Activation**: **Activate** (Recommended) if the phones will place and receive calls from outside the system, or **Deactivate** if the calls will be internal only.
20. Change the **Network Server Site** if you want to use a site other than the one shown. This setting applies when a user is assigned a phone number.
21. Choose a **Selection Method**. None (Manually selected by Admin), Extension Only, or Preselect Phone Number from Range. When **Preselect Phone Number from Range** is selected, Available Phone Number Ranges appear so that you can add them to Selected Phone Number Ranges.
22. Choose **Yes** for **Auto Generate Extension** to have OpEasy automatically generate an extension for the user based on the User Profile rules.

You can enter prefix digits and select from a drop down list the number of digits to be used from the phone number to form the extension. For example, you could specify the prefix digits of '44' and select '3 digits' from the drop down list. This would result in an extension being generated that starts with '44' and ends with the last 3 digits of the assigned phone number. If the user is assigned the phone number 214-555-1234 an extension of 44234 would be assigned to the user.

23. Choose a **Class of Service** from the drop-down list. The list shows all Classes of Services associated with the Enterprise and Group and also allows selection of the Group default.
24. Make a selection for **Voice Mail** from the drop down list. The following is available when voice mail is allowed:
  - No Voice Mail.
  - No E-mail Notification - The user's phone will notify of a voice mail, but no notification will be sent to the user's e-mail.
  - E-mail Notification - In addition to the user's phone notification, notification will also be sent to the user's e-mail.
  - E-mail Delivery - In addition to the user's phone notification, an e-mail will be sent to the user and the voice message will be included as an attachment.
  - Selectable, with Default: No Voice Mail
  - Selectable, with Default: Voice Mail – No E-mail Notification
  - Selectable, with Default: Voice Mail – E-mail Notification

- Selectable, with Default: Voice Mail – E-mail Delivery

**Caution: E-mail copies of Voice Mail may not be sent over secure E-mail.**

The first four options in the drop-down list do not allow administrators to choose any other voice mail type when creating a user with a Basic Import spreadsheet. However, the last four options, labeled 'Selectable', provide a default setting that can be overridden when creating a user with a Basic Import spreadsheet. The Advanced Import spreadsheet does not have these 'Selectable' options, because you can always select any Voice Mail setting when using an Advanced Import, regardless of the User Profile Voice Mail setting.

25. If the Voice Mail selection is other than No Voice Mail, the Group Mail Server fields are presented. Enter the **E-mail Address** domain and the **Password** for that server.
26. Choose a **Music On Hold Profile** if that service is assigned and you want to specify those settings for this user profile.
27. Specify the information that will appear for **Calling Line ID**.

The options are to provide the user's last name, first name, and phone number, or to specify something different using the text boxes to the right of each field.

Specifying something other than user's name and phone number is useful if, for example, this User Profile will be used for members of a technical support group. It may be more appropriate to show, "Technical Support" and the support center number rather than the user's personal information. Before making a selection, however, it is important to note that the phone number field will be used for 911 purposes in some cases:

- If the OpEasy Emergency Gateway application IS in use, the Calling Line ID: Phone Number field will NOT be used for 911. In this case, the ERL Record Name field will be used for 911 purposes for user location.
- If the OpEasy Emergency Gateway application is NOT in use, the Calling Line ID: Phone Number field WILL be used for 911. When the Calling Line ID: Phone Number field is used for 911, the OpEasy Administrator must know the phone numbers that have been provisioned for 911 and must provide the correct phone number for each user.

For example, assuming the OpEasy Emergency Gateway application is not in use:

- If a single phone number (i.e. 469.365.3000) has been provisioned for 911 for an entire building, then the OpEasy Administrator must specify that single phone number (4693653000) as the Calling Line ID: Phone Number for each Clearspan user at this location.
- If the DIDs associated with each user's phone number at a specific location have been provisioned for 911, then the OpEasy Administrator can specify the user's phone number as the Calling Line ID: Phone Number (the default setting).

Note: On Clearspan, the Call Processing Policies can be set at the Enterprise, Group and User levels. For each level, the default is to "Use configurable CLID for Calling Line Identity" as circled in the following illustration. In order to make use of the settings configured in User Profile for Calling Line ID, the "Use configurable CLID for Calling Line Identity" settings must be maintained on Clearspan.

Clearspan®  
System > Marsh

Options:

- Profile
- Resources
- Services
- Call Center
- Communication Barring
- Meet-Me Conferencing
- Utilities

### Call Processing Policies

View or modify Call Processing Policies for the enterprise.

Calling Line ID

External Calls: ☐ Use user phone number for Calling Line Identity  
☒ Use configurable CLID for Calling Line Identity

Enterprise Calls: ☐ Use extension  
☒ Use location code plus extension  
☐ Use External Calls Policy

Group Calls: ☒ Use extension  
☐ Use location code plus extension  
☐ Use External Calls Policy

Emergency Calls: ☐ Use user phone number for Calling Line Identity  
☒ Use configurable CLID for Calling Line Identity

**Figure 49 Clearspan Call Processing Policies Page**

28. Choose the rules for creation of the **Authentication Name** and **Password**. The Name can be the User ID or a unique ID generated by OpEasy. The Password can be generated randomly by OpEasy or it can be specified in the text box to the right. Valid Authentication Password characters are a-z, A-Z, 0-9, blank, or special characters: - \_ . , ! \$ % & \* + / = ? ^ { } | ~ @.
29. Choose the domain to use for a user's **Phone Line/Port**. Select the domain from the drop-down list.
30. Choose the method for creation of the **MAC Address** for Mitel phone or AudioCodes **Auto Install**. The options are last 4 digits of the phone number, last 5 digits of the phone number, phone number, or extension. Each option has a **Unique ID (2-Digit SCA Number)** added.

The MAC Address here is not a real MAC Address but is instead an Auto Install Device ID. The information entered here is used later in the Auto Install of a Mitel (Aastra) phone or AudioCodes device to select this Clearspan device. After the Auto Install process is complete, the MAC Address field changes to the real MAC address.

31. For **Device Access**, choose the method for determining **User Name** and **Password**. This field is only used by Polycom phones.
32. Check the boxes for **Clearspan Communicator** desktop, mobile, or tablet if you choose to enable communication for this user. Also select the **Communicator Line/Port**, which is different than the Device Line/Port if a Remote User Gateway (RUG) is used.
33. Click **OK** or **Apply**.

## EDITING A USER PROFILE

1. From the main menu, select **Provisioning**.
2. Click **User Profiles** from the menu tree, or click **User Profiles** from the Provisioning page menu.
3. Select the **Enterprise** and **Group** from the drop-down lists.
4. Click **Search** to display all profiles, or enter search parameters to filter your search.
5. Click the **Edit** link on the end of the row of the profile to modify. The User Profile Modify page displays. You can modify the profile using the procedures in section *Adding a User Profile*. The only field that you cannot change is the User Profile Name field.
6. Click **OK** or **Apply**. Note that editing a User Profile does not affect any users that were previously built using this profile.

## COPYING A USER PROFILE

You can copy a User Profile to another enterprise/group or copy to the same enterprise/group. The template associated with the copied profile can be copied as well.

After the profile is copied, the new profile is edited on a new page to allow you to make any desired changes. The new profile will not be saved until it is edited.

1. From the main menu, select **Provisioning**.
2. Click **User Profiles** from the menu tree, or click **User Profiles** from the Provisioning page menu.
3. Select the **Enterprise** and **Group** from the drop-down lists.
4. Click **Search** to display all profiles, or enter search parameters to filter your search.
5. Click the **Copy** link on the end of the row of the profile to copy. The User Profile Copy page displays as in the following example.

**User Profile Copy**

Copy an existing User Profile. \*Pressing OK retains but does not save entered changes. To save the changes, press OK or Apply after editing the User Profile on the subsequent page.

Enterprise: Moorehouse -- Moore Enterprises of Texas  
Group: Relyks -- Relyks

\* User Profile Name: Moorehouse testing  
Description: premium, 6867i phone two lines

Copy Options: ☐ Replace Existing User Profile

NOTE: The copied User Profile will only be saved after editing. You may cancel the copy by pressing the Cancel button on this page or on the following User Profile Copy Modify page.

**Figure 50 User Profile Copy Page**

6. Select the target **Enterprise** and the target **Group** from the drop-down lists. In this case, the target group is in the same enterprise. If you choose another group, the Copy Options change.
7. Enter the name for the new profile in the **User Profile Name** text box.
8. Enter a **Description** in the Description text box.
9. Check the **Replace Existing User Profile** if you wish to overwrite an existing template of the same name.
10. If you chose a different group to copy this user profile to, you can configure the following:
  - Check Copy Template in order to copy the template that is associated with the original group to the new group.
  - Enter the Template Name and Description of the template.
11. Click **OK**. After you have copied a user profile, the User Profile Copy Modify page displays to allow you to modify the new copy.
12. Modify any of the settings in the new profile. You can modify the profile using the procedures in section *Adding a User Profile*.
13. Click **OK**. The User Profiles page displays, where the new profile appears in the list.

## CREATING A TRUNK USER PROFILE

To create Trunk Users more quickly, you can create a User Profile specifically for Trunk Users that specifies the Trunk Group, Trunk Line/Port, and Enterprise Trunk settings.

1. From the main menu, select **Provisioning**.
2. Click **User Profiles** from the menu tree, or click User Profiles from the Provisioning page menu.
3. Select the **Enterprise** and **Group** from the drop-down lists.
4. Click **Add**.

**Configuration Rules**

Site ID:  (Required to create Extension-only users)

User ID:  (First Name).(Last Name)@moorehouse.com Migration Trunk User: ☐ (Adds ".tu" before "@")

User Password: ☐ Initialize to random password

Phone Number: New Phone Number Activation: ☐ Activate ☐ Deactivate ☒ Do Not Change

Network Server Site:  DFLT\_SITE -- Default Site

Selection Method:  None (Manually selected by Admin)

Extension: Auto Generate Extension from Phone Number: ☒ Yes ☐ No

Use Prefix Digits  Plus the Last  4 Digits of the phone number

Class of Service:  Specify the Class of Service: (Group Default)

Voice Mail:  No Voice Mail

Music On Hold Profile:  (None)

Calling Line ID: Last Name:  User's Last Name First Name:  User's First Name Phone Number:  User's Phone Number

Authentication: Name:  User ID (without Domain) Password:  Generate Random Password

Trunk Group:  None (Manually entered by Admin)

Line/Port:  (Phone Number / Extension) @ moorehouse.com

Enterprise Trunk:  None (Manually entered by Admin)

Device Access: User Name:  Phone Number (or Extension + Unique ID) Group-Unique ID: 0136

Password:  Generate 4-Digit Random Password

Clearspan Communicator: ☐ Clearspan Communicator - Desktop (Create device for the user)

Line/Port:  (Phone Number / Extension) @ moorehouse.com

Template:  (Select Template)

**Figure 51 Trunk User Profile Settings**

5. Under the Primary Phone Device section, select **Trunk User** as the **Device Type**. When the Device Type is set to Trunk User, the User Profile page refreshes and the following occurs:
  - The Template field and View Phone Configuration button are grayed out under the Primary Phone Device section.
  - In the Configuration Rules section, the Line/Port field for the phone is removed. The Trunk Group/Enterprise Trunk fields are added and if a Trunk Group selection is made, the Line/Port field for the trunk is presented.
6. Select a **Trunk Group** for this user. Or, if this user will belong to multiple Trunk Groups, choose the appropriate **Enterprise Trunk**. The Line/Port applies when the Trunk Group selection is made.
7. Click **OK**.

## USERS

---

See the *Clearspan OpEasy Basic Provisioning Guide* for more information about creating a User as a Department Administrator, or an administrator with more limited privileges.

## USER LICENSES

The main Users page displays the number of OpEasy User Licenses that are used and available. Administrators can, if desired, set the User or Polycom licensing for an enterprise to Auto, so that licenses do not have to be set and maintained manually. For more information, refer to *Configuring License Allocations*.

## ADDING OR EDITING A USER

The “User”, “Optional”, and “Phones” tabs are populated before adding user features.

1. From the main menu, select **Provisioning** and then **Users**. The Users page displays.
2. Select the **Enterprise** and **Group** from the drop-down lists, if necessary. You can use search criteria to filter the list, or you can click **Search** to view the full list.

You can select (**All Enterprises**) in the Enterprise drop-box with (**All Groups**) automatically selected, and click **Search** to view Users in all the Enterprises and Groups. The User Search criteria for All Enterprises and All groups must include one or more of the following search criterias, in addition to any other search criteria:

- User ID / Alternate User ID
- Last Name
- First Name
- Phone Number (Primary) or Phone Number (Alternate)
- Extension

**Users**

Choose the desired Enterprise and Group. To add a new user, press the Add button. To display a list of users to edit or delete, press the Search button. To display or modify General User settings, or E-mail message sent to new users, press the General Settings button.

OK Cancel Add General Settings

An “OpEasy Managed User” consumes an OpEasy User License. OpEasy displays Clearspan users without a license, but in order for an administrator to add, modify, or change a Clearspan user using OpEasy, an OpEasy User License is required.

- Mitel Support users are created by the Mitel support team for testing and troubleshooting only. Click **Edit** in the search results for the user you want to modify, or click **Add** to add a new user, then the **Advanced: User Add** page displays. The **Advanced: User Modify** page displays if you click edit, as shown in the following figure. If no license is available, an error displays.

Note: If the Add button does not appear, then you are not authorized to add or delete users.

**Advanced: User Modify**

Modify an existing Clearspan user.

Figure 52 Advanced: User Modify Page, User Tab

## Users Tab

1. Select a **User Profile** from under the User Classification section drop-down list if desired. Choosing a User Profile pre-populates certain fields.
2. Click **View Template** if you want to view the phone template assigned to the User Profile.
3. Enter the user's **Last Name** and **First Name** under the Clearspan User section.
4. Enter the **E-mail Address** for the user.
5. Select the **User Billing Type**. The **User Billing Type** drop down box appears only if the User Billing Types are defined in the System Settings (Only SU administrators are allowed to configure System Settings).

The screenshot shows the 'Clearspan User' form. The 'User Billing Type' dropdown menu is open, showing 'Default: USER' as the selected option. Other fields visible include \* Last Name, \* First Name, E-mail Address, Department (set to '(None)'), Phone Number (set to '(Select Phone Number)'), Extension, and Primary Phone with a 'View Phone Template' button.

**Figure 53 Advanced: User Billing Type**

6. Select the **Department** from the drop-down list.
7. Select the **Phone Number** from the drop-down list. The **Extension** field fills in automatically if a User Profile has been selected.
8. **Activated** or **Deactivated** indicates the current status of the phone number selected. Change this setting if necessary. Select **Activated** (Recommended) if the phone will place and receive calls from outside the system, or **DeActivated** if the calls will be internal only.
9. Change the **Network Server Site** if you want to use a site other than the one shown. This setting applies when a user is assigned a phone number.
10. You can click **View Phone Template** to view the template for the primary phone.
11. Enter the **Phone Location** (Optional data for E911 Emergency services).
12. If the user is associated with an AudioCodes MediaPack device, you can enter a **User ERL Record Name** to assign a unique ERL for the user in the Emergency Gateway. If the User ERL Record Name field is blank, the ERL Record Name for the AudioCodes device is assigned to the user in the Emergency Gateway.
13. Select the **Voice Mail** type from the drop-down list if you choose to override the default. If Voice Mail was previously enabled and saved, **Delete Voice Mailbox** and **Reset Voice Mailbox** buttons appear. **Delete Voice Mailbox** removes the voice mail account and any associated greetings without deleting the user. **Reset Voice Mailbox** deletes and rebuilds the voice mail account and deletes any associated greetings to restore the Voice Mail Greetings settings to defaults.
14. Enter the **Voice Portal Passcode**. It is typically 4-8 digits in length, to be determined by the administrator. Valid characters are 0-9.

15. Enter the **User Password**. It can include any characters and is typically at least 6 characters in length, to be determined by the administrator. You can click **Initialize User Password to random password** to auto generate a password. This randomly generated password is lengthy and complicated, which protects the user from unauthorized access in cases where the password will not be used. If the user will use the password to access the web portal, this random password would not be desired.

The remaining parameters on this page can be hidden using the Hide Details button, or displayed using the Show Details button. If a User Profile is used, the fields in lower section are filled in automatically as you edit the upper section of the page. Click Refresh if you want to update the fields on the bottom of the page to reflect changes made on the top of the page.

If you are not using a User Profile to create the user or you need to override an entry generated by the User Profile, then review and modify the settings in this section:

- New User Notification–Mitel, Panasonic, and Polycom phones only
- Site ID–required if an extension-only user
- Clearspan User ID–required
- Mitel Support–checked if this user is for Mitel Support and is excluded from billing
- Calling Line ID information–last name and first name are required
- Service Packs selection–click on the Service Pack(s) on the left and click **Add**
- User Defined Fields– This field is displayed only if the User Fields are defined at the Enterprise level. To change the default value of the User Defined Fields, uncheck the **Use Default** checkbox and enter the value of the User Defined Field in the **Value** box.

User Defined Fields			
Field Name	Type	Use Default	Value
Enterprise Admin boolean field1	Boolean	<input checked="" type="checkbox"/>	True
Enterprise Admin boolean field2	Boolean	<input checked="" type="checkbox"/>	False
NEW FIELD	Number	<input checked="" type="checkbox"/>	
NUMBER field-empty string	Number	<input checked="" type="checkbox"/>	
SuperUser String Field1	String	<input checked="" type="checkbox"/>	SuperUserField-string value1
SuperUser String Field2	String	<input checked="" type="checkbox"/>	SuperUserField-string value2
System Admin Number Field1	Number	<input checked="" type="checkbox"/>	12345
System Admin Number Field2	Number	<input checked="" type="checkbox"/>	54321

**Figure 54 User Defined Fields**

- Authentication Name and Password–required if this user is assigned a device that uses authentication, the password is to be determined by the administrator. You can click **Initialize Authentication Password to random password** to auto generate a password. This randomly generated password is lengthy and complicated, which protects the user from unauthorized access in cases where the password will not be used. The generated password has 40 characters, and includes uppercase, lowercase, numeric, and special characters.

Note: For information about configuring Device Access credentials for Polycom phones, refer to the appendix of this guide.

## Optional Tab

Click on the Optional tab of the User Add page to view or change optional values such as Contact Information, Time Zone, Language information, and Aliases used to place and receive calls. User Information values are pre-populated but can be changed if additional options are available in the drop-down menus.

You can enter up to four Alternate User IDs, which can be used to sign on to the Clearspan system. When searching for users or devices by User ID, matching Alternate User IDs are included in the results.

**Advanced: User Modify**  
Modify an existing Clearspan user.

### *Editing the Primary Phone Device for a User*

The Phones tab provides the ability to change the primary phone device for a user using the Edit button.

1. From the main menu, select **Provisioning** and then **Users**. The Users page displays.
2. Select the **Enterprise** and **Group** from the drop-down list, if necessary.
3. Click **Search**.
4. Click the **Edit** link at the end of the user's row.

5. Click the **Phones** tab on the Advanced: User Modify page.
6. Click the **Edit** button on the Phones tab. The User: Primary Phone Device Modify page displays.
  - The **Unassign Device** button removes the phone device from this user without deleting it. The **Delete Device** button deletes this phone device from the Clearspan system. The **Delete Device** button does not appear if the phone device is used as a primary device by any other user.
  - The **Custom Tags** button takes you to the Primary Phone Device Custom Tags page where you can configure the name and value of any custom tags for the device.
  - The **Custom Rings** button takes you to the Primary Phone Device Custom Ring Tones page where you can customize the ring selections for each line on the device.
  - The **Replace Phone** button takes you to the Replace Phone page to replace an existing phone with a new phone with the same model and functionality. Enter the MAC Address of the device or enter the Auto Install ID of the device. Enter the Device Access User Name and Password for Polycom Phones.

**Note:** The Replace Phone option is not applicable to Clearspan Communicator devices.

**Figure 57 User: Replace Phone**

7. Select **New Phone Device** from the Phone Device drop-down list to create a new phone device. Select **Search Phone Devices** to search for a specific device or set of devices. After you click **Search**, the **Phone Device List** contains a list of devices that match the search criteria.

**Note:** If the New Phone Device selection does not appear, then you are not authorized to add or delete devices.

8. Enter the **Line/Port** information. The field is pre-populated, but you should verify the information. It can be characters or numbers but must be unique. The recommended format is:

<Phone Number/Extension>.<Line Definition>.<Customized Field>@<Line/Port Domain>

The following are examples of the Line/Port user portion (before the @):

- Extension Only
  - Single or primary SCA line:
    - 3000.primary.site345

- Secondary SCA lines:
  - 3000.sca01.site345, 3000.sca02desktop.site345, 3000.sca03mobile.site345
- Phone Number
  - Single or primary SCA line:
    - North American Number: 4693653000.primary.site345 or 4693653000.primary
    - E.164 Number: -72884000.primary.site345 or -72884000.primary
  - Secondary SCA lines:
    - North American Number: 4693653000.sca01.site345 or 4693653000.sca01
    - North American Number: 4693653000.sca02desktop.site345 or 4693653000.sca02desktop
    - North American Number: 4693653000.sca03mobile.site345 or 4693653000.sca03mobile

9. Select a **Line Position** if more than one user is assigned to this device.

10. If the user is associated with an AudioCodes MediaPack device, you can enter a **User ERL Record Name** to assign a unique ERL for the user in the Emergency Gateway. If the User ERL Record Name field is blank, the ERL Record Name for the AudioCodes device is assigned to the user in the Emergency Gateway.

11. The **Encryption (TLS/SRTP)** field displays the encryption status of the device, **Unsupported** appears in the field for devices that do not support encryption.

Encryption (TLS/SRTP) setting of the phone is specified by the template or global settings. If **Encryption Override** has been temporarily enabled, you can disable it.

The Phone Device Users table shows the users assigned to this phone device.

13. Click **OK**.

Note: For information about configuring Device Access credentials for Polycom phones, refer to the appendix of this guide.

### *Adding a Shared Call Appearance (SCA)*

A Shared Call Appearance (SCA) can be added on the Phones tab while you are adding or modifying a user. The SCA is the user's number assigned to another phone. SCAs can be useful for executive/assistant situations or anytime you want another user answering this user's phone. Additionally, inbound and outbound calls can be completed on this SCA number.

1. From the main menu, select **Provisioning** and then **Users**. The Users page displays.
2. Select the **Enterprise** and **Group** from the drop-down list, if necessary.
3. Click **Search**.
4. Click the **Edit** link at the end of the user's row.
5. Click the **Phones** tab on the Advanced: User Modify page.
6. Select **Add Shared Call Appearance**. The User: Shared Call Appearance (SCA) Add page displays.
7. Select the **Phone Device** where this number will be placed from the Phone Device drop-down list. When assigning a device to an SCA, **Search Phone Devices** is the default selection. Select criteria for a specific device or set of devices. After you click **Search**, the **Phone Device List** contains a list of devices that match the search criteria.

**User: Shared Call Appearance (SCA) Add**

Assign the user as a line on an additional phone device. \*Pressing OK retains but does not save entered changes. To save the changes, press OK or Apply on the subsequent page.

Line Position:

Shared Call Appearance:

**Figure 59 User: SCA Add Page – Phone Device List**

8. The **Template** is automatically filled in from the existing information. However, you can change it to a template that will accommodate the SCA.

**Figure 60 User: Shared Call Appearance (SCA) Add Page**

9. To view the template for this phone device, click **View Template**. To change user assignments on this phone device, click **Manage Users** and make changes as described in Assigning, Removing, or Re-ordering Users on a Phone Device.
10. Check Restart Phones on Save.
11. Enter the **Line/Port** number. In this example, it is 4765552014.sca01, the number of the line that is going onto this phone as an SCA. This recommended naming convention keeps track of the SCA numbers on a particular phone. If you create another SCA on this phone, it would be "Phone Number + .sca02".
12. Choose **Line Position** from the drop-down list to indicate the position of this Shared Call Appearance on the device selected.
13. The **Allow Calls to be Originated** and the **Allow Calls to this Destination** fields are checked by default. Make adjustments if you don't want calls to be originated from or terminated on this SCA line.
14. Click **OK\***. The entry is not yet saved.
15. Click the **SCA Options** button on the Phones tab if you want to change any of the following options that apply to all SCAs:
  - Alert All Shared Appearances for Click-to-Dial calls
  - Allow Call Retrieve from another location
  - Allow Multiple Concurrent Calls on the same shared line
  - Bridging

**Figure 61 Advanced: User Modify Page – SCA Options Tab**

16. Check **Allow Bridging of Users on the same shared line**, if desired.
17. Choose a **Bridge Warning Tone for Barge-in** option from the drop-down list. The tone can be played one time at Barge-in, or can be repeated every 30 seconds.
18. Click **OK** or **Apply**.

**To Add or Replace a New Phone Device for Shared Call Appearance:**

1. Select the device or the All Devices option from the **Phone Device Search** section, and click **Search**.
2. Select the phone device from the **Phone Device List**, select the template or use the default template, click **OK**. The Advanced: User Modify page displays.
3. Click **Edit** in the **Phone Devices** Table, the User: Primary Phone Device Modify page displays.
4. Click **Replace Phone** to replace an existing phone with a new phone with the same model and functionality. The **Replace Phone** button takes you to the Replace Phone page.
5. Enter the MAC Address of the device or enter the Auto Install ID of the device. Enter the Device Access User Name and Password for Polycom Phones.

### Removing a Shared Call Appearance

1. From the main menu, select **Provisioning** and then **Users**. The Users page displays.
2. Select the **Enterprise** and **Group** from the drop-down list, if necessary.
3. Click **Search**.
4. Click the **Edit** link at the end of the user's row.
5. Click the **Phones** tab on the Advanced: User Modify page.
6. Click the **Edit** link in the row of the SCA to remove, in the list at the bottom of the page.

**Advanced: User Modify**  
Modify an existing Clearspan user.

9. Click **OK** in the Unassign confirmation dialog box. The Shared Call Appearance is removed.
10. Click **OK** or **Apply**.
11. The **Custom Tags** button takes you to the Shared Call Appearance (SCA) Custom Tags page where you can configure the name and value of any custom tags for the device.
12. The **Custom Rings** button takes you to the Shared Call Appearance (SCA) Custom Ring Tones page where you can customize the ring selections for each line on the device.

### Creating a Trunk User

You can create a Trunk User within a Clearspan Trunk Group, to provide SIP-based network services to legacy phone equipment. To create Trunk Users more quickly, you can create a User Profile that specifies the Trunk Group, Line/Port, and Enterprise Trunk settings.

1. From the main menu, select **Provisioning** and then **Users**. The Users page displays.
2. Select the **Enterprise** and **Group** from the drop-down list, if necessary. You can create a Trunk User by either adding the user to a Trunk Group or assigning the user to an Enterprise Trunk.
3. Click **Add**.

Note: If the Add button does not appear, then you are not authorized to add or delete users.

4. Click the **Phones** tab on the Advanced: User Add page.
5. Select **Assign Primary Trunk** for the Primary Phone. The User: Primary Trunk Assign page displays.

**Figure 64 User: Primary Trunk Assign Page**

6. Set the Trunk Group to the Clearspan Trunk Group for the user.
7. Enter the **Line/Port** when a Trunk Group is selected.
8. Enter an **Alternate Trunk Identity**, if desired. This field is used to present alternative routing information to the destination. For example, if the user is behind an existing PBX, this field may be used to properly route the trunk to the current PBX destination.
9. Enter a **SIP Contact** (Trunk contact) when the Identity/Device Profile Type is "Static Registration capable."
10. Choose an **Enterprise Trunk** when the Trunk User will use more than one Trunk Group.
11. Click **OK**. The Users page displays.
12. Click **OK** again.

## Announcements Tab

OpEasy allows you to upload, delete, or configure audio or video announcement files to repositories. Announcements repositories are kept for Users, Auto Attendant and Hunt Group virtual users, and Groups. Once an announcement is saved to a repository, OpEasy allows you to assign it to Voice Mail Greetings, Auto Attendant menus, and Music On Hold. You can search, upload, rename, or delete announcements on a user's Announcements tab. You can also view announcement types, size, and usage. You can manage announcements when you create a new user or when modifying a user, as follows:

1. From the main menu, select **Provisioning** and then **Users**. The Users page displays.
2. Select the **Enterprise** and **Group** from the drop-down list, if necessary.
3. Click **Search**.
4. Click the **Edit** link in the row of the user for which you want to configure Announcements. The Advanced: User Modify page displays.
5. Select the **Announcements** tab.

**Advanced: User Modify**  
Modify an existing Clearspan user.

## CONFIGURING ADVANCED USER FEATURES

When you add or modify a user, the Service drop-down list allows you to configure the following additional features:

- Alternate Numbers
- Authorization Codes
- Busy Lamp Field (BLF)
- Call Center Agent
- Call Center Supervisor
- Call Forward
- Call Forward Selective
- Call Pickup
- Call Recording
- Clearspan Anywhere
- Fax Messaging
- Flexible Seating Guest
- Hoteling Guest
- Hoteling Host

- Hunt Group
- Integrated IM&P
- Music On Hold
- Priority Alert
- Privacy
- Speed Dial 8
- Speed Dial 100
- Voice Mail
- Voice Mail Distribution Lists
- Voice Mail Greetings

## Alternate Numbers

Alternate Numbers allows you to add up to ten additional phone numbers or extensions to be assigned in addition to your primary number and extension. All additional numbers and extensions ring your phone (s) just like your primary phone. In addition, you can specify a distinctive ringing pattern for each number, if your phone supports it.

1. From the main menu, select **Provisioning** and then **Users**. The **Users** page displays.
2. Select the **Enterprise** and **Group** from the drop-down list, if necessary.
3. Click **Search**.
4. Click the **Edit** link in the row of the user for which you want to set up alternate numbers. The **Advanced: User Modify** page displays.
5. Select **Alternate Numbers** from the **Service** Drop-down list. The **Alternate Numbers** tab displays as in the following example:

### Advanced: User Modify

Modify an existing Clearspan user.

6. Click **Add Authorization Code**.
7. To add a code, enter an **Authorization Code** and **Description**. Click **Delete** to delete an existing code.
8. Click **OK** or **Apply**.

### Busy Lamp Field (BLF)

The Busy Lamp Field (BLF) feature allows a station in the network to monitor the call state of other stations in the network. For example, an executive assistant or “front desk” operator might be equipped with an enhanced station that offers enough line keys to adequately monitor a large set of lines in the network. When calls arrive for a user that has a line that is being monitored, the operator can easily determine if the user is busy, by looking at the lamp associated with the line key of that user, and make appropriate call routing decisions.

Note: Busy Lamp Field is a service that must be assigned to the user on Clearspan, and a key must be assigned on the user's phone for every user monitored.

1. From the main menu, select **Provisioning** and then **Users**. The Users page displays.
2. Select the **Enterprise** and **Group** from the drop-down list, if necessary.
3. Click **Search**.
4. Click the **Edit** link in the row of the user that will be allowed to monitor other users' phone status. The Advanced: User Modify page displays.
5. Select **Busy Lamp Field (BLF)** from the **Service** drop-down list. The BLF tab displays as in the following example.

### Advanced: User Modify

- Smith, Marty (Marty.Smith@marsh.aastra.com)
- Smith, Sallie (Sallie.Smith@marsh.aastra.com)
- Test, Test (Test.Test@marsh.aastra.com)
- Thompson, Corey (Corey.Thompson@marsh.aastra.com)
- Whitten, James (James.Whitten@marsh.aastra.com)
- Wilson, Arty (Arty.Wilson@marsh.aastra.com)

#### Monitored Users

- Gonzalez, Gil (Gil.Gonzalez@marsh.aastra.com)
- Marsh, Katy (Katy.Marsh@marsh.aastra.com)
- Marsh, Mylo (Mylo.Marsh@marsh.aastra.com)

**Figure 71 Advanced: User Modify Page - BLF Tab**

6. Enter the BLF List URI, i.e., 9785551003BLF@marsh.mitel.com. This name **MUST** be unique. You can choose any name, but it cannot be duplicated elsewhere in the system.
7. Click **Search** to display all users available for assignment; or, enter parameters to narrow the search.
8. Select the users that you want to be in the BLF **Monitored Users** list. You can use Shift+Click to select specific users.
9. Click **Add** to add the specific users to the list, or click **Add All** to add all users to the list of those to be monitored. Use **Remove** or **Remove All** to remove users from the list. Use **Move Up** or **Move Down** to reorder the list. The ordering dictates the order in which the BLFs will appear on the user's phone.
10. Click **OK** or **Apply**.

## Call Center Agent

The Call Center Agent tab allows you to set the Automatic Call Distribution (ACD) state and join or remove users from the ACD call center.

1. From the main menu, select **Provisioning** and then **Users**. The Users page displays.
2. Select the **Enterprise** and **Group** from the drop-down list, if necessary.
3. Click **Search**.
4. Click the **Edit** link in the row of the user that will be allowed to monitor other users' phone status. The Advanced: User Modify page displays.
5. Select **Call Center Agent** from the **Service** drop-down list. The Call Center Agent tab displays as in the following example:

**Advanced: User Modify**  
Modify an existing Clearspan user.

Enterprise: Ravipati  
 Group: Finance  
 User: Bob, test (testgroup2@labval.aastra.com)  
 Service:

(Close Tab) (Pin Tab) (Close Other Tabs)

**Call Center Agent**  
Call Center Agent provisions the user's ACD settings and all the ACDs to which the user belongs and is currently joined.

<input checked="" type="checkbox"/>	prioritybased			Priority Based		<a href="#">Remove</a>

Figure 72 Advanced: User Modify Page – Call Center Agent Tab

6. Select the agent's **Guard Timer Setting**. **Default** uses the default settings. **User** overrides the default setting for the user. The guard timer is used to provide a short interval between the time that a call ends and the time that a new call is offered to the agent. The typical setting is 2 through 5 seconds.
7. Set the **ACD State of the Agent** from the drop-down list. The agent can change the ACD state from the web portal as well as from the client.
8. Select the **Agent Threshold Profile** which should be applied to this agent. An Agent Threshold Profile is an optional set of warning thresholds configured for an agent in order to track metrics.
9. Enable **Make outgoing calls as** to configure the agent's outgoing calls setting. This setting might not be available for some call centers.
10. Select the **Agent Availability Settings** to manage the availability to receive inbound calls from the call centers. **Default** uses the default settings. **User** overrides the default setting for the user.
11. To assign the user as an agent for a call center, select the **Assign Call Center** button after choosing the call center from the drop-down list. A new row is added to the Agent's Call Centers list.
12. If required, select a **Skill Level** from the drop-down menu in the **Agent's Call Centers** list. Check **Join** to have the user join that call center. Uncheck **Join** to remove the user from that call center. Select the **Remove** link to remove the call center from the list.
13. Click **OK** or **Apply**.

## Call Center Supervisor

The Call Center Supervisor tab allows you to assign supervisors for a call center.

1. From the main menu, select **Provisioning** and then **Users**. The Users page displays.
2. Select the **Enterprise** and **Group** from the drop-down list, if necessary.
3. Click **Search**.
4. Click the **Edit** link in the row of the user that will be allowed to monitor other users' phone status. The Advanced: User Modify page displays.
5. Select **Call Center Supervisor** from the **Service** drop-down list. The Call Center Supervisor tab displays.

**Advanced: User Modify**  
Modify an existing Clearspan user.

## Call Forward

Call Forwarding allows you to forward some or all calls to a different phone number or SIP-URI, such as a home office or cell phone

**Note:** Call Forwarding is a service that must be assigned to the user on Clearspan.

1. From the main menu, select **Provisioning** and then **Users**. The Users page displays.
2. Select the **Enterprise** and **Group** from the drop-down list, if necessary.
3. Click **Search**.
4. Click the **Edit** link in the row of the user for which you want to set up call forwarding. The Advanced: User Modify page displays.

5. Select Call Forward from the Service Drop-down list. The Call Forward tab displays as in the following example.

**Advanced: User Modify**  
Modify an existing Clearspan user.

Enterprise: Marsh  
 Group: Hawkes  
 User: Relyks, Hershel (9812221005@marsh.aastra.com)  
 Service:

User	Optional	Phones	Announcements	Call Forward
(Close Tab) (Pin Tab) (Close Other Tabs)				
<p><b>Call Forward</b></p> <p>Call Forwarding allows you to forward some or all of your incoming calls to a different phone number or SIP-URI, such as your home office or cell phone. The type of forwarding (Always, Busy, No Answer, and Not Reachable) determines whether a call is forwarded and the number to which that call is forwarded. The address (phone number or SIP-URI) you forward your calls to must be permitted by your outgoing calling plan. For Call Forwarding Always, you can also make your primary phone emit a short ring burst to inform you if you are next to your phone when the call is forwarded by using the Ring Reminder. This is important when you have forgotten the service is turned on and you are at your primary phone waiting to receive calls.</p> <p><b>Always</b></p> <p>Call Forwarding Always: <input type="radio"/> On <input checked="" type="radio"/> Off</p> <p>* Forward-To Number: <input type="text" value="3555"/> (Phone Number or SIP-URI)</p> <p>Ring Reminder: <input type="checkbox"/> Play Ring Reminder when a call is forwarded</p> <p><b>Busy</b></p> <p>Call Forwarding Busy: <input type="radio"/> On <input checked="" type="radio"/> Off</p> <p>* Forward-To Number: <input type="text" value="3555"/> (Phone Number or SIP-URI)</p> <p><b>No Answer</b></p> <p>Call Forwarding No Answer: <input type="radio"/> On <input checked="" type="radio"/> Off</p> <p>* Forward-To Number: <input type="text" value="3555"/> (Phone Number or SIP-URI)</p> <p>Rings Before Forwarding: <input type="text" value="3"/> <input type="button" value="x"/></p> <p><b>Not Reachable</b></p> <p>Call Forward Not Reachable: <input type="radio"/> On <input checked="" type="radio"/> Off</p> <p>* Forward-To Number: <input type="text"/> (Phone Number or SIP-URI)</p>				

**Figure 74 Advanced: User Modify Page – Call Forward Tab**

6. Click **On** for **Call Forwarding Always** to have calls always forwarded, and enter a number or SIP-URI for the **Forward-To Number** destination. Check the **Ring Reminder** box to hear a short ring burst when the call is forwarded. This is important when users have forgotten the service is turned on and are at their primary phone waiting to receive calls.
7. Click **On** for **Call Forwarding Busy** to have calls forwarded when the primary phone is busy, and enter a number or SIP-URI for the **Forward-To Number** destination.
8. Click **On** for **Call Forwarding No Answer** to have calls forwarded when the primary phone is not answered, and enter a number or SIP-URI for the **Forward-To Number** destination. Select the **Rings Before Forwarding** to set the number of rings to occur before the call is forwarded on No Answer.

9. Click **On** for **Call Forwarding Not Reachable** to have calls forwarded when this number is not reachable, and enter a number or SIP-URI for the **Forward-To Number** destination.
10. Click **OK** or **Apply**.

## Call Forward Selective

Call Forward Selective allows you to forward specific calls matching pre-defined criteria. This feature is useful for forwarding calls from a manager, family member, or important client, or for forwarding calls during a certain time.

Note: Call Forwarding is a service that must be assigned to the user on Clearspan.

1. From the main menu, select **Provisioning** and then **Users**. The Users page displays.
2. Select the **Enterprise** and **Group** from the drop-down list, if necessary.
3. Click **Search**.
4. Click the **Edit** link in the row of the user for which you want to set up call forwarding. The Advanced: User Modify page displays.
5. Select **Call Forward Selective** from the **Service** Drop-down list.
6. Click **On** for Call Forwarding Selective to have specific calls forwarded, and enter a number or SIP-URI for the **Default Forward-To Number** destination. Check the **Ring Reminder** box to hear a short ring burst when the call is forwarded. This is important when users have forgotten the service is turned on and are at their primary phone waiting to receive calls.
7. Click **Add Forwarding Criteria** to create a new set of call forwarding criteria, or click **Edit** in the **Forwarding Criteria** table to modify or delete existing criteria. The **Forwarding Criteria** table displays the **Calls From** and **Calls To** columns. The **Calls To** criteria indicates if calls are forwarded based on the destination that was dialed.  
  
The User: Call Forwarding Selective page displays.
8. Enter a **Name/Description** for the call forwarding selective entry.
9. Choose to forward calls to the default number or another number, or choose Do Not Forward.
10. Specify the **Time Schedule** and/or **Holiday Schedule** for which to forward calls.
11. Choose to forward **All Calls** or calls from specific numbers. If you specify **Calls from the following Phone Numbers**, you can choose calls from **Private Numbers** and/or calls from **Unavailable Numbers**. You can also enter **Specific Phone Numbers** or number patterns using wildcard characters.
12. Choose the numbers from the **Available Call To Numbers** list in the **Calls To** section, and click **Add** to use the number for the Calls To criteria.
13. Click **OK**.

## Call Pickup

The Call Pickup feature allows users to answer calls received by other people within the same Call Pickup Group to which they are assigned.

Note: A Call Pickup group must be created on the Clearspan system before a user can be assigned to a group.

1. From the main menu, select **Provisioning** and then **Users**. The Users page displays.
2. Select the **Enterprise** and **Group** from the drop-down list, if necessary.
3. Click **Search**.
4. Click the **Edit** link in the row of the user for which you want to set up call pickup. The Advanced: User Modify page displays.
5. Select **Call Pickup** from the **Service** Drop-down list.
6. Select the Call Pickup Group.
7. The User's **Last Name**, **First Name**, and **User ID** display under the Call Pickup group assignment.
8. Click **OK** or **Apply**.

**Advanced: User Modify**  
Modify an existing Clearspan user.

## Call Recording

The Call Recording feature allows you to configure the recording settings for a new or existing user.

1. From the main menu, select **Provisioning** and then **Users**. The Users page displays.
2. Select the **Enterprise** and **Group** from the drop-down list, if necessary.
3. Click **Search**.
4. Click the **Edit** link in the row of the user for which you want to set up call recording. The Advanced: User Modify page displays.
5. Select **Call Recording** from the **Service** Drop-down list.

**Advanced: User Modify**  
Modify an existing Clearspan user.

Service: Call Recording

User Optional Phones Announcements **Call Recording** (Close Tab) (Pin Tab) (Close Other Tabs)

**Call Recording**  
Call Recording allows you to record calls.

Record Call: ☐ Never ☒ Always ☐ Always with Pause/Resume ☐ On Demand ☐ On Demand with User Initiated Start

Options: ☒ Play Call Recording Start/Stop Announcement ☒ Record Voice Messaging

Pause/Resume Notification: ☒ None ☐ Beep ☐ Play Announcement

Recording Notification: ☐ Repeat Record Call Warning Tone Every 15 seconds

**Figure 76 Advanced: User Modify Page – Call Recording Tab**

The **Record Call** setting determines when and how the user's calls are recorded.

6. Enable the **Play Call Recording Start/Stop Announcement** option to play an announcement when starting or stopping the recording of a call.
7. Enable the **Record Voice Messaging** option to record calls that go to Voice Mail.
8. The **Pause/Resume Notification** setting determines whether to play a beep or announcement notification when pausing or resuming the recording.
9. Enable **Repeat Record Call Warning Tone Every X seconds** to repeat a periodic warning tone to the caller to indicate that the call is being recorded. The time values range from 10 to 1800 seconds.
10. Click OK or **Apply**.

## Clearspan Anywhere

The Clearspan Anywhere feature allows you to view a list of available Clearspan Anywhere Portals, and manage the Clearspan Anywhere phone numbers.

1. From the main menu, select **Provisioning** and then **Users**. The **Users** page displays.
2. Select the **Enterprise** and **Group** from the drop-down list, if necessary.
3. Click **Search**.
4. Click the **Edit** link in the row of the user for which you want to configure the Clearspan Anywhere feature. The **Advanced: User Modify** page displays.
5. Select **Clearspan Anywhere** from the **Service** Drop-down list. The **Clearspan Anywhere** tab appears.

**Advanced: User Modify**  
Modify an existing Clearspan user.

Available Call To Numbers		Selected Call To Numbers
Alternate 1 (2148447704 / 47704)	Add > Remove < Add All >> Remove All <<	Primary (9728446702 / 6702) Alternate 2 (47705)

Figure 80 Clearspan Selective Criteria Modify page

10. Enter the Name or Description of the Selective Criteria, select a Time Schedule and/or Holiday Schedule to determine when the criteria applies.
11. The received calls that use a Selective Criteria are based on the **Calls From** settings. Select or Enter one or more of the following phone numbers to use the selective criteria:
  - Select **All Calls (from any phone number)**
  - Select **Call from the following Phone Numbers**, and select the checkbox **Private Numbers** and/or **Unavailable Numbers**
  - Enter Specific Phone Numbers (up to 12 numbers)
12. Click the **Available Call To Numbers** from the **Calls To** section, and click **Add** to add a Call To number to the **Selected Call To Numbers** list. When a received call uses the criteria, the Calls To settings determine the user's phone numbers that will use the selected criteria when called. The phone numbers in the **Available Call To Numbers** list includes the users Primary number and any configured Alternate Numbers.
13. Click **OK**.

## Fax Messaging

The Fax Messaging feature allows users to receive faxes over a dedicated phone number.

1. From the main menu, select **Provisioning** and then **Users**. The Users page displays.
2. Select the **Enterprise** and **Group** from the drop-down list, if necessary.
3. Click **Search**.
4. Click the **Edit** link in the row of the user for which you want to set up fax messaging. The Advanced: User Modify page displays.
5. Select **Fax Messaging** from the **Service** Drop-down list.
6. Check the **Enable Fax Messaging** box to enable fax messaging for this user.
7. Select a **Phone Number**. A phone number is required when Fax Messaging is enabled. The phone number is pre-selected based on the Phone Number selection rules specified in the User Profile, if one is used.
8. **Activated** or **Deactivated** indicates the current status of the phone number selected. Change this setting if necessary. Select **Activated** (Recommended) if the phone will receive fax messaging from outside the system, or **DeActivated** if fax messaging will be internal only. The Activated/Deactivated status is preselected based on the New Phone Number Activation setting specified in the User Profile, if one is used.
9. You can enter an **Extension** for Fax Messaging. This field is optional. The extension is pre-populated based on the Extension generation rules provided in the User Profile.
10. You can enter up to three optional SIP **Aliases**.
11. You can configure the user's account so that any fax message received by Voice Mail is sent to email.
  - a. Select **Voice Mail** from the **Service** Drop-down list.
  - b. Enable **Send Notification to E-mail Address** or **E-mail Carbon Copy to E-mail Address** and enter a valid email address. Any fax message received is sent to the email address listed.

**Caution: E-mail copies of Voice Mail may not be sent over secure E-mail.**

---

12. Click **OK** or **Apply**.

## Flexible Seating Guest

Flexible Seating Guests can be associated with a Flexible Seating host device, to use it as if it were their own phone. Flexible Seating Guests can be any users within the relevant Group or Enterprise who have the “Flexible Seating Guest” service assigned, and who have a primary device configured that is the same device type as the host device. While a guest is associated with it, the host phone functions like the user’s phone device, including all the key assignments and functions.

1. Complete the steps for Configuring Flexible Seating Hosts.
2. Then, from the main menu, select **Provisioning** and then **Users**. The Users page displays.
3. Select the **Enterprise** and **Group** from the drop-down list, if necessary.
4. Click **Search**.
5. Click the **Edit** link in the row of the user who will be the Flexible Seating Guest. The Advanced: User Modify page displays.
6. Select **Flexible Seating Guest** from the **Service** drop-down list.

**Advanced: User Modify**  
Modify an existing Clearspan user.

**Figure 82 Advanced: User Modify – Flexible Seating Guest Tab**

7. Select **On** to enable this user as a Flexible Seating Guest.
8. Select the **Association Limit** checkbox, and the number of hours, if you want to limit the amount of time that the association is active once activated. If an Association Limit is not configured for the guest or the host, the guest is allowed to stay logged onto the host phone indefinitely.
9. Enter an **Unlock Phone PIN Code** if entry of a code is desired at the time the user associates with the host phone using the voice portal. If used, the code must be between 4-10 characters.
10. Select the **Phone Device**. The drop down provides all primary line and SCA devices associated with this user (Mitel and Polycom phones). When you select a phone device, the **Line/Port** field populates automatically.

### Associating with a Flexible Seating Phone in OpEasy

1. In the **Associated Host** section of the Flexible Seating Guest tab of the User page, click **Search** to see all Available Hosts for this group or enterprise that are built with the device type that matches the guest phone's device type.
2. Select the desired host from the Available Hosts list and click **Associate Host**. The screen refreshes with information in the Flexible Seating Guest section no longer modifiable. The host association information is presented along with a button to Release Association.

**Advanced: User Modify**

Association Limit: 12 Hours  
Release Association

**Figure 83 Advanced: User Modify – Flexible Seating Guest Tab with Host Association**

3. To start the association, click **Apply** or **OK** to reboot the host phone, which then loads a new configuration file matching the guest user's device configuration.
4. After the new file is loaded, the host phone functions like the user's primary phone, including all the key assignments and functions of the user's primary phone device. Calls placed to the user's extension are presented to both the user's device and the host phone, and calls can be placed from the host phone.

### *Associating with a Flexible Seating Phone using the Voice Portal*

Guests can associate with a host phone using the voice portal following these steps.

1. Guests use the host phone to call into their personal voice portal using their mailbox ID and passcode.
2. After logging into their personal voice portal, guest users access the Flexible Seating menu, choose to associate with the host, and enter the Unlock Phone PIN Code if one was configured.
3. The phone reboots and loads a new configuration file matching the guest user's device configuration. While a guest is associated with it, the host phone functions like the user's primary phone, including all the key assignments and functions of the user's primary phone device. While the guest is logged onto the host phone, both the primary device and the host phone are functional and capable of making and receiving calls.
4. To release the association with the host phone, guests use the host phone to call their personal voice portal, access the Flexible Seating menu, and choose to unassociate from the host phone.

### *Unassociating a Flexible Seating Guest*

The Flexible Seating association remains in effect until one of the following occurs:

- **Release Association** is selected on the Flexible Seating Guest tab
- The Association Limit for the guest expires
- The host phone is used to call the voice portal and make menu selections to unassociate
- **Force Release Association** is selected on the Guest Association tab for the host

When the Flexible Seating association is released, the phone reboots and loads the Flexible Seating host configuration. When no guest is associated with it, the host phone can only make emergency calls or calls into the voice portal.

## Hoteling Guest

Hoteling Guest allows users to associate their configuration with a Hoteling Host user. This allows the guest user to use the host's phone device along with the guest user's configuration. This is useful for transient employees.

Note: The Hoteling Host and Hoteling Guest services must be assigned to the user on Clearspan. These are two separate services and should be assigned accordingly.

1. From the main menu, select **Provisioning** and then **Users**. The Users page displays.
2. Select the **Enterprise** and **Group** from the drop-down list, if necessary.
3. Click **Search**.
4. Click the **Edit** link in the row of the user who will be the Hoteling Guest. The Advanced: User Modify page displays.
5. Select **Hoteling Guest** from the **Service** drop-down list.
6. Click **On** to enable this user as a Hoteling Guest.

7. Choose the **Association Limit**. The default is 12 hours.
8. Search for the **Hoteling Host**. Choose the host from the list of Available Hosts.
9. Click on the **Associate Host** button. The association is made.
10. Click **Apply**. The **Saved** indication displays over the OK button. The Advanced: User Modify page displays again with the **Guest** and **Host** association displayed.
11. Click **OK**. The Users page displays.

## Hunt Group

A Hunt Group allows incoming calls to be rotated through a sub-group of users until a free line is found and the caller is connected.

1. From the main menu, select **Provisioning** and then **Users**. The Users page displays.
2. Select the **Enterprise** and **Group** from the drop-down list, if necessary.
3. Click **Search**.
4. Click the **Edit** link in the row of the user that will be allowed to monitor other users' phone status. The Advanced: User Modify page displays.
5. Select **Hunt Group** from the **Service** drop-down list. The Hunt Group tab displays.
6. Select the groups in the **Available Hunt Groups** list that should include the user. You can use Shift+Click to select specific groups.
7. Click **Add** to add the user to the selected groups, or click **Add All** to add the user to all groups. Use **Remove** or **Remove All** to remove the user from lists.
8. Click **OK** or **Apply**.

## Integrated IM&P

Integrated IM&P allows service providers to offer instant messaging, presence, buddy list, chat and telephony integration. IM&P is enabled by default for a new user when the service is assigned.

1. From the main menu, select **Provisioning** and then **Users**. The Users page displays.
2. Select the **Enterprise** and **Group** from the drop-down list, if necessary.
3. Click **Search**.
4. Click the **Edit** link in the row of the user that will be allowed to monitor other users' phone status. The Advanced: User Modify page displays.
5. Select **Integrated IM&P** from the **Service** drop-down list. The Integrated IM&P tab displays.
6. Select **On** to enable IM&P services for the user.
7. Check the **Regenerate IM&P Password** checkbox to create a new IM&P password.
8. Click **OK** or **Apply**.

## Music On Hold

The Music On Hold tab allows you to specify settings for playing music during the calls that are holding or parked on the user's phone.

1. From the main menu, select **Provisioning** and then **Users**. The Users page displays.
2. Select the **Enterprise** and **Group** from the drop-down list, if necessary.
3. Click **Search**.
4. Click the **Edit** link in the row of the user for whom you want to configure Music On Hold settings. The Advanced: User Modify page displays.
5. Select **Music On Hold** from the **Service** drop-down list.
6. Select a **Music On Hold Profile**, if a profile has been created and you want to specify those settings for this user.
7. Check the **Enable Music On Hold** box to enable music on hold for this user.
8. Select the **Music Source** for this feature. **Group** uses the music selected for the Group. **Custom Announcement** allows you to select different music for this user. If **Music Source** is set to **Custom Announcement**, specify an **Audio Announcement** or **Video Announcement** by choosing a file from an Announcement Repository. To load a new announcement file, use the Announcements tab.
9. To configure the user's music on hold to be different for internal and external calls, check the **Use Alternate Source** box and configure the Internal Calls Settings.

## Priority Alert

Priority Alert allows you to make a user's phone ring with a different ring based on pre-defined criteria. Use this service if you want to distinguish when a specific person calls such as a manager or spouse, or when a call is from inside or outside the user's group. The criteria for each Priority Alert entry can be a list of up to 12 phone numbers or digit patterns, a specified time schedule, and a specified holiday schedule. All criteria (phone number, day of week, and time of day) for an entry must be true for the phone to ring with a different tone.

1. From the main menu, select **Provisioning** and then **Users**. The Users page displays.
2. Select the **Enterprise** and **Group** from the drop-down list, if necessary.
3. Click **Search**.
4. Click the **Edit** link in the row of the user who will get priority alerts. The Advanced: User Modify page displays.
5. Select **Priority Alert** from the **Service** drop-down list.

Click **Add Priority Alert** to create a new priority alert, or click **Edit** in the **Priority Alert** table to modify or delete a priority alert. The **Priority Alert** table displays the **Calls From** and **Calls To** columns.

The User: Priority Alert page displays as shown in the following example.

**User: Priority Alert Modify**

Modify an existing priority alert entry. Specify the time schedule and/or holiday schedule you would like a priority alert to occur. You can have the priority alerting occur for all external calls or only for calls from the specified phone numbers. If you need more than 12 numbers or more distinct time or holiday periods, you can create multiple priority alert entries. \*Pressing OK or Delete retains but does not save entered changes. To save the changes, press OK or Apply on the subsequent page.

Selected Call To Numbers

**Figure 87 Priority Alert Setup Page**

6. Enter a **Name/Description** for the alert.
7. Click **On** for **Priority Alert**.
8. Specify the **Time Schedule** and/or **Holiday Schedule** for which to provide priority alerts.
9. Choose to provide alerts for **All External Calls** or calls from specific numbers. If you specify **Calls from the following Phone Numbers**, you can choose calls from **Private Numbers** and/or calls from **Unavailable Numbers**. You can also enter **Specific Phone Numbers** or number patterns using wildcard characters.
10. Choose the numbers from the **Available Call To Numbers** list in the **Calls To** section, and click **Add** to use the numbers for the Priority Alert.
11. Click **OK\***. The Priority Alert is added or changed.
12. Click **OK** or **Apply** again on the Advanced: User Modify page.

## Privacy

Privacy allows you to exclude a user from Directory listings, Auto Attendant extension and/or name dialing, and Phone Status monitoring. You can also select the users who are allowed to monitor someone's phone status.

Note: Privacy is a service that must be assigned to the user on Clearspan.

1. From the main menu, select **Provisioning** and then **Users**. The Users page displays.
2. Select the **Enterprise** and **Group** from the drop-down list, if necessary.
3. Click **Search**.
4. Click the **Edit** link in the row of the user for which to enable privacy. The Advanced: User Modify page displays.
5. Select **Privacy** from the **Service** drop-down list. The Privacy tab displays as in the following example.

**Advanced: User Modify**  
Modify an existing Clearspan user.

**Figure 88 Advanced: User Modify – Privacy Tab**

- Check the types of Privacy that you wish to enable. You can select **Enable Directory Privacy**, **Enable Auto Attendant Extension Dialing Privacy**, **Enable Auto Attendant Name Dialing Privacy**, or **Enable Phone Status Privacy** to exclude this user from those features.
- Click **Search** to display all users, or enter parameters to narrow the search of Available Users, if you want to allow certain users to monitor the phone status of this user.
- Select the users authorized to monitor the phone status when Privacy is enabled. Click **Add** to add specific users to the list, or click **Add All** to add all users to the list. Use **Remove** or **Remove All** to remove users from the list. Use **Move Up** or **Move Down** to reorder the list.
- Click **OK** or **Apply**.

## Speed Dial 8

Speed Dial 8 allows you to set up to eight speed dial numbers (2 through 9) that can be called with the push of a button. Users can press the speed code on the touchpad of the phone to call the number.

Note: Speed Dial 8 is a service that must be assigned to the user on Clearspan.

1. From the main menu, select **Provisioning** and then **Users**. The Users page displays.
2. Select the **Enterprise** and **Group** from the drop-down list, if necessary.
3. Click **Search**.
4. Click the **Edit** link in the row of the user for which to configure Speed Dial 8. The Advanced: User Modify page displays.
5. Choose **Speed Dial 8** from the **Service** drop-down list. The Speed Dial 8 tab displays.
6. If you want to assign a predefined Speed Dial 8 List to the user, select it from the **Initialize List Using** drop-down box, and click **Initialize List**. Initializing a predefined list overwrites any existing Speed Code entries.
7. If you want to assign or edit a specific Speed Code entry, enter or change the **Phone Number / SIP-URI** and a **Name/Description**. Enter a phone number as you would normally dial it.
8. Click **OK** or **Apply**.

## Speed Dial 100

Speed Dial 100 allows you to set up to 100 speed dial phone numbers or SIP-URI addresses that can be called with the push of a few buttons. Users can enter the number for a Speed Dial 100 entry as they would normally dial it and then just press the speed code prefix and speed code on the touch pad to call it.

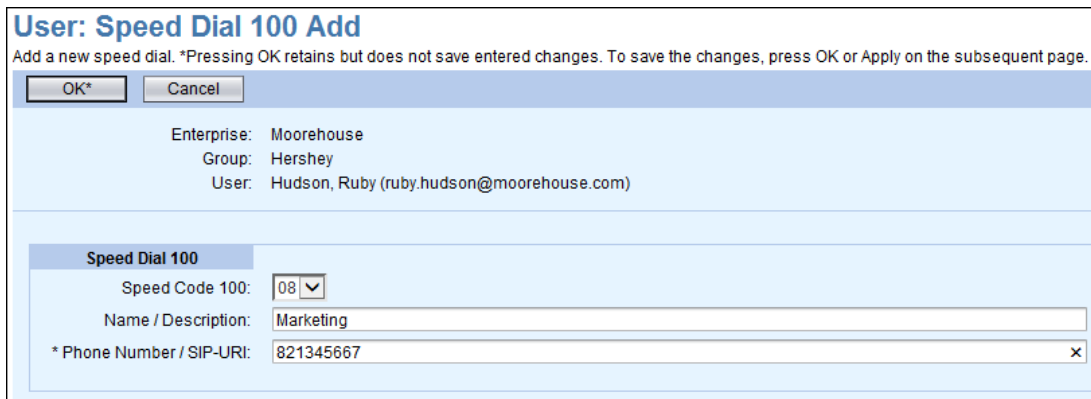

Note: Speed Dial 100 is a service that must be assigned to the user on Clearspan.

The default Dialing Prefix is # but can be changed. Be careful not to assign a #nn code that conflicts with a system feature access code.

### *Adding Speed Dial 100 Entries*

1. From the main menu, select **Provisioning** and then **Users**. The Users page displays.
2. Select the **Enterprise** and **Group** from the drop-down list, if necessary.
3. Click **Search**.
4. Click the **Edit** link in the row of the user for which to configure Speed Dial 100. The Advanced: User Modify page displays.
5. Choose **Speed Dial 100** from the **Service** drop-down list. The Speed Dial 100 tab displays.

6. If you want to assign a predefined Speed Dial 100 List to the user, select it from the **Initialize List Using** drop-down box, and click **Initialize List**. Initializing a predefined list overwrites any existing Speed Code entries.
7. If you want to assign a specific Speed Code entry, click the **Add Speed Dial 100** button. The User: Speed Dial 100 Add page displays as in the following example.

**Figure 89 User: Speed Dial 100 Add Dialog Box**

8. Choose the **Speed Code 100** number from the drop-down list.
9. Enter the **Name/Description**.
10. Enter the Speed Dial **Phone Number/SIP-URI**. Enter a phone number as you would normally dial it.
11. Click **OK\***. The Speed Dial 100 tab displays again with the new speed dial entry.
12. Click **OK** or **Apply** again.

#### *Editing or Deleting Speed Dial 100 Entries*

1. From the main menu, select **Provisioning** and then **Users**. The Users page displays.
2. Select the **Enterprise** and **Group** from the drop-down list, if necessary.
3. Click **Search**.
4. Click the **Edit** link in the row of the user for which to configure Speed Dial 100. The Advanced: User Modify page displays.
5. Choose **Speed Dial 100** from the **Service** drop-down list. The Speed Dial 100 tab displays.
6. Click the **Edit** link in the row of the Speed Dial 100 entry to modify.
7. Make any changes, or click **Delete\*** to delete the entry.
8. Click **OK\*** to return to the Speed Dial 100 tab.
9. Click **OK** or **Apply** again.

## Voice Mail

The Voice Mail tab allows modification of Voice Mail parameters. If a user has “No Voice Mail” assigned, you can add voice mail on this page, activate it, and configure it accordingly.

1. From the main menu, select **Provisioning** and then **Users**. The Users page displays.
2. Select the **Enterprise** and **Group** from the drop-down list, if necessary.
3. Click **Search**.
4. Click the **Edit** link in the row of the user for which to configure Voice Mail.
5. Select **Voice Mail** from the **Service** drop-down list.

**Figure 90 Advanced: User Modify Page – Voice Mail Tab**

6. If Voice Mail was previously enabled and saved, **Delete Voice Mailbox** and **Reset Voice Mailbox** buttons appear. **Delete Voice Mailbox** removes the voice mail account and any associated greetings without deleting the user. **Reset Voice Mailbox** deletes and rebuilds the voice mail account and deletes any associated greetings **to restore** the Voice Mail Greetings settings to defaults. These buttons also appear on the **User** tab.
7. Click the **Active** radio button, if necessary.
8. Check the **Calls Sent to Voice Mail** options that you want to set for this user.
9. Choose the **Voice Mail Server** from the drop-down list. It should be the Clearspan: Group Server.
10. Choose the **Arriving Voice Mail Action** options.
11. For **Caller Options**, select whether pressing 0 when voice mail is reached will transfer the caller to another phone number that you specify.
12. Set the **Group Mail Server** options.
13. Click **OK** or **Apply**.

## Voice Mail Distribution Lists

Voice Mail Distribution Lists allow you to create lists of numbers where you can send voice messages to many users at one time.

### *Adding Entries to Voice Mail Distribution Lists*

1. From the main menu, select **Provisioning** and then **Users**. The Users page displays.
2. Select the **Enterprise** and **Group** from the drop-down list, if necessary.
3. Click **Search**.
4. Click the **Edit** link in the row of the user for which to configure Voice Mail Distribution Lists.
5. Select **Voice Mail Distribution Lists** from the **Service** drop-down list. The Voice Mail Distribution Lists tab displays.
6. Click the **Add Distribution List** button.
7. Select the **Distribution List Number** from the drop-down list.
8. Enter a list **Description**.
9. Enter the **Phone Number/SIP-URI** entries for the list, clicking the **Add** button each time. The numbers display in the Phone Number/SIP-URIs table.
10. Click **OK**. The list is saved.
11. Click **OK** or **Apply** again.

**Advanced: User Modify**  
Modify an existing Clearspan user.

Greeting Source: System Greeting

**Unavailable Greeting Settings**  
Audio Greeting: (None)

**Figure 92 Advanced: User Modify Page – Voice Mail Greetings Tab**

6. Set **Greeting Source** to **System Greeting** to use the standard voice mail greeting played for callers when this user's phone line is busy, or set it to **Personal Greeting** if you want to select a file from the user's Announcement Repository. If you choose Personal Greeting, select the **Personal Audio Greeting** or **Personal Video Greeting** file to use.
7. In the No Answer Greeting Settings section, set the **Number of Rings** before callers are sent to Voice Mail, and select the **No Answer Greeting Type** to either Use **Extended Away Greeting** or **Use Normal No Answer Greeting**, as configured on this page.
8. To configure Extended Away Greeting Settings, select an **Audio Greeting** or **Video Greeting** file from the user's Announcement Repository. Check the **Disable Message Deposit** checkbox to prevent callers from leaving a Voice Mail message.
9. To configure Normal No Answer Greeting Settings, set the **Greeting Source** to the standard **System Greeting**, or select one of the alternate greetings configured on this page.
10. To configure Unavailable Greeting Settings, select an **Audio Greeting** or **Video Greeting** file from the user's Announcement Repository.
11. To configure an Alternate No Answer Greeting, select an **Audio Greeting** or **Video Greeting** file from the user's Announcement Repository, and enter a Name that describes the greeting.

12. Click **OK** or **Apply**.

## USER SETTINGS

You can view or modify user settings at the System, Enterprise, and Group level.

1. From the main menu, select **Provisioning** and then **Users**.
2. Click **General Settings** and then **User Settings**. The User Settings page displays.
3. Set the **Account ID** under System Settings. If it is set to **Required**, the administrator must enter an Account ID when creating or modifying a user.
4. Set the **Account ID** under Enterprise Settings. It can be **Required**, **Not Required**, or **Use System Setting**, which uses the system setting specified on this screen. This setting appears only when an Enterprise is specified.
5. Set the **Integrated IM&P** under Enterprise Settings. Setting this to **Use System Setting** uses the configuration set for the system. If you set this to **IM&P service domain**, enter the service domain in the text field that appears. This setting appears only when an Enterprise is specified.
6. Set the **Account ID** under Group Settings. It can be **Required**, **Not Required**, or **Use Enterprise Setting**, which uses the enterprise settings on this screen. This setting appears only when a Group is specified.
7. Set the **Integrated IM&P** under Group Settings. Setting this to **Use Enterprise Setting** uses the enterprise settings on this screen, If you set this to **IM&P service domain**, enter the service domain in the text field that appears. This setting appears only when a Group is specified.
8. Click **OK**.

## NEW USER E-MAIL NOTIFICATION

After a new user is created, an optional e-mail goes out to the user containing instructions for setting up the new phone. The User Profile specifies whether or not the e-mail will be sent. A DA cannot change the content of this message but can view it.

1. From the main menu, select **Provisioning** and then **Users**.
2. Click **General Settings** and then **New User E-mail Notification**. The User General Settings: New User E-mail Notification page displays.
3. Click **OK** to exit General Settings.

**User General Settings: New User E-mail Notification**

Display and modify the E-mail message that is sent to new users based on phone type. The E-mail notification typically provides instructions on phone setup.

OK Cancel Apply

Enterprise: Moorehouse -- Moore Enterprises of Texas

Phone Manufacturer: Mitel (Aastra)

**New User E-mail Message:**

Enter or modify the 'From' address, 'Subject' line, and body of the E-mail message that is to be sent to new phone users. The subject line and message body can contain any of the substitution tags (identified by {} braces) listed at the bottom of the page. When the E-mail is sent, these tags are replaced by the appropriate user-specific information.

The text between {CCDesktopStart} and {CCDesktopEnd} is sent only when the new user has a Clearspan Communicator - Desktop device configured. Similarly the text between {CCS4BStart} and {CCS4BEnd} is sent for a Clearspan Communicator - S4B device, between {CCMobileStart} and {CCMobileEnd} is sent for a Clearspan Communicator - Mobile device, and between {CCTabletStart} and {CCTabletEnd} is sent for a Clearspan Communicator - Tablet device.

Similarly, the {DMMACAddressStart} and {DMMACAddressEnd} tags surround text only sent when the user's phone device is configured using the device's MAC Address. The {DMCredentialsStart} and {DMCredentialsEnd} tags surround text only sent when the user's phone device is configured using the device's credentials (access User Name and Password).

Reset to System-Wide Default Clear

Subject: Your New Mitel (Aastra) Phone

Greetings {UserName}:  
Your organization has provided you with a new Aastra {PhoneModel} phone and the latest Unified Communications and messaging features.  
The following steps are required to install and activate your new phone:

**Figure 93 User General Settings: New User E-mail Notification**

## DELETING A USER

You can delete a user after it has been created.

1. From the main menu, select **Provisioning** and then **Users**.
2. Click **Search** to obtain the list of users.
3. Click the **Edit** link on the row of the user you wish to delete. The User Modify page displays with a Delete button.
4. Click **Delete**.

Note: If the Delete button does not appear, then you are not authorized to add or delete users.

5. Click **OK** in the confirmation dialog box.
6. If no devices are associated with the user, the user is deleted. If none of the associated devices can be deleted, only the user is deleted. All of the associated devices remain, with other users assigned.

An associated device CANNOT be deleted if:

- The device is a primary phone device of the user and that device is also a primary phone device of another user. In other words, if the primary device of this user either has no other users assigned or the only other users assigned use it as a Shared Call Appearance (SCA) and not as a primary device, the device can be deleted.
  - The device is a Shared Call Appearance of this user and has any other users assigned. In other words, any SCA device of this user that has no other assigned users can be deleted.
7. If any of the devices associated with the user can be deleted, the User Delete page is displayed. If the User Delete page is displayed, select either **User** or **User and Associated Phone Devices** for **Settings to Delete**.

**User Delete**

Delete a Clearspan user, an associated primary phone device, and any associated Clearspan Communicator devices only used by this user.

Cancel Delete

Enterprise: Moorehouse  
Group: Hershey  
User: Person, Matthew (4765552012-aastra@moorehouse.com)

**User Delete**

User: Person, Matthew (4765552012-aastra@moorehouse.com)  
Primary Phone Device: aastra67571-4765552012

Settings to Delete: User and Associated Phone Devices

**Figure 94 User Delete Page**

When **User** is selected, only the user is deleted. All of the associated devices remain, with other users assigned.

When User and Associated Phone Devices is selected:

- The user is deleted.
- The user's primary phone device, if any, is deleted but **ONLY** if that device has no other assigned primary users. Note that the device is still deleted even if it has other users assigned as long as those users are assigned as a Shared Call Appearance (SCA); the other user will be removed (unassigned) before the device is deleted.
- Before deleting the user, you can always remove (unassign) any other users, including other primary users, from the user's primary device to allow the device to be deleted.
- Any devices that the user is assigned to as a Shared Call Appearance (SCA) are deleted but **ONLY** if that device has no other assigned users.
- Before deleting the user, you can always remove (unassign) any other users from any of the devices assigned to the user to allow the SCA devices to be deleted.
- Any Clearspan Communicator device assigned to the user is deleted because Clearspan Communicators cannot have any other user assigned.

In addition, any device that the administrator deleted by editing the device and pressing the "Delete Device" button will be deleted. The "Delete Device" button is only available when the only other users on the device are SCAs (in other words, when no other user has the device as their primary device). Note that these devices are deleted independent of the "User Delete" page, which might not even be shown.

**8.** Click **Delete** on the User Delete page. The user and phone device are deleted.

Deleting a user makes available any licenses that were allocated to the user.

## VIRTUAL USERS

---

A Virtual User is a group service that has many of the characteristics of a user (e.g. User Id, Name, Phone Number, and Extension). It can be assigned services just as a normal user can be assigned services. A Virtual User does not consume an OpEasy User License or Clearspan User License by means of its existence. However, if one or more user services are assigned to a Virtual User, a Clearspan User License will be consumed.

The Virtual User types include:

- Auto Attendant
- Clearspan Anywhere Portal
- Call Center
- Collaborate Bridge
- Find Me/Follow Me
- Flexible Seating Host
- Group Paging
- Hunt Group
- Instant Group Call
- Meet-Me Conference Bridge
- Route Point
- VoiceXML

## AUTO ATTENDANTS

The Auto Attendant is like a virtual receptionist. It automatically answers and directs incoming calls to your main business number with a personalized greeting 24 hours a day, 7 days a week. The Auto Attendant provides your callers with a menu of options which they select from to connect to the right person or department. The Auto Attendant page allows you to add or change this functionality for an enterprise or group.

### Planning and Testing Auto Attendants

1. Map out your interactive menu structure.
2. Configure a time schedule for your organization's business hours and a holiday schedule for your organization's holidays.
3. Configure the addresses for the phone numbers.
4. Create an Auto Attendant account for the main menu in your structure.
5. Set up the main menu and all submenus.

6. Record custom messages using the voice portal or upload audio files using the web interface. If you enabled video support, also upload video files.
7. Call the Auto Attendant numbers to test your design.

**Tips:**

- Internal transfers require only an extension.
- First-level extension dialing and extension dialing at any time allow the user to dial an extension without having to select an option first.
- List the menu options in a predictable order.
- List the menu options that transfer to the operator last (“to reach the operator, press 0 or stay on the line”). Callers who do not press a key are transferred to the operator.

## Adding a New Auto Attendant

1. Select **Provisioning** from the main menu, and then select **Virtual Users** and **Auto Attendants**.
2. Select the **Enterprise** and **Group** from the drop-down list, if necessary.
3. Click **Add**. The Auto Attendant tab displays by default.

Note: If the Add button does not appear, then you are not authorized to add or delete virtual users.

4. If you select a service from the **Service** drop-down list, an additional Service Tab will appear. For example, if you select **Alternate Numbers**, the **Alternate Numbers** tab appears.
5. Enter a **Name** for the Auto Attendant.
6. Enter an **Auto Attendant ID** and domain.
7. Select the **Auto Attendant Type**, either **Basic** or **Standard** based on the license.
8. Select the **Department** for which to implement the Auto Attendant.
9. Select the **Phone Number** and/or **Extension** for which to implement the Auto Attendant.
10. **Activated** or **Deactivated** indicates the current status of the phone number selected. Change this setting if necessary. Select **Activated** (Recommended) if the phone will place and receive calls from outside the system, or **DeActivated** if the calls will be internal only.
11. Choose to **Enable Video Support**. This field appears only when the group has Auto Attendant - Basic Video or Auto Attendant - Standard service assigned.
12. Enter the **Voice Portal Passcode** if Voice Mail is enabled for the Auto Attendant. The passcode must be 4-8 digits in length, to be determined by the administrator.
13. For **Calling Line ID**, enter the **Last Name**, **First Name**, and **Phone Number** for the Auto Attendant.
14. Select the **Business Hours** and **Holiday Schedule** to use for the Auto Attendant.

15. Select **Enterprise**, **Group**, or **Department** as the dialing options for **Extension Dialing Scope** and **Name Dialing Scope**. Use the name and extension dialing scope controls to determine whether your Auto Attendant can direct calls to users in the same group, department, or enterprise.
16. Choose the **LastName** and **FirstName** order for **Name Dialing Order**. This setting determines whether callers are allowed to begin entering either the last name or first name of the person they want to reach, or only the last name.
17. Determine the features to enable for the Auto Attendant. Click on the **Available Service(s)** in the list on the left, and click **Add**.
18. User Defined Fields— This field is displayed only if the User Fields are defined at the Enterprise level. To change the default value of the User Defined Fields, uncheck the **Use Default** checkbox and enter the value of the User Defined Field in the **Value** box.

You can click OK at this time to save the Auto Attendant, or you can enter information in the Optional, Menus, Announcements, and Voice Mail tabs. When you click OK, the Auto Attendant is saved.

### *Optional Tab*

Click on the Optional tab of the Auto Attendant Add page to view or change optional values such as Time Zone, Language information, and Aliases used to place and receive calls.

### *Menus Tab*

1. Click on the **Menus** tab of the Auto Attendant Add page to view or change the menu selections, options, and key definitions for the Auto Attendant functionality.
2. Choose **Business Hours Menu** to configure the **Menu Selection** for business hours.
3. Select **Default Greeting** or choose a **Personal Greeting** for the **Greeting Selection**. The Personal Greeting choices come from the Auto Attendant's Announcement Repository or its Group's Announcement Repository.
4. Check **Enable First-Level Extension Dialing** if you want to enable that feature. When using First-level Extension dialing, you are not required to configure a key for extension dialing.
5. In the Menu Key Definitions section, configure a **Description**, an **Action**, and the **Action Data** for each key that you want to assign to the Auto Attendant feature.
6. Set **Menu Selection** to **After Hours Menu** if you want to configure separate options for non-business hours.
7. Set **Menu Selection** to **Holiday Menu** if you want to configure separate options for holiday hours.
8. Click **OK**.

### *Submenus Tab*

1. Click on the **Submenus** tab of the Auto Attendant Add page to view or change the submenus for the Auto Attendant functionality. This tab displays when the Auto Attendant Type is set to **Standard**.
2. Search for a Submenu to edit, or click **Add Submenu**.
3. Enter the **Submenu ID**.

4. Select **Default Greeting** or choose a **Personal Greeting** for the **Greeting Selection**. The Personal Greeting choices come from the Auto Attendant's Announcement Repository or its Group's Announcement Repository.
5. Check **Enable extension dialing at any time** if you want to enable that feature. When using extension dialing, you are not required to configure a key for extension dialing.
6. In the Submenu Key Definitions section, configure a **Description**, an **Action**, and the **Action Data** for each key that you want to assign to the Auto Attendant feature.
7. Click **OK**.

### *Announcements Tab*

OpEasy allows you to upload, delete, or configure audio or video announcement files to repositories. Announcements repositories are kept for Users, Auto Attendant and Hunt Group virtual users, and Groups. Once an announcement is saved to a repository, OpEasy allows you to assign it to Voice Mail Greetings, Auto Attendant menus, and Music On Hold. You can search, upload, rename, or delete announcements on a user's Announcements tab. You can also view announcement types, size, and usage. You can manage announcements when you create a new user or when modifying a user, as described in the section [Announcements](#).

### *Voice Mail Tab*

1. Select **Voice Mail** from the **Service** drop-down list on the Auto Attendant page to view or change the Voice Mail settings.
2. If Voice Mail was previously enabled and saved, **Delete Voice Mailbox** and **Reset Voice Mailbox** buttons appear. **Delete Voice Mailbox** removes the voice mail account and any associated greetings without deleting the Auto Attendant. **Reset Voice Mailbox** deletes and rebuilds the voice mail account and deletes any associated greetings **to restore** the Voice Mail Greetings settings to defaults.
3. Click the **Active** radio button, if necessary.
4. Check the **Calls Sent to Voice Mail** options that you want to set for the Auto Attendant.
5. Choose the **Voice Mail Server** from the drop-down list. Select Clearspan: Group Server.
6. Choose Voice Mail Management settings to determine the **Arriving Voice Mail Action** options, **Caller Options** for dialing 0 to transfer, and the action to take **After Playing Greeting**.

**Caution: E-mail copies of Voice Mail may not be sent over secure E-mail.**

---

7. Set the **Group Mail Server** options.
8. Click **Apply**, and then click **OK**.

### *Voice Mail Greetings Tab*

1. Select **Voice Mail Greetings** from the **Service** drop-down list. The Voice Mail Greetings tab allows modification of an Auto Attendant's Voice Mail Busy and No Answer greetings.
2. Set **Greeting Source** to **System Greeting** to use the standard voice mail greeting played for callers when the Auto Attendant line is busy, or set it to **Personal Greeting** if you want to select a file from the Auto Attendant's individual or group Announcement Repository. If

you choose Personal Greeting, select the **Personal Audio Greeting** or **Personal Video Greeting** file to use.

3. In the No Answer Greeting Settings section, select the **No Answer Greeting Type** to either **Use Extended Away Greeting** or **Use Normal No Answer Greeting**, as configured on this page.
4. To configure Extended Away Greeting Settings, select an **Audio Greeting** or **Video Greeting** file from the Auto Attendant's individual or group Announcement Repository. Check the **Disable Message Deposit** checkbox to prevent callers from leaving a Voice Mail message.
5. To configure Normal No Answer Greeting Settings, set the **Greeting Source** to the standard **System Greeting**, or select one of the alternate greetings configured on this page.
6. To configure Unavailable Greeting Settings, select an **Audio Greeting** or **Video Greeting** file from the Auto Attendant's individual or group Announcement Repository.
7. To configure an Alternate No Answer Greeting, select an **Audio Greeting** or **Video Greeting** file from the Auto Attendant's individual or group Announcement Repository, and enter a **Name** that describes the greeting.

#### *Alternate Numbers Tab*

1. Select **Alternate Numbers** from the **Service** drop-down list. The Alternate Numbers tab allows up to ten additional phone numbers or extensions to be assigned in addition to your primary number and extension.
2. Select the phone number from the **Phone Number** drop-down list and add an extension if available.
3. Click the **Activated** checkbox to activate the alternate phone number or extension.
4. Click **OK**.

## CONFIGURING HUNT GROUPS

You can configure Hunt Groups. A Hunt Group allows incoming calls to be rotated through a sub-group of users until a free line is found and the caller is connected.

1. From the main menu, select **Provisioning** and then **Virtual Users**.
2. Select **Hunt Groups**.
3. Select the **Enterprise** and **Group** from the drop-down list, if necessary.
4. Search for a Hunt Group to edit, or click **Add** to create a new Hunt Group.

**Note:** If the Add button does not appear, then you are not authorized to add or delete virtual users.

**Hunt Group Add**  
Add a new hunt group.

System Admin Number Field3	String	<input checked="" type="checkbox"/>	

**Figure 95 Hunt Group Page**

5. If you select a service from the **Service** drop-down list, an additional Service Tab will appear. For example, if you select **Alternate Numbers**, the **Alternate Numbers** tab appears.

6. On the Hunt Group tab, enter a **Name** and unique **Hunt Group ID** for the hunt group, and select a domain from the drop-down list.
7. Configure the **Department**, **Phone Number**, **Extension**, **Network Server Site**, and Voice Mail settings for the Hunt Group.
8. **Activated** or **Deactivated** indicates the current status of the phone number selected. Change this setting if necessary. Select **Activated** (Recommended) if the phone will place and receive calls from outside the system, or **DeActivated** if the calls will be internal only.
9. Enter the **Last Name**, **First Name**, and **Phone Number** for Calling Line ID (CLID) Settings.
10. Specify the hunt group's Calling Line ID **Handling**.
  - Select Use the system default CLID configuration to use the setting defined at the system level (displayed in parentheses).
  - Select Customize the CLID for this Hunt Group to use the setting defined on this page and check or uncheck Include the Hunt Group Name in the CLID.
11. Select the **Group Policy**.
  - Circular sends incoming calls to users according to their position in a list. After a call has been sent to the last user on the list, the next call is sent to the user at the top of the list.
  - Regular sends incoming calls to the next available user in the Hunt Group.
  - Simultaneous sends incoming calls to all user numbers at the same time. Once the call has been answered, the remaining calls to other users are released.
  - Uniform sends the current incoming call to the user who has been idle the longest. After a user has answered a call, they are moved to the bottom of the call queue.
  - Weighted Call Distribution assigns calls in a pseudo-random fashion according to their relative weight. Agents with a higher weight are assigned more incoming calls than agents with lower weights.
12. Select or unselect the **Allow Call Waiting on agents** box. When Directory Number Hunting has been assigned to a Hunt Group, you can assign Call Waiting to Hunt Group agents so that they can handle more than one call directed to them, regardless of their Call Waiting feature status.
13. Select **Enable Group Busy** to activate the group busy policy for the hunt group.
14. You can check **Allow members to control Group Busy** to give group members control over this policy.
15. Check the **Apply Group Busy When Terminating Call to Agent** box to always apply the Enable Group Busy policy when calls are made through the directory hunting number.
16. Select **Allow members to control Group Busy** to allow group members to control the hunt group's busy status.
17. Select **Skip to next agent after** to have the system pass incoming unanswered calls to the next user, determined by the current group policy, after the specified number of rings.
18. Select **Forward call after waiting** to forward calls that have not been answered by any user after the specified number of seconds to the specified phone number. This box accepts values from 0 to 7200 seconds (2 hours). Enter the **Calls Forward to** number where you want to transfer calls not answered in the time specified.
19. Select **Enable Call Forwarding Not Reachable** to forward calls to the specified phone number when all agents are not reachable.

20. Check **Make Hunt Group busy when all available agents are not reachable** to apply busy treatment to calls when all available agents are not reachable. This setting is ignored if Enable Call Forwarding Not Reachable setting is not checked.
21. Enter the **Calls Forward to** number where you want the calls to be forwarded when all agents are unreachable.
22. Use **Add** and **Remove** to select all user services required by the Hunt Group.
23. **User Defined Fields**– This field is displayed only if the User Fields are defined at the Enterprise level. To change the default value of the User Defined Fields, uncheck the **Use Default** checkbox and enter the value of the User Defined Field in the **Value** box.

### *Optional Tab*

1. On the Optional tab, configure **Time Zone** and **Language**.
2. Specify up to three additional SIP addresses as **Aliases** to associate with the group. Calls directed to any of these aliases are redirected to the assigned Hunt Group.

### *Users Tab*

On the Users tab, use Add and Remove to select Assigned Users as members of the Hunt Group.

### *Announcements Tab*

OpEasy allows you to upload, delete, or configure audio or video announcement files to repositories. Announcements repositories are kept for Users, Auto Attendant and Hunt Group virtual users, and Groups. Once an announcement is saved to a repository, OpEasy allows you to assign it to Voice Mail Greetings, Auto Attendant menus, and Music On Hold. You can search, upload, rename, or delete announcements on a user's Announcements tab. You can also view announcement types, size, and usage. You can manage announcements when you create a new user or when modifying a user, as described in the section *Announcements*.

### *Call Forward Tab*

To configure call forwarding for the Hunt Group, select Call Forward from the Service drop-down. This service allows you to forward some or all of your incoming calls to a different phone number or SIP-URI. The type of forwarding determines whether a call is forwarded and the number to which that call is forwarded.

### *Call Forward Selective Tab*

This Call Forward Selective service allows you to forward specific calls matching your pre-defined forwarding criteria to a different phone number or SIP-URI. The criteria for each forwarding criteria entry can be a list of up to 12 phone numbers or digit patterns, a specified time schedule, and a specified holiday schedule.

To configure selective call forwarding for the Hunt Group:

1. From the main menu, select **Provisioning** and then **Virtual Users**.
2. Select **Hunt Groups**.
3. Select the **Enterprise** and **Group** from the drop-down list, if necessary.

4. Search for a Hunt Group to edit, or click **Add** to create a new Hunt Group.
5. Click the **Edit** link in the row of the user for which you want to set up call forwarding. The Advanced: User Modify page displays.
6. Select **Call Forward Selective** from the **Service** Drop-down list.
7. Click **On** for Call Forwarding Selective to have specific calls forwarded, and enter a number or SIP-URI for the **Default Forward-To Number** destination. Check the **Ring Reminder** box to hear a short ring burst when the call is forwarded. This is important when users have forgotten the service is turned on and are at their primary phone waiting to receive calls.
8. Click **Add Forwarding Criteria** to create a new set of call forwarding criteria, or click **Edit** in the **Forwarding Criteria** table to modify or delete existing criteria. The **Forwarding Criteria** table displays the **Calls From** and **Calls To** columns. The **Calls To** criteria indicates if calls are forwarded based on the destination that was dialed.

The Hunt Group: Call Forwarding Selective page displays.

9. Enter a **Name/Description** for the call forwarding selective entry.
10. Choose to forward calls to the default number or another number, or choose Do Not Forward.
11. Specify the **Time Schedule** and/or **Holiday Schedule** for which to forward calls.
12. Choose to forward **All Calls** or calls from specific numbers. If you specify **Calls from the following Phone Numbers**, you can choose calls from **Private Numbers** and/or calls from **Unavailable Numbers**. You can also enter **Specific Phone Numbers** or number patterns using wildcard characters.
13. Choose the numbers from the **Available Call To Numbers** list in the **Calls To** section, and click **Add** to use the number for the Calls To criteria.
14. Click **OK**.

### *Voice Mail Tab*

1. To configure Voice Mail for the Hunt Group, select **Voice Mail** from the Service drop-down. This service allows you to record messages for calls that are not answered or for busy calls.
2. If Voice Mail was previously enabled and saved, **Delete Voice Mailbox** and **Reset Voice Mailbox** buttons appear. **Delete Voice Mailbox** removes the voice mail account and any associated greetings without deleting the Hunt Group; **Reset Voice Mailbox** deletes and rebuilds the voice mail account and deletes any associated greetings to restore the Voice Mail Greetings settings to defaults .
3. Click the **Active** radio button, if necessary.
4. Check the **Calls Sent to Voice Mail** options that you want to set for the Hunt Group.
5. Choose the **Voice Mail Server** from the drop-down list. Select Clearspan: Group Server.
6. Choose Voice Mail Management settings to determine the **Arriving Voice Mail Action** options, **Caller Options** for dialing 0 to transfer, and the action to take **After Playing Greeting**.

**Caution: E-mail copies of Voice Mail may not be sent over secure E-mail.**

7. Set the **Group Mail Server** options.
8. Click **Apply**, and then click **OK**.

### *Voice Mail Greetings Tab*

1. Select **Voice Mail Greetings** from the **Service** drop-down list. The Voice Mail Greetings tab allows modification of a Hunt Group's Voice Mail Busy and No Answer greetings.
2. Set **Greeting Source** to **System Greeting** to use the standard voice mail greeting played for callers when the Hunt Group's lines are busy, or set it to **Personal Greeting** if you want to select a file from an available Announcement Repository. If you choose Personal Greeting, select the **Personal Audio Greeting** or **Personal Video Greeting** file to use.
3. In the No Answer Greeting Settings section, select the **No Answer Greeting Type** to either Use **Extended Away Greeting** or **Use Normal No Answer Greeting**, as configured on this page.
4. To configure Extended Away Greeting Settings, select an **Audio Greeting** or **Video Greeting** file from an available Announcement Repository. Check the **Disable Message Deposit** checkbox to prevent callers from leaving a Voice Mail message.
5. To configure Normal No Answer Greeting Settings, set the **Greeting Source** to the standard **System Greeting**, or select one of the alternate greetings configured on this page.
6. To configure Unavailable Greeting Settings, select an **Audio Greeting** or **Video Greeting** file from an available Announcement Repository.
7. To configure an Alternate No Answer Greeting, select an **Audio Greeting** or **Video Greeting** file from an available Announcement Repository, and enter a **Name** that describes the greeting.
8. Click **OK** or **Apply**.

### *Alternate Numbers Tab*

1. Select **Alternate Numbers** from the **Service** drop-down list. The Alternate Numbers tab allows up to ten additional phone numbers or extensions to be assigned in addition to your primary number and extension.
2. Select the phone number from the **Phone Number** drop-down list or add an extension, and select a **Ring Pattern**.
3. Click the **Active** checkbox to activate the alternate phone number or extension.
4. Click **OK**.

## CONFIGURING FLEXIBLE SEATING HOSTS

Flexible Seating allows users to associate with a Mitel (DMS) or Polycom (DMS) host device and use it as if it were their own phone. To set up Flexible Seating, create a Flexible Seating host and then configure users with the Flexible Seating Guest service. Flexible Seating Guests can be any users within the relevant Group or Enterprise who have the "Flexible Seating Guest" service assigned, and who have a primary device configured that is the same device type as the host device. Assign the Flexible Seating Guest service to the group that will include the Flexible Seating host. For more information, refer to *Authorizing Groups to Use a Service Pack*.

Create and configure the Flexible Seating host phone, if you have not already. For more information, refer to *Under Display Selection*, check the Template Information box to include Phone Template information in the "Phone Devices" table. Check Registration Status to displays column for this additional information in the table *Adding a Phone Device*.

1. To create the Flexible Seating host, select **Provisioning**, **Virtual Users**, and **Flexible Seating Hosts**.
2. Select the **Enterprise** and **Group** from the drop-down list, if necessary.
3. Search for a Flexible Seating host to edit, or click **Add** to create a new Flexible Seating host.

Note: If the Add button does not appear, then you are not authorized to add or delete virtual users.

**Flexible Seating Host Add**  
Add a new flexible seating host.

**Authentication**

Name:   
Password:

Figure 96 Flexible Seating Host Add Page

4. On the Host tab, enter a **Name** and unique **Flexible Seating Host ID**, and select a domain from the drop-down list.
5. Configure the **Department**, **Phone Number**, and **Extension** settings for the Flexible Seating host.
6. Enter the **Last Name**, **First Name**, and **Phone Number** for Calling Line ID (CLID) Settings.
7. Select the **Routing Policies**.
  - Allow Emergency Calls permits emergency calls from this user.
  - Allow Voice Portal Calls permits voice portal calls from this user.
8. Use **Add** and **Remove** to select all user services required by the Flexible Seating host.
9. User Defined Fields– This field is displayed only if the User Fields are defined at the Enterprise level. To change the default value of the User Defined Fields, uncheck the **Use Default** checkbox and enter the value of the User Defined Field in the **Value** box.
10. Enter the **Name** and **Password** for **Authentication**.

11. The **Primary Phone Device** settings for **Device Name**, **Device Level**, **Line/Port**, **VLAN ID**, **MAC Address**, **ERL Record Name**, and **Encryption** are displayed after they are populated on the Phone Tab of the Flexible Seating Host.

### *Optional Tab*

On the Optional tab, configure **Class of Service**, **Time Zone**, and **Language**.

### *Phone Tab*

1. On the Phone Tab, use the **Phone Devices** section to select a primary phone for the host. The host phone can have multiple users, with the virtual user host as one of the primary users on the phone. Click **Add Primary Phone** to display the Flexible Seating Host: Primary Phone Device Add page. To change an existing host phone device, click **Edit**.
2. On the Flexible Seating Host: Primary Phone Device Add page, search for and select the **Phone Device** to use as the host phone. To remove a phone device currently being used by a host, click **Unassign Device**. Click **OK** or **Cancel** to return to the Flexible Seating Host page.
3. On the Phone tab, select whether to **Restart Phones on Save**.
4. In the Phone Devices table, you can view or change the associated template, or edit the primary phone device for this host.

### *Guest Association Tab*

1. On the Guest Association tab, check the **Association Limit** checkbox and enter a number for **Enforce Association Limit** if you want to set a maximum time limit for a guest to be logged into the host phone.
2. Choose **Enterprise** or **Group** for the **Access Level** to restrict availability of the host phone to all users in a group or all users in the enterprise.
3. The **Associated Guest** section shows information about any guest currently using the host phone. You can click **Force Release Association** to log the current guest off of the host phone.

### *Privacy Tab*

1. Select **Privacy** from the **Service** drop-down menu to access the Privacy tab.
2. For **Privacy Enable**, select the privacy settings for the Flexible Seating host.
  - Enable Directory Privacy excludes the host from Directory listings.
  - Enable Auto Attendant Extension Dialing Privacy excludes the host from auto extension dialing.
  - Enable Auto Attendant Name Dialing Privacy excludes the host from auto name dialing.
3. Click **OK** or **Apply**.

After you have created a Flexible Seating host, configure users with the Flexible Seating Guest service to associate with the host device.

While a guest is associated with it, the host phone functions like the user's phone device, including all the key assignments and functions. When no guest is associated with the host phone, the phone can only make emergency calls or calls into the voice portal.

## VIRTUAL USER INVENTORY

The Virtual User Inventory allows you to search and display the inventory of all virtual users in Clearspan.

1. Select **Provisioning** from the main menu, and then select **Virtual Users** and **Virtual User Inventory**.
2. Select the **Enterprise** and **Group** from the drop-down list, if necessary.
3. Click **Search** to display all virtual users, or enter search parameters to filter your search. The search in the following figure is an example of the Virtual User Inventory page.

**Virtual User Inventory**  
Choose the desired Enterprise and Group. To display a list of virtual users, press the Search button.

## IMPORT

---

The Import function allows you to Add, Modify, and Delete multiple users, devices, or features using a spreadsheet (worksheet). Import types include:

- **Advanced**—Advanced Import allows you to manipulate multiple users by spreadsheet as in Basic Import; however, it also allows you to assign features such as Call Forwarding, Busy Lamp Field, Hoteling, etc. You can perform more functions than you can using Basic Import including Auto Attendant configuration and trunk user migration.
- **Enterprise**—Enterprise Import allows you to configure Enterprise settings such as Voice VPN policies, Departments, and Phone Numbers.
- **Group**—Group Import allows you to configure group settings such as Authorization Codes, Call Pickup Groups, Departments, Phone Numbers, and User Profiles. The ManageGroups tab allows creating, modifying, and deleting Groups. It handles Import and Export of the Group profile information, authorizing and assigning the Group Services and Service Packs, Group Call Processing Policies, Password and Passcode rules for the Group, and setting up the Group Voice Portal access.

For information about the worksheet versions for each release, refer to the *OpEasy Release Notes*. For detailed information about each spreadsheet's columns and commands, as well as version differences, refer to the *Import Worksheet Definitions* guide.

The Import: Advanced page displays the number of User Licenses that are used and available. Administrators can, if desired, set the User or Polycom licensing for an enterprise to Auto, so that licenses do not have to be set and maintained manually. For more information, refer to *Configuring License Allocations*.

The Import: Advanced and Import: Group pages allow you to upload one or more Announcement Files along with your spreadsheet.

## OPENING A WORKSHEET

To add or remove users, devices, or features using import, you must first open and prepare an Excel worksheet to use.

1. In OpEasy, click **Import** from the menu tree or from the main Provisioning menu.
2. Select the **Import Type** and **Enterprise** on the Import page.
3. Click **Get Worksheet**.
4. Click **Open**. The new worksheet opens. Do not try to edit the worksheet until you have cleared all the Windows security warnings.
5. Click **Enable Editing**. The appropriate new spreadsheet opens.

## EDITING THE WORKSHEET

After you have retrieved and opened an Excel worksheet to use, fill it in with the changes you want to import.

Enterprise: Moorehouse -- Moore Enterprises of Texas											
Date:

	DeleteAllSP										
	AddCBAC										
	DeleteCBAC										
	AssignCPG										
	DeleteCPG										
	AssignHG										
	DeleteHG										
	ReorderUsers										
	Done										

Figure 101 Advanced Worksheet Commands – Users Tab

Only those rows with “Commands” entered will be processed.

If you just want to assign Hoteling, for example, you can run the spreadsheet and it will process only the commands in the Hoteling portion, if there are no other commands in the spreadsheet. You do not need to have any data in any other tab in the spreadsheet.

Each spreadsheet shows the acceptable commands for that spreadsheet.

2. Save the worksheet with a meaningful name so that you can use it in the Import process. The new worksheet is named, for example, “ClearspanAdvancedImport\_<your username>.xlsx”.

It is helpful to save your spreadsheets and keep the data in the spreadsheet. For example, you can keep your user lists in the Users tab, and as long as there are no commands to execute, the list remains and you keep your data. This applies to all tabs of the spreadsheet.

Note: All users must have the appropriate services assigned to them in Clearspan.

## IMPORTING THE WORKSHEET

The Import page allows you to set up Worksheet processing and view results.

1. In OpEasy, click **Import** in the menu tree or click **Import** on the menu page.
2. Select **Import Type** drop-down list.

User Licenses (Enterprise):	
Used:	8
Available:	Auto

Polycom Phone Licenses (Enterprise):	
Used:	None
Available:	Auto

**Figure 102 Import Advanced Completed Successfully**

3. Select the **Enterprise** from the drop-down list, if needed. You cannot select a group.
4. Browse to the filename of the **Provisioning Spreadsheet** that you wish to run. As a reminder, the **Spreadsheet Version** that is required is displayed on the Import page.
5. If you are importing **Announcement Files** to upload to an Announcement Repository, browse to the file to upload. If you are uploading multiple files, use a zip file.
6. Check the **Notification** check box to have an E-Mail notification sent to you with processing results.
7. Check the **Attach Excel Spreadsheet** box if you wish to receive the results spreadsheet.

8. Enter the **Attachment File Name** in the text box, or keep the default. The system will rename the results file for you. You can also use the suggested tags in the filename that are listed below the text box.
9. Enter the **Retrieve File Name** or keep the default. The system will rename the results file for you. You can also use the suggested tags in the filename.
10. Click **Start Import**. Worksheet processing starts and the **Progress Messages** box is updated to reflect the text **"Import waiting to start..."**.

Note: A User License is required for each added or modified user, and a Polycom Phone License is required for each added or modified Polycom phone. The import aborts on a line where a license could not be obtained. You can restart the import after adding the appropriate number and type of licenses to the Enterprise.

11. Click **Refresh** while processing is active to get status updates. The "Import Advanced completed successfully" message displays.

## VIEWING IMPORT RESULTS

After the import has processed, a message such as *"Successful: Import Advanced completed successfully"* displays at the bottom of the Import page.

1. Click **Retrieve Results**.
2. Click **Open**. An Excel spreadsheet with a filename similar to "ClearspanImportAdvancedResults\_443\_20150911-094209.xlsm" opens.

## EXPORT

---

The Export function allows you to obtain information on users and features from the Clearspan system database. The information is presented in Excel spreadsheets created by the system. Advanced, System, Enterprise, and Group exports are supported; there is no option to export data for Basic Import.

Using the Exported Worksheets checklist, you can export one or more spreadsheets at the same time. If you run more than one at one time, a separate tab is created in the Results spreadsheet for each of the features that you chose.

The Enter Search Criteria section of the page allows you to be selective in the data you choose to obtain. You can search by a specific field and use the plus sign  to add criteria.

### Exporting User Defined Fields

Select the **UserDefinedField** checkbox in the Advanced export page to export the User Defined Field Values for Users and Auto Attendants, or select the **UserDefinedField** checkbox in the Group Export page to export the User Defined Fields for Hunt Groups and Flexible Seating Hosts.

The following search criteria can be used to refine the export results:

#### Advanced Export:

User Defined Field Name

#### Group Export:

- User Defined Field: User ID.
- User Defined Field: Field Name
- User Defined Field: Include Unsupported User Types

If no search criteria is selected in the Enter Search Criteria section, the User Defined Fields of all Users and all Auto Attendants in the Enterprise or Group are exported.

If any of the User tabs (checkboxes) are selected in the Advanced Export page, or User search criteria is selected, and the AutoAttendant tab or Auto Attendant search criteria are not selected, then only the User Defined Fields for Users are exported.

**Notes:**

- The User checkboxes include all the available checkboxes except AutoAttendant, MediaPackReport, DeviceTypeConversion, and tabs shared between Users and Auto Attendants, such as Announcements, Voicemail, and UserDefinedFields.
- The AutoAttendant search criteria include AutoAttendant ID, AutoAttendant Name, and AutoAttendant Type.
- The User search criteria include all the search criteria except Group ID, Department, Extension (primary and alternate), Phone Number (primary and alternate) and the Auto Attendant search criteria.

### Export Clearspan Data

Export clearspan data into a spreadsheet.  
Press 'Start Export' to begin export processing. To schedule an export for later processing, press 'Schedule Export'.  
Press 'Retrieve Results' to download results of the current export. Press 'E-mail Results' to E-mail results of the current export.

OK    Scheduling

## SELECTING DATA TO EXPORT

Advanced, System, Enterprise, and Group data can be exported. However, Group Administrators cannot export Enterprise data, and Department Administrators can export Advanced data only.

1. In OpEasy, click **Export** from the menu tree or from the main Provisioning menu.
2. Select the **Export Type** and **Enterprise** from the drop-down lists.
3. Check the type of information desired in the **Exported Worksheets** checklist.
4. Check the **Notification** check box to have an E-Mail notification sent to you with processing results.
5. Check the **Attach Excel Spreadsheet** box if you wish to receive the results spreadsheet.
6. Enter the **Attachment File Name** in the text box or keep the default. The system will rename the results file for you. You can also use the suggested tags in the filename.
7. Enter the **Retrieve File Name** or keep the default. The system will rename the results file for you. You can also use the suggested tags in the filename.
8. Enter the **Search Criteria**.
9. Click **Start Export**.
10. Click **Refresh** to get status updates on processing. When the process is complete, a message such as *Export Advanced completed successfully* will display.

Figure 105 Export Clearspan Data – Advanced Export Complete

## VIEWING THE EXPORT RESULTS

Click Retrieve Results. The spreadsheet opens. On each tab, the Command options display so that you can process the spreadsheet using the Import function to make changes if necessary.

### Notes:

The following Advanced Export fields are not exported, the rows with the fields will remain blank in the Advanced Export worksheet:

- Users tab | Auth Password
- Voicemail tab | Mail Server Password
- SCA tab | Device Access Password

The following Group Export fields that contain passwords or passcodes are not exported, the rows with the fields will remain blank in the Group Export worksheet:

- Flex Seating Hosts
- Global Settings - Mitel Aastra
- Global Settings - Panasonic
- Global Settings - Polycom
- HG Voicemail
- User Profiles
- Voice Portals

## SCHEDULING AN IMPORT OR EXPORT

You can schedule an Import or Export to happen at a later time or on a recurring basis. The Scheduling page displays imports and exports that have already been scheduled to run.

1. From the OpEasy main menu, select **Provisioning**, and then select **Import** or **Export**.
2. Configure the Import or Export information that you want to use.
3. Click **Schedule Import** or **Schedule Export**. The Scheduling Request page opens.

Note: Do not use the Start Import or Start Export button until you have provided the Schedule information.

### Scheduling Request: Import: Advanced

Setup a request to run an Import: Advanced on a pre-defined schedule.

OK Cancel

#### Scheduling Request

Scheduled Task: Import: Advanced

Request ID:

Creating OpEasy Admin: vmoore.ea

Request Creation Time:

Enterprise: Moorehouse -- Moore Enterprises of Texas

Import Spreadsheet: C:\Users\vmoores\US\Desktop\CleaspanImportAdvanced\_Moorehouse.xlsx

Start Import

#### Schedule

Schedule: Run Once

Start Time: 02/27/2017 09:17 (Date and time, in 'MM/DD/YYYY HH:MM' format. Example: 11/19/2012 21:00)

#### E-mail Notification

Success: ☐ E-mail notification of successful completion:

To:

From: No-Reply@tb20ems1.us.aastra.com

Subject: Cleaspan Import: Advanced

☒ Attach Excel Spreadsheet:

File Name: CleaspanImportAdvancedResults\_{Id}\_{Time}.xlsx

Failure: ☐ E-mail notification of failure:

To:

From: No-Reply@tb20ems1.us.aastra.com

Subject: Cleaspan Import: Advanced FAILED

☒ Attach Excel Spreadsheet:

File Name: CleaspanImportAdvancedResults\_{Id}\_{Time}.xlsx

Tags useful in the Subject and attachment File Name fields for both Success and Failure:  
{Id}, {Enterprise}, {Group}, {Department}, {RunCount}, {Time}, {StartTime}, {EndTime}, {Admin}

Figure 112 Scheduling Request: Import: Advanced

4. Select the **Schedule** type from the Schedule drop-down menu.

The screenshot shows a configuration window with a 'Schedule' tab. A dropdown menu is open, showing options: Run Once, Repeated, Hourly, Daily, Weekly, and Monthly. The 'Start Time' field is set to ':29'. Below the dropdown, there is a section for 'E-mail Notification' with a checkbox for 'Success' and a label 'E-mail notification of successful completion:'.

**Figure 113 Selecting the Schedule Type**

If you selected Run Once:

- Enter the Start Time: The date, a space, and the time (hour and minute). The Import or Export runs only one time.

The screenshot shows the 'Schedule' configuration window with 'Run Once' selected in the dropdown menu. The 'Start Time' field is set to '09/17/2013 10:16'. A note indicates the format: '(Date and time, in 'MM/DD/YYYY HH:MM' format. Example: 11/19/2012 21:00)'.

**Figure 114 Schedule Run Once**

If you selected Repeated:

- Enter the Initial Start Time: The date, a space, and the time (hour and minute).
- Enter the Repeat Run: The Import or Export runs every (number of minutes).
- Enter the Maximum Number of Runs. Leave the box blank or enter 0 if there is no limit.

The screenshot shows the 'Schedule' configuration window with 'Repeated' selected in the dropdown menu. The 'Initial Start Time' is set to '09/19/2013 15:30'. The '\* Repeat Run' is set to 'Every 60 (minutes)'. The 'Maximum Number of Runs' is set to '30'. A note indicates the format: '(Date and time, in 'MM/DD/YYYY HH:MM' format. Example: 11/19/2012 21:00)'.

**Figure 115 Schedule Repeated**

If you selected Hourly:

- Enter the Start After time: The date, a space, and the time (hour and minute).
- Enter an Hourly Schedule: A list of minutes within the hour. Example: 00:15, 00:45. The Import or Export runs at 15 minutes, and another at 45 minutes.
- Enter the Maximum Number of Runs. Leave the box blank or enter 0 if there is no limit.

Schedule	
Schedule:	Hourly <input type="button" value="v"/>
Start After:	09/19/20 22:00 (Date and time, in 'MM/DD/YYYY HH:MM' format. Example: 11/19/2012 21:00)
* Hourly Schedule:	00:15,00:45 (List of minutes in the hour, in '00:MM' format, separated by commas. Example: 00:15, 00:45)
Maximum Number of Runs:	<input type="text"/> (Blank or 0 for no limit)

- Enter the Monthly Schedule. See the following example.
- Enter the Maximum Number of Runs. Leave the box blank or enter 0 if there is no limit.

**Schedule**

Schedule: Monthly

Start After: 06/13/2016 10:05 (Date and time, in 'MM/DD/YYYY HH:MM' format. Example: 11/19/2012 21:00)

\* Monthly Schedule: Months:

☒ January ☒ February ☒ March ☒ April ☒ May ☒ June

☒ July ☒ August ☒ September ☒ October ☒ November ☒ December

on the following days of each month:

1, 12, Last

at the following times of the day:

08:00, 17:00, 23:30

(List of times, in 'HH:MM' format, separated by commas or blanks. Example: 03:00, 21:30)

Maximum Number of Runs:  (Blank or 0 for no limit)

**Figure 119 Schedule Monthly**

5. Set up E-mail Notification parameters. E-mails are sent to the E-mail address associated with your OpEasy Admin login. For Imports or Exports that are successful and not successful, select whether to send an E-mail notification, specify the **From** address and **Subject**, and select whether to attach a spreadsheet. See Figure 120 for an example.

**E-mail Notification**

Success: ☒ E-mail notification of successful completion:

To: bev.marsh@aastra.com

From: OpEasy@tb20ems1.us.aastra.com

Subject: Clearspan Import: Basic

☒ Attach Excel Spreadsheet:

File Name: ClearspanImportBasicResults\_{Enterprise}\_{Admin}\_{Time}.xlsm

Failure: ☒ E-mail notification of failure:

To: bev.marsh@aastra.com

From: OpEasy@tb20ems1.us.aastra.com

Subject: Clearspan Import: Basic FAILED

☒ Attach Excel Spreadsheet:

File Name: ClearspanImportBasicResults\_{Enterprise}\_{Admin}\_{Time}.xlsm

Tags useful in the Subject and attachment File Name fields for both Success and Failure:

{Id}, {Enterprise}, {Group}, {Department}, {RunCount}, {Time}, {StartTime}, {EndTime}, {Admin}

**Figure 120 E-mail Notification Section - Setup**

6. Click the **Start Import** or **Start Export** button. The import or export will complete on schedule.

After you click Start, the screen refreshes and includes a Status section containing the current status of the Import.

- Click Stop to stop the schedule.

- Click OK to save changes to the schedule and exit the page.
- Click Cancel to discard the changes and exit the page.
- Click Apply to save changes to the schedule.
- Click Delete to delete the schedule.

## VIEWING SCHEDULED IMPORTS AND EXPORTS

The Scheduling page displays imports and exports that have been scheduled to run now or on a pre-defined schedule. You can also delete a schedule on this page.

1. Click on **Provisioning** and then **Scheduling** in the menu tree, or click on the **Scheduling** button on the Import page. The Scheduling page displays with the Scheduling Requests of the Administrator. You can select (All Enterprises) in the Enterprise drop-down box to display the scheduled imports and exports of all enterprises.
2. Select the **Scheduled Task** from the drop-down list. This filters the list of schedules.

The following example illustrates a scheduled worksheet import that has not yet started.

## ENTERPRISE SETTINGS

---

The Enterprise Settings pages allow you to configure the departments in an Enterprise, add or change the phone numbers assigned to an Enterprise, and configure Service Packs within an Enterprise.

### ADDING ENTERPRISE DEPARTMENTS

You can use Enterprise Settings to add new departments for an Enterprise.

1. From the main menu, select **Provisioning** and then **Enterprise Settings**.
2. Select **Departments**.
3. Select the **Enterprise** from the drop-down list.
4. Click **Add**. The Enterprise Departments Add page displays.
5. Enter a **Department Name** and **Parent Department**.
6. Click **OK**.

### MODIFYING OR DELETING ENTERPRISE DEPARTMENTS

1. From the main menu, select **Provisioning** and then **Enterprise Settings**.
2. Select **Departments**.
3. Select the **Enterprise** from the drop-down list.
4. Click **Search** to display all Departments, or enter search parameters to filter your search.
5. Click the **Edit** link at the end of the row for any Department you want to edit. The Department Modify page displays.
6. Click **Delete** to delete the Department, or make any desired changes and click **OK**.

### SELECTING THE AVAILABLE DEVICE TYPES FOR AN ENTERPRISE

You can limit the list of device types available in an enterprise. Then only those device types appear in menus when creating a device, displaying or modifying Phone Templates, selecting Phone Manufacturer for Global Settings, etc.

Removing a device type from the list prevents access to any existing phone templates for that device type, even if they are in use by existing phone devices. It is best to remove any existing phone devices and templates before removing the associated device type from an enterprise.

1. From the main menu, select **Provisioning** and then **Enterprise Settings**.
2. Select **Device Types**. The Enterprise Device Types page displays.
3. Select the **Enterprise** from the drop-down list. If you have administrator access to more than one enterprise, you can select **(Multiple Enterprises)** to add or remove device types for more than one enterprise at a time.

4. If you selected one enterprise,

- To remove device types from the enterprise, move them to Available Device Types.
- To add device types for use by the enterprise, move them to Enterprise Device Types.

**Enterprise Device Types**  
Identify the device types that can be used by an enterprise.

Enterprise: Moorehouse -- Moore Enterprises of Texas

**Enterprise Device Types**

Move to the "Enterprise Device Types" list all device types that are to be used by the enterprise. These device types will appear in Device Type selection prompts. Likewise, move to the "Available Device Types" list any device types that are no longer to be used by the enterprise. These device types will NOT appear in Device Type selection prompts.

**NOTE:** Removing a device type from the "Enterprise Device Types" list for an enterprise prevents access to any existing Phone Templates for that device type. Furthermore, those Phone Templates may be in use by existing phone devices. It is best to remove any existing phone devices and Phone Templates before removing a device type from an enterprise.

6. Click **OK**.

## CONFIGURING CUSTOM DEVICE TYPE TAGS FOR AN ENTERPRISE

You can add, modify, and delete custom tags for devices of a specified device type in a selected enterprise. A tag can be created for any device type supported by OpEasy and any other device type for Mitel (Aastra) and Polycom phones even though those device types are not supported by OpEasy.

1. From the main menu, select **Provisioning** and then **Enterprise**.
2. Select **Device Type Tags**.
3. Select the **Enterprise** from the drop-down list, if necessary. If you have administrator access to more than one Enterprise, you can select **(Multiple Enterprises)** to add or remove device types for more than one Enterprise at a time.
4. Select the **Device Type**.
5. Click **Add** to add a new tag, or click **Edit** at the end of the row for any tag you want to edit. The Enterprise Device Type Tag page displays.
6. Enter a **Tag Name** and **Tag Value**, change the **Tag Value**, or click **Delete** to remove the custom tag.
7. Click **OK**.

## ADDING ENTERPRISE MUSIC ON HOLD PROFILES

You can use Enterprise Settings to add new Music On Hold (MOH) profiles for groups, departments, and users in the Enterprise. If no user MOH settings are configured, group MOH settings are used; if no group MOH settings are configured, enterprise MOH settings are used. MOH profiles are available to Solution Resellers, but not to Enterprise, Group, or Department Administrators. The Music On Hold service must be assigned.

1. From the main menu, select **Provisioning** and then **Enterprise Settings**.
2. Select **Music On Hold (MOH) Profiles**.
3. Select the **Enterprise** from the drop-down list, and then select **Profile Type**.
4. Click **Add**. The Music On Hold Profile Add page displays.
5. Enter a **Name** and **Description**. The name must be 1-80 characters. The description is optional.
6. Follow these steps if a Group profile type is being added:
  - a. Choose the types of calls to **Enable music during**. Music On Hold can be enabled for calls on hold, parked calls, and busy camped-on calls.
  - b. Select a **Preferred Audio Codec** and **Music Source**.
  - c. For External Device Settings, select a device if **Music Source** is set to **External Device**.
  - d. Enter the Line Port, Port Number, and SIP Contact of the external device.
7. Follow these steps if a User profile type is being added:
  - a. Enable or disable **Music on Hold**.
  - b. Select a **Music Source**.
8. Enter an **Announcement Name** and a value for **Load Audio/Video File** if you chose to add a custom announcement.
9. To configure the group's music on hold to be different for internal and external calls, check the **Use Alternate Source** box and configure the Internal Calls Settings.
10. Click **OK**.

## MODIFYING OR DELETING ENTERPRISE MOH PROFILES

1. From the main menu, select **Provisioning** and then **Enterprise Settings**.
2. Select **Music On Hold (MOH) Profiles**.
3. Select the **Enterprise** from the drop-down list and **Profile Type**.
4. Click the **Edit** link at the end of the row for any profile you want to edit. The Music On Hold Profile Modify page displays.
5. Make changes to the profile, or click **Delete** to delete the profile.
6. Click **Initialize Group/Department Settings** to update selected Music On Hold settings for the selected groups/departments to be updated based on the contents of the Music On Hold profile being edited.
7. Click **OK**.

## CONFIGURING CUSTOM DEVICE TYPE TAGS

You can add, modify, and delete custom tags for devices of a specified device type in the selected groups of an Enterprise.

1. From the main menu, select **Provisioning** and then **Enterprise**.
2. Select **Device Type Tags**.
3. Select the **Enterprise** from the drop-down list, if necessary.
4. Select the **Device Type**.
5. Click **Add** to add a new tag, or click **Edit** at the end of the row for any tag you want to edit. If there are several tag values for one tag name (in multiple groups), the "Multiple Values" hyperlink appears, which you can click to see the list, and then click **Edit**.

The Enterprise Device Type Tags page displays.

6. Enter a **Tag Name** and **Tag Value**, change the **Tag Value**, or click **Delete** to remove the custom tag.
7. Click Add or Remove to choose the **Assigned Groups** for the enterprise device type tags.
8. Click **OK**.

## ADDING PHONE NUMBERS TO AN ENTERPRISE

You can use Enterprise Settings to add phone numbers assigned to an Enterprise.

1. From the main menu, select **Provisioning** and then **Enterprise Settings**.
2. Select **Phone Numbers**.
3. Select the **Enterprise** and **Group** from the drop-down lists.
4. Click **Add**. The Enterprise Phone Number Add page displays.
5. Select a group from the **Assign to Group** drop-box, and choose whether to activate the phone numbers.
6. Enter the ranges of phone numbers to add to the Enterprise.
7. Click **OK**.

## VIEWING OR MODIFYING THE ENTERPRISE PHONE NUMBERS

1. From the main menu, select **Provisioning** and then **Enterprise Settings**.
2. Select **Phone Numbers**. The Enterprise Phone Numbers page displays.
3. Select the **Enterprise** and **Group** from the drop-down lists.
4. Click the **Include Enterprise Phone Numbers When Selecting a Phone Number for a User** checkbox, if you want to include enterprise phone numbers in the list of available phone numbers that are to be selected when provisioning users, auto attendants, or hunt groups.

When this checkbox is selected, the phone numbers that are assigned to the enterprise (but not to a group) are included in the phone number selection list appended with “(Enterprise)” to indicate that the phone number is not currently assigned to the group. When an enterprise phone number is selected for a user, and the user information is saved, the phone number is automatically assigned to the appropriate group.

5. Choose how to display **Phone Number Ranges**:
  - **Displayed by Group**: When this checkbox is enabled, the display expands to show the group to which each phone number or range is assigned; the Group column is empty if the phone numbers or ranges are only assigned to the Enterprise. When this checkbox is not enabled, “(Multiple)” is displayed in the Group column if phone numbers in the range are assigned to different groups or are assigned to the Enterprise. Uncheck this box if you want to see ranges of phones numbers in the Enterprise, without regard to the group assignments.
  - **Displayed by Assigned to User**: When this checkbox is enabled, the display expands to show whether each phone number or range has users assigned. When this checkbox is disabled, “+” is displayed in the Assigned to User column if some phone numbers in the range are assigned to a user while others are not. Uncheck this box if you want to see ranges of phones numbers in the Enterprise, without regard to user assignments.
  - **Displayed by Activated**: When this checkbox is enabled, the display expands to show whether phone numbers have been activated. When this checkbox is disabled, “+” is displayed in the Activated column if some phone numbers in the range have been activated while others have not. Uncheck this box if you want to see ranges of

phones numbers in the Enterprise, without regard to whether they have been activated.

6. To edit a phone number range, click the **Edit** link at the end of the row for any phone number range you want to edit. The Enterprise Phone Number Modify page displays with the Enterprise, Phone Number and the group assigned. Click **Activated** or **Deactivated** to activate or deactivate the phone number and click **OK**.
7. Click **OK** again to save the changes.

## ADDING A SERVICE PACK

You can use Enterprise Settings to create Service Packs for an Enterprise, choosing which features to include and specifying a name for the pack.

1. From the main menu, select **Provisioning** and then **Enterprise Settings**.
2. Select **Service Packs**.
3. Select the **Enterprise** and **Group** from the drop-down lists.
4. Click **Add**. The Service Pack Add page displays.

You can also search for an existing Service Pack and click the Copy link to create a new Service Pack based on that one, and then modify it.

**Figure 128 Service Pack Add Page**

5. Enter a Service Pack Name and Service Pack Description.
6. Check the **Available for Use** checkbox when the Service Pack is ready for use.
7. Use the **Add** and **Remove** buttons to select the features to include in the pack.
8. Click **OK**.

## MODIFYING OR DELETING A SERVICE PACK

1. From the main menu, select **Provisioning** and then **Enterprise Settings**.
2. Select **Service Packs**.
3. Select the **Enterprise** and **Group** from the drop-down lists.
4. Click **Search** to display all Service Packs, or enter search parameters to filter your search.
5. Click the **Edit** link at the end of the row for any Service Pack you want to edit. The Service Pack Modify page displays.

**Figure 129 Service Pack Modify Page**

6. Click **Delete** to delete the Service Pack, or make any desired changes and click **OK**.

## AUTHORIZING GROUPS TO USE A SERVICE PACK

1. From the main menu, select **Provisioning** and then **Enterprise Settings**.
2. Select **Service Packs**.
3. Select the **Enterprise** and **Group** from the drop-down lists.
4. Click **Search** to display all Service Packs, or enter search parameters to filter your search.
5. Click the **Authorize** link on the row for any Service Pack you want to authorize. The Service Pack Group Authorization page displays.
6. Select the checkboxes next to each group that you want to authorize for this Service Pack.
7. Click **OK**.

## GROUP SETTINGS

---

The Group Settings pages allow you to use custom tags for devices in a group, redirect calls within a group during specified time periods, and manage phone directory servers for an enterprise or group.

### ADDING OR DELETING GROUP ANNOUNCEMENTS

OpEasy allows you to upload, delete, or configure audio or video announcement files to repositories. Announcements repositories are kept for Users, Auto Attendant and Hunt Group virtual users, and Groups. Once an announcement is saved to a repository, OpEasy allows you to assign it to Voice Mail Greetings, Auto Attendant menus, and Music On Hold. You can search, upload, rename, or delete announcements for a group on the Group Announcement Repository page. You can also use this page to view announcement types, size, and usage.

1. From the main menu, select **Provisioning** and then **Group**.
2. Select **Announcement Repository**.
3. Select the **Enterprise** and **Group** from the drop-down list, if necessary.
  - To upload a new file, click **Add**. Enter an Announcement Name, and click **Browse** to choose the audio or video file to upload. Supported file types include WAV, WMA, MOV, or 3GP. Click **OK**. The new announcement appears in the Announcements list.
  - To rename or replace an announcement, search for the announcement. Search results appear in the list at the bottom of the page. Click **Edit** on the row of the announcement you want to modify. Make any desired changes on the Group Announcement Modify page, and then click **OK**.
  - To delete an announcement, select it in the search results list and click **Delete Selected Announcements**, or click **Delete** on the Group Announcement Modify page. You cannot delete announcements that are in use.
4. Click **OK**.

### ADDING OR DELETING GROUP AUTHORIZATION CODES

You can add, modify, or delete group authorization codes.

1. From the main menu, select **Provisioning** and then **Group**.
2. Select **Authorization Codes**.
3. Select the **Enterprise** and **Group** from the drop-down list, if necessary.
4. Click **Add** to add a new group-level Communication Barring Authorization Code, or click **Delete** at the end of the row for any code you want to remove.
5. Click **OK**.

## CONFIGURING CALL PICKUP GROUPS

You can configure the call pickup to enable users to answer any ringing line in their call pickup group.

1. From the main menu, select **Provisioning** and then **Group**.
2. Select **Group Call Pickup**.
3. Select the **Enterprise** and **Group** from the drop-down list, if necessary.
4. Click **Add** to add a new group, or click **Edit** at the end of the row for any group you want to edit.
5. Select a name for the group, and configure the group by adding or removing users. You can also click **Delete** to remove the group.
6. Click **OK**.

## CONFIGURING GROUP DEPARTMENTS

You can configure the departments in a group.

1. From the main menu, select **Provisioning** and then **Group**.
2. Select **Group Departments**.
3. Select the **Enterprise** and **Group** from the drop-down list, if necessary.
4. Click **Add** to add a new department, or click **Edit** at the end of the row for any department you want to edit. You can also click **Edit** and then **Delete** if you want to remove the department.
5. Enter a **Department Name**.
6. Configure the **Department Calling Line ID Name** and **Department Calling Line ID Number**, if desired.
7. Click **OK**.

## CONFIGURING CUSTOM DEVICE TYPE TAGS FOR A GROUP

You can add, modify, and delete custom tags for devices of a specified device type in a selected group.

1. From the main menu, select **Provisioning** and then **Group**.
2. Select **Group Device Type Tags**.
3. Select the **Enterprise** and **Group** from the drop-down list, if necessary.
4. Select the **Device Type**.
5. Click **Add** to add a new tag, or click **Edit** at the end of the row for any tag you want to edit. The Group Device Type Tags page displays.
6. Enter a **Tag Name** and **Tag Value**, change the **Tag Value**, or click **Delete** to remove the custom tag.
7. Click **OK**.

## CONFIGURING MUSIC ON HOLD (MOH) FOR A GROUP

You can use Group Settings to add new Music On Hold profiles for groups or departments within a group. If no user MOH settings are configured, group MOH settings are used; if no group MOH settings are configured, enterprise MOH settings are used. MOH profiles are available to Solution Resellers, but not to Enterprise, Group, or Department Administrators. The Music On Hold service must be assigned.

1. From the main menu, select **Provisioning** and then **Group**.
2. Select **Music On Hold**.
3. Select the **Enterprise** and **Group** from the drop-down list, if necessary.
4. Search for a Music On Hold Type to edit, or click **Add** to create a new Music On Hold Type.
5. Select a **Music On Hold Profile** if you want to base these group settings on an existing enterprise-level MOH profile.
6. Choose the types of calls to **Enable music during**. Music On Hold can be enabled for calls on hold, parked calls, and busy camped-on calls.
7. Select a **Preferred Audio Codec** and **Music Source**.
8. For External Device Settings, select a device if **Music Source** is set to **External Device**. Enter the Line Port, Port Number, and SIP Contact of the external device.
9. If **Music Source** is set to **Custom Announcement**, select an **Audio Announcement** or **Video Announcement** from the Group Announcement Repository.
10. To configure the group's music on hold to be different for internal and external calls, check the **Use Alternate Source** box and configure the Internal Calls Settings.
11. Click **OK**.

## CONFIGURING NIGHT FORWARDING

You can redirect calls placed to a user within the group to a specified phone number or SIP-URI. You can configure the redirection manually by enabling the feature, or you can configure it to be automatic by choosing a specific schedule. The Night Forwarding feature must be authorized for the group.

1. From the main menu, select **Provisioning** and then **Group**.
2. Select **Group Night Forwarding**.
3. Select the **Enterprise** and **Group** from the drop-down list, if necessary.
4. Set **Group Night Forwarding** to **On** to enable this feature manually, or set it to **Scheduled** to choose specific **Business Hours** or a **Holiday Schedule** during which to forward calls made to this group.
5. Enter the Forward-To Number.
6. Click **OK** or **Apply**.

## CONFIGURING PHONE DIRECTORY MANAGEMENT

Phone Directory Management allows management of Lightweight Directory Access Protocol (LDAP) phone directories for enterprises and groups. There can be one directory for all of an enterprise or a different directory for each group. This configuration supports the LDAP lookup key on the phone.

### Adding a Phone Directory Server

1. From the main menu, select **Provisioning** and then **Group**.
2. Select **Phone Directory Management**.
3. Select the **Enterprise** and **Group** from the drop-down list, if necessary.
4. Choose to **Use one directory for the enterprise (all groups)**, or to **Use a separate directory for each group**.
5. Click **Apply**. Click **OK**.
6. Click **Add** to add a phone directory when *Use a separate directory for each group* is selected. The Phone Directory Management Add page displays.
7. Check the **Enabled** box.
8. Enter the Server URI, Server RootDN, Server UserId, and Server Password.
9. Choose whether the Query will **Remove Extensions from Results**, and select whether to **Disable Workphone Search**.
10. The **Field Mapping** section displays default values, but you can change any of the following if desired: Last Name Field, First Name Field, Work Phone Field, Home Phone Field, Cell Phone Field, ID Field, Sort Field, Append Field, Additional Search Field.
11. Click **OK**. The Phone Directory Management page displays with the new LDAP setup.

### Testing LDAP

1. Use Phone Templates to add an LDAP Lookup button to a template.

2. Assign the template to a phone.
3. Press the LDAP button on the phone.
4. The Directory Lookup message should display.
5. Perform lookups to test the searches.

### Editing a Phone Directory Server

1. From the main menu, select **Provisioning** and then **Group**.
2. Select **Phone Directory Management**.
3. Select the **Enterprise** and **Group** from the drop-down list, if necessary.
4. Click on the **Edit** link in the first column or last column of the display. The Phone Directory Modify page displays. You can modify any of the columns.
5. Click **OK** or **Apply**.

### Deleting a Phone Directory Server

1. From the main menu, select **Provisioning** and then **Group**.
2. Select **Phone Directory Management**.
3. Select the **Enterprise** and **Group** from the drop-down list, if necessary.
4. Click on the **Edit** link in the first column or the **Edit** link in the last column of the display. The Phone Directory Modify page displays.
5. Click the **Delete** button. The delete warning dialog box displays.
6. Click **OK**. The server is deleted.

## VIEWING OR ASSIGNING GROUP PHONE NUMBERS

1. From the main menu, select **Provisioning** and then **Group Settings**.
2. Select **Phone Numbers**.
3. Select the **Enterprise** and **Group** from the drop-down lists.
4. Choose how to display **Phone Number Ranges**:
  - **Displayed by Assigned to User:** When this checkbox is enabled, the display expands to show whether each phone number or range has users assigned. When this checkbox is disabled, "+" is displayed in the Assigned to User column if some phone numbers in the range are assigned to a user while others are not. Uncheck this box if you want to see ranges of phones numbers in the Group, without regard to user assignments.

- **Displayed by Activated:** When this checkbox is enabled, the display expands to show whether phone numbers have been activated. When this checkbox is disabled, “+” is displayed in the Activated column if some phone numbers in the range have been activated while others have not. Uncheck this box if you want to see ranges of phones numbers in the Group, without regard to whether they have been activated.
5. You can use the **Displayed by Assigned to User** or **Displayed by Activated** checkboxes to change how the phone numbers are displayed.
  6. To edit a phone number range, click the **Edit** link at the end of the row for any phone number range you want to edit. The Group Phone Number Modify page displays. Make any desired changes and click **OK**.
  7. Click **OK** again to save the changes.

## ASSIGNING PHONE NUMBERS TO A GROUP

You can use Group Settings to manage phone numbers assigned to a Group.

1. From the main menu, select **Provisioning** and then **Group Settings**.
2. Select **Phone Numbers**.
3. Select the **Enterprise** and **Group** from the drop-down lists.
4. Click **Assign**. The Group Phone Number Assign page displays.
5. Choose whether to activate the phone numbers.
6. Choose **Available Ranges** and click **Add** to make them **Available Phone Numbers**. Then choose from the available numbers and click **Add** to make them **Selected Phone Numbers** for assigning to the Group.
7. Click **OK**.

## CONFIGURING A PREDEFINED SPEED DIAL 8 LIST

You can use Group Settings to configure a predefined Speed Dial 8 list that can be assigned to users.

1. From the main menu, select **Provisioning** and then **Group Settings**.
2. Select **Speed Dial 8 Lists**.
3. Select the **Enterprise** and **Group** from the drop-down lists.
4. Click **Add**. The Group Speed Dial 8 List Add page displays.
5. Enter a **Name** for the Speed Dial List, which is required and can be up to 80 characters long.
6. Optionally, you can enter a **Description** up to 300 characters long.
7. Enter a **Phone Number/SIP-URI** for each Speed Code you want to define. Enter a phone number as you would normally dial it.
8. Click **OK**.

## CONFIGURING A PREDEFINED SPEED DIAL 100 LIST

You can use Group Settings to configure a predefined Speed Dial 100 list that can be assigned to users.

1. From the main menu, select **Provisioning** and then **Group Settings**.
2. Select **Speed Dial 100 Lists**.
3. Select the **Enterprise** and **Group** from the drop-down lists.
4. Click **Add**. The Group Speed Dial 100 List Add page displays.
5. Enter a **Name** for the Speed Dial List, which is required and can be up to 80 characters long.
6. Optionally, you can enter a **Description** up to 300 characters long.
7. Click **Add Speed Dial 100**. The Group Speed Dial 100 Entry Add page displays.
8. Select the **Speed Code 100** number that you want to define, and enter a **Name/Description** and **Phone Number/SIP-URI**. Enter a phone number as you would normally dial it.
9. Click **OK**.

## ASSIGNING PREDEFINED SPEED DIAL LISTS TO USERS

After a Speed Dial 8 or Speed Dial 100 List has been defined, you can use Group Settings to assign the Speed Dial list to selected users.

1. From the main menu, select **Provisioning** and then **Group Settings**.
2. Select the type of predefined list that you want to assign to users: **Speed Dial 8 Lists** or **Speed Dial 100 Lists**.
3. Select the **Enterprise** and **Group** from the drop-down lists.
4. Click **Edit** on the row of the Speed Dial List that you want to assign to users.

5. On the Group Speed Dial List Modify page, click **Initialize User Speed Dial Settings**.
6. On the Group Speed Dial List: Initialize User Settings page, search for users, and then select the checkbox for each user to which you want to assign the Speed Dial List.
7. Click **Initialize Selected Users**.
8. Click **OK**.

## CONFIGURING VIRTUAL EXTENSIONS

You can use Group Settings to configure virtual on-net extensions for an Enterprise.

1. From the main menu, select **Provisioning** and then **Group Settings**.
2. Select **Virtual Extensions**.
3. Select the **Enterprise** and **Group** from the drop-down lists.
4. Search for a Virtual Extension to edit, or click **Add** to create a new Hunt Group.
5. Click **Add**. The Virtual On-Net Enterprise Extension Add page displays.
6. Enter an **External Phone Number**, a valid phone number not already in use by another Virtual On-Net User or assigned to a user in the Enterprise.
7. Enter a valid **Extension** not already in use by another Virtual On-Net User or assigned to a user in the Enterprise.
8. Enter a valid **Last Name** and **First Name** for the directory. Enter a **Calling Line ID Last Name** and **Calling Line ID First Name** for displaying the name in internal calls.
9. Select a **Virtual On-Net Call Type** from the list of system-defined types.
10. Click **OK**.

# ADMINISTRATIVE TOOLS

---

## MANAGING OPEASY LICENSES

### Licensing Allocation for Users and Polycom Phones

OpEasy tracks the maximum number of users and Polycom phones that administrators are allowed to manage using OpEasy. Solution Reseller administrators can allocate the system user licenses and Polycom phone licenses to their Enterprises as needed. If an administrator attempts to add or modify users or Polycom phones beyond the set number of licenses, OpEasy aborts the operation and displays an error message.

Note: If any Group in Clearspan has user limit set to less than 100, OpEasy automatically sets it to 5000, the maximum number of users for a group. This prevents errors when adding users in OpEasy.

### Configuring License Allocations

System Administrators and Solution Resellers who have full access to licensing privileges can use the OpEasy Licensing page to allocate OpEasy Licenses for both users and Polycom phones to the various Enterprises.

1. From the main menu, select **Administrative Tools** and then **Licensing** and **OpEasy License Allocation**.

The OpEasy License Allocation page displays. It shows the total number of OpEasy user and Polycom phone licenses, as well as how many are unallocated. **Total Available** is the total number of unused and available OpEasy licenses (User or Polycom Phone), including any licenses manually allocated to one or more enterprises but that have not been used by those enterprises. **Available for Auto** is the number of unused and available OpEasy licenses (User or Polycom Phone) but does NOT include any unused and available licenses that are manually allocated to one or more enterprises. **Available for Auto** identifies the number of OpEasy licenses that can be used by an Enterprise setup for automatic ("Auto") allocation, which cannot and does not include any available licenses reserved for other Enterprises through the use of Manual allocation.

2. In the Enterprise Allocations table, set **User Licenses Allocation** to **Auto** or **Manual** for each Enterprise. Auto ensures that the license allocation always matches the total phones provisioned for proper support, and each time a new phone is added, the allocation is increased unless system licenses have been exhausted.

Note: If Polycom Premium Support is selected for an Enterprise, the Polycom license allocation is always set to Auto.

For any Enterprise using Manual license allocation, set the number of Allocated user and Polycom phone licenses for each Enterprise. The number of Available licenses updates when you click Refresh. The Clearspan User Count and Clearspan Polycom Phone Count columns show the total number of licensed users and Polycom phones within Clearspan for that Enterprise.

3. Click **OK** or **Apply**.

**OpEasy License Allocation**  
Manage the allocation of OpEasy licenses to enterprises.

Total OpEasy User Licenses: 20,000    Total Available: 18,449    Available for Auto: 18,045  
 Total OpEasy Polycom Phone Licenses: 5,000    Total Available: 4,850    Available for Auto: 4,777

(Note: <System Level> is a special set of licenses for System Level Polycom devices.)

**OpEasy License Allocation to Each Enterprise**

Enterprise ID	Enterprise Name	Remove Non-Existent Enterprise	User Licenses: Allocation	Allocated	Available	Polycom Premium Support	Polycom License Allocation

Figure 130 OpEasy Licensing Page

## MANAGING UNIQUE IDS

OpEasy allows you to assign IDs at the System, Enterprise, and Group levels that are prepended to an extension for use as a unique Auto Install Device ID. If a user is built as Extension Only or the User Profile rule for MAC Address uses something other than Phone Number, the Unique ID is used.

1. From the main menu, select **Administrative Tools** and then **Unique ID Management**. The Unique ID Management page displays with a default Unique ID Length of 4 digits and a default Unique ID Position that is before the extension.
2. Select a **System Unique ID**, a unique ID for a System-level device.

Enterprise ID	Enterprise Name	Enterprise Unique ID	Edit
Aastra Training	Training Department		Edit
AastraCanada			Edit
Application Development			Edit
Auto	Disabled		Edit

Jayawanth	Jayawanth		Edit

**Figure 131 OpEasy Unique ID Management Page**

3. Click the **Edit** link to select an **Enterprise Unique ID** on the Unique ID Management: Enterprise page.
4. On the Unique ID Management: Enterprise page, click the **Edit** link to select a **Group Unique ID** on the Unique ID Management: Group page.
5. Click **OK**.

**Note:** If the System, Enterprise or Group has no assigned Unique ID, then the **Select first available Unique ID** hyperlink appears. Click the hyperlink to select the first available Unique ID.

## LOGIN MANAGEMENT

Login Management allows OpEasy administrators to manage subordinate administrator accounts. Login management is available to all levels of administrator except Department Administrator. Login Management allows you to perform the following tasks:

- Search for subordinate OpEasy administrators
- Add or delete subordinate OpEasy administrators
- Disable OpEasy administrator accounts
- Change OpEasy administrator passwords
- Modify OpEasy administrator email addresses
- Change the level of an OpEasy administrator account
- Customize OpEasy administrator privileges
- Identify OpEasy administrator accounts as Mitel Support Administrators
- View OpEasy administrator accounts by
  - All accounts
  - Mitel Support Administrators only
  - Administrator status (i.e. Active, Logged-In, Logged-Out, Locked or Disabled)

## ADDING OR MODIFYING AN ADMINISTRATOR ACCOUNT

1. From the main menu, select **Login Management**.

The OpEasy Login Management page displays. You can filter the list using the options at the top of the screen. You can sort the results using the sort buttons at the top of each column.

Login Management										
Display, add, or modify OpEasy administrators.

Select Department: ☒ Select All

Daniels (Group)

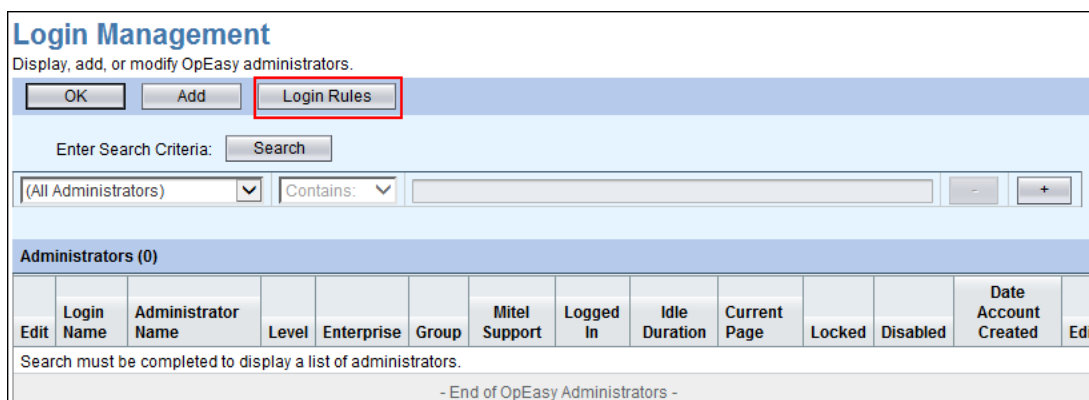

**Figure 133 OpEasy Administrator Modify Page**

3. Enter or change the **Administrator Name**. This is typically the actual name of the administrator rather than the login name, which is often shorter or different than the administrator's name.
4. Enter a **Password** for the administrator account. The following default password rules apply, although they can be changed by advanced administrators:
  - At least one upper case character
  - At least one lower case character
  - At least one non-alphanumeric character
  - Minimum password length of eight characters
  - Cannot be the reverse of the previous password
5. Enable **Change Password at Next Login** if you want this administrator to be required to change the account password at the next login.
6. Enter the administrator's **E-mail Address**.
7. You can check the **Disable Account** setting to disable this administrator's account without deleting it.
8. Set the administrator's **Login Level**.

9. Enable **Must Login only using Single Sign-On (SSO)** to prohibit the administrator from logging in directly to OpEasy.
10. Choose selections for **Mitel Support Administrator**, **Clearspan Pilot Program Administrator**, **Enterprise**, **Group**, and **Department**, if those settings are configurable for this administrator.
11. Click **Customize Privileges** if you want to change the privileges for this administrator.
12. Click **OK** or **Apply**.

## MODIFYING ADMINISTRATOR LOGIN RULES

1. From the main menu, select **Login Management**.
2. Click **Login Rules**.

**Login Management**  
Display, add, or modify OpEasy administrators.

OK Add **Login Rules**

Enter Search Criteria: Search

## COMMON TASKS

---

This section provides instructions for common administrator tasks that involve management of Clearspan phones.

A *Clearspan device* is what is created via OpEasy or via the Clearspan web portal, which defines the characteristics of a phone device such as the user of the phone, its template, etc. The Clearspan device can exist without association to a physical phone. The *physical phone* is the actual terminal that is assigned a MAC address. The physical phone must have an associated Clearspan device in order to make the phone functional on Clearspan. These instructions assume the following:

- Device Management is used to manage the configuration of the Clearspan device.
- DHCP is used to provide an IP address to the phone and the network path to the Clearspan XSP server, where the phone's configuration is obtained.

### SET UP A NEW PHONE FOR A NEW USER

Follow these steps to set up a new phone for a new user.

1. Power up and connect the phone to the network.
2. Factory default the phone.
3. Perform phone specific installation.

#### Setting Up a New Mitel (Aastra) Phone

Near the end of the startup process, an Auto Install page appears and the user is prompted for the Device ID. Enter the Auto Install Device ID set for the Clearspan device and press the button labeled "Done".

A confirmation screen appears containing the name of the user of the phone device identified by the Device ID. If that information is for the correct Clearspan device, press "OK".

Auto Install creates device credentials for the phone and updates the Clearspan device with both the MAC address of the phone and the new device credentials. Auto Install then restarts the phone to complete the install process.

## Setting Up a New Polycom Phone

1. After the startup process completes, the 'QSetup' button appears on the phone.
2. Press the 'QSetup' button and at the 'Server User' and 'Server Pwd' prompts, enter the Device Access Username and Password respectively.

Note: The Device Access Username is available via OpEasy Phone Management but the Device Access Password is blanked out. If you are unsure of the current password, enter a new password using Phone Management so that you are assured the password you enter in the phone matches the one defined for the Clearspan device.

3. Confirm the changes when prompted and the phone restarts.
4. Once the restart completes, the phone is ready for use.

## REPLACE A PHYSICAL PHONE WITH A DIFFERENT TYPE OF PHONE

Follow these steps to replace a physical phone with a phone of a different type.

1. Using OpEasy, navigate to **Provisioning | Users**, and modify the user associated with the device you want to replace.
2. From the User Modify page, select the **Phones** tab and click **Edit** for the device that is to be replaced.
3. The User: Primary Phone Device Modify page displays. The current Phone Device appears in the drop down box. From this page, either click the **Unassign** button to disassociate the user from this phone device, or click the **Delete** button disassociate the user from this phone and also delete the phone device.
4. Click **OK** to unassign the user from the device. The Advanced: User Modify page display, and the list of Phone Devices no longer includes the Primary phone type.
5. Click to **Add Primary Phone**.
6. The User: Primary Phone Device Add page displays. The Phone Device field defaults to (New Phone Device).
  - If you wish to build a new device, take this default and supply the Device Name, Device Level, Device Type, Template and MAC Address of the new phone.
  - If you have previously created a phone device that you choose to use for this user, rather than taking the default of (New Phone Device), use the drop down box to find the desired phone. Note that the Device Level, Device Type, Template and MAC Address should be populated because this device was previously created.
7. Once all fields for the new device are set as desired, click **OK** twice. The Advanced: User Modify page displays. Note that the new primary phone device appears in the Phone Devices list.
8. Click **OK** on this page to implement the change.

9. Power down and remove the original phone from the network, and put the new phone in its place. Because the new phone's MAC Address was provided at the time the device was created, the phone should be functional immediately after the reboot process.
10. If the original device was only unassigned and you have no further use for it, delete it via Provisioning | Phone Management.

## DISASSOCIATE A CLEARSPAN DEVICE FROM A PHYSICAL PHONE

To remove a physical phone from its associated Clearspan device, removing the MAC Address of the physical phone from the Clearspan device definition, follow these steps.

- If using the OpEasy User Interface:
  1. Navigate to Provisioning | Phone Management and find the device that is to be disassociated.
  2. Clear the MAC Address field for that device.
  3. Save the change.
- If using the OpEasy Advanced Import worksheet, from the User worksheet:
  1. For the device or devices that are to be disassociated, use the "ModifyDevice" command.
  2. Enter the text "null" in the MAC Address column(s).
  3. Import the worksheet using Advanced Import to affect the changes.

## REUSE A CLEARSPAN USER / DEVICE AND RESET VOICEMAIL

You might want to assign a set of phones to a new set of users, and reset the related Voicemail boxes, such as with phones placed in college dormitories. Follow these recommended steps to re-use the Clearspan users/devices and refresh the Voicemail boxes.

### Close User Accounts

1. Perform an export of the existing users/devices via the Advanced Export function, including the Users and Voicemail worksheets.
2. If the phone numbers are to be inactive during the interim period, use the Users worksheet to modify each user's **Phone Number Activation** setting to 'deactivate'.
3. If the phone numbers are not deactivated, use the Voicemail worksheet to modify each user's **Active** column to 'false', which completely disables voicemail for the user.

## Re-open User Accounts

1. Perform an export of the existing users/devices via the Advanced Export function, including the Users and Voicemail worksheets.
2. Use the Users worksheet to modify each user to both:
  - a. Set the **Last Name**, **First Name**, **Calling LineId Last Name** and **Calling LineId First Name** for the new user (if the names are customized to each user).
  - b. Set each user's **Phone Number Activation** column to 'activate'.
3. Use the Voicemail worksheet to modify each user to both:
  - a. Set the **Active** column to 'True', which allows Voicemail functionality.
  - b. Reset the user mailbox by entering 'reset' in the **SurgeMail Account** column. The reset command rebuilds the mailbox, so entry of the 'Mail Server Email Address', 'Mail Server User Id' and 'Mail Server Password' is also required.

## APPENDIX A: OPEASY SETUP FOR POLYCOM PHONES

---

The following settings must be configured within OpEasy prior to installing Polycom phones at users' desks, as described in the following sections:

- Polycom Phone Support – Support for Polycom phones requires a system license to be installed.
- User Profiles – One or more User Profiles must be created for each type of Polycom phone so that the administrator can build Polycom phones for provisioning.
- Phone Templates
  - Key Definitions – In addition to the Polycom standard soft keys, some OpEasy-configured soft keys may be assigned to Polycom phones.
  - Global Settings – System, Enterprise, and Group level settings must be configured for Polycom phones.
  - Definitions – One or more templates must be created for each type of Polycom phone.

**Note:** For new settings added to Templates and Global Settings, the '(Unspecified)' selection option or text value is displayed. The '(Unspecified)' value indicates no value has ever been set, causing OpEasy to NOT generate configuration file fields for that new OpEasy setting. As such, any existing Global Extra Settings for that configuration file field continue to be used.

However, once a setting has been changed to an actual value (replacing the '(Unspecified)' value), then OpEasy generates configuration file fields for that setting from then on. These actual values then override any Global Extra Settings for that field. Once a value is selected to replace the '(Unspecified)' value, the '(Unspecified)' value is no longer an option.

- User General Settings – The E-mail message sent to new Polycom phone users will be different from the message sent to Mitel (Aastra) phone users.
- Users – Users must be created with a supported Polycom phone.
- Phone Management – Polycom phones can be added or modified under the Phone Management page of Provisioning.

### POLYCOM PHONE SUPPORT

The Polycom Phone Support system license for Clearspan must be purchased and installed.

Furthermore, if Enterprise Licensing is in use, Polycom Phone Support must be licensed within the appropriate Enterprises for the level of administrators that will be configuring Polycom phones, which is typically every administrator level (Solution Reseller, Enterprise Administrator, Group Administrator, and Department Administrator).

## USER PROFILES FOR POLYCOM PHONES

In order to allow administrators to quickly set up users with Polycom phones, one or more User Profiles should be created for each type of Polycom phone that will be used. When creating a User Profile, the administrator selects one of the supported Polycom phones as the Device Type. The selected type of Polycom phone will be created as the primary phone device for the new user.

## PHONE TEMPLATES FOR POLYCOM PHONES

### Key Definitions for Polycom Phones

The OpEasy soft keys are configured on the Key Definitions page for provisioning Phone Templates. Key Definitions are typically accessible by system administrators only, as they affect keys system wide.

When Polycom is selected as the Phone Manufacturer on the Key Definitions page, definitions specific to Polycom phones are displayed

**Key Definitions**

**Figure 136 Key Definitions for Polycom Phones**

In addition, soft keys can be created to dial Clearspan feature codes or specific numbers. To define a new key, select an Enterprise on the Key Definitions page and click Add. Enter the following in the Key Definition fields.

## FIELD

## SETTING

Label	Enter the label of the new key, as it is to appear on the displayed soft key.
Value	Enter the actions to take for the soft key as executed by the Polycom phone. May include references to Polycom prompts or macros. This value must conform to the Polycom macro definitions, explained in the <i>Polycom UC Software Administrator's Guide</i> .
Idle/Active/Alerting / Proceeding /Dial Tone /Setup / Hold	Select the phone states in which this soft key should appear.

*Polycom Prompts*

From the Key Definitions page for Polycom Phones, click Polycom Prompts to view user input prompts for Polycom key actions. The prompts can be included in a key definition by using syntax "\$P(PromptName)Nn\$", where "PromptName" is the Prompt Name on the Polycom Prompt Definitions page, and "n" is the number of characters to collect.

Prompt Text is the text that appears on the phone's display, Input Type specifies whether the expected response is Numeric or Text, and the Visible checkbox indicates whether the response is visible on the phone's display or is shown as asterisks.

**Polycom Prompt Definitions**

Display and configure user input prompts for Polycom key actions. The prompts below may be included in a key definition by using syntax "\$P(PromptName)N2\$" where "PromptName" is from the below "Prompt Name" column (and "2" means collect 2 characters).

OK Cancel Apply Add Copy System Prompts

**Key Definitions**

Prompt Name	Prompt Text	Input Type	Visible	Delete
ParkNum	Park#	Numeric	<input type="checkbox"/>	Delete
Test2	Test22	Numeric	<input checked="" type="checkbox"/>	Delete

**Figure 137 Polycom Prompt Definitions Page**

For more information about Polycom user prompts, refer to the *Polycom UC Software Administrator's Guide*.

*Polycom Macros*

From the Key Definitions page for Polycom Phones, click Polycom Macros to view and configure definitions for Polycom key macros. The key macros can be included in key definitions using syntax "\$MName\$" where "Name" is the unique Name defined on the Polycom Macro Definitions page. Label is the text string that appears on any text entry screen, and Action contains the functionality to execute. This action must conform to the Polycom macro definitions, explained in the *Polycom UC Software Administrator's Guide*.

**Polycom Macro Definitions**

Display and configure definitions for Polycom key macros. The key macros can be included in key definitions using with syntax "\$MName\$" where "Name" is defined in the Name column below.

## System, Enterprise, and Group Global Settings for Polycom Phones

To configure global Polycom phone settings, choose Phone Templates from the Provisioning menu, and then select Global Settings and select Polycom as the Phone Manufacturer. The common global settings for Polycom phones are shown on the General Settings tab and described in the following table.

FIELD	SETTING
<b>SIP Settings</b>	
Outbound Proxy	Enter the hostname or IP address of the outbound proxy server used by the Polycom phones.
Outbound Proxy Port (No Encryption)	Enter the port number for the outbound proxy server used by the Polycom phones when encryption is not used by Polycom phones. The port number may be 0, 5060, or another port.
Outbound Proxy Port (Encryption)	Enter the port number for the outbound proxy server used by the Polycom phones when encryption is used by Polycom phones.
Encryption (TLS/SRTP)	Select the setting for encryption. Encryption is available on VVX models only.
<b>Time Settings</b>	
Time Server	Enter the hostname or IP address of a timer server.
Time Zone	Select the time zone that the phones are in.
<b>Device Settings</b>	
Network Discovery	Check the CDP Enabled field if CDP is supported by the network, which is normal.
LAN Port Mode	Select the LAN speed, normally Auto. The other options include 10 Mbps Half-Duplex, 10 Mbps Full-Duplex, 100 Mbps Half-Duplex, 100 Mbps Full-Duplex, 1000 Mbps Full-Duplex.
Admin Password	Enter a password that is entered into the phone to access the advanced settings within the phone.

FIELD	SETTING
User Password	Enter a password that is entered into the phone to access the user settings within the phone.
<b>Voice Codecs</b>	
Voice Codec #1 to #4	Identify the voice codecs that the Polycom phone is to use when placing or receiving calls. The codecs are in priority order, with codec #1 as the highest priority codec to codec #4 as the lowest priority codec.
<b>Quality Monitoring</b>	
Quality Monitoring Enable	Choose whether periodic and/or session quality monitoring is used.
Collector Server Address	Enter the hostname or IP address of the server to which quality monitoring messages are sent by the phone.
Collector Server Port	Enter the port to use on the collector server. The port number defaults to 5060.
Outbound Proxy	Enter the Quality Monitoring outbound proxy FQDN / IP Address. When configured, this parameter directs SIP messages related to voice quality monitoring to a separate proxy.
Outbound Proxy Port	Enter the Quality Monitoring outbound proxy port used in with the Quality Monitoring outbound proxy.
Periodic Monitor Period	Enter period (in seconds) used for Periodic Monitoring. The valid values are 5-90 seconds. The default value is 90 seconds.
<b>SoundPointIP Settings</b>	
'Welcome' Audio File	Enter the address and/or name of the audio file played to a SoundPoint IP phone.
<b>General Settings</b>	
Conference Server	Select the conference server to use for conference calls.
Firmware Server	Text field that contains the location of the firmware to be loaded.

## System, Enterprise, and Group Extra Settings for Polycom Phones

To enter extra settings that are to be applied to all Polycom phones within the scope of the level, choose Phone Templates from the Provisioning menu, and then select Global Settings. The extra settings must exist for the Polycom phones and are in an XML format, as are all Polycom phone settings.

The screenshot shows the 'Global Configuration File Settings' window. At the top, there's a title bar with 'Global Configuration File Settings' and a subtitle: 'Display and change the global Clearspan settings for a selected Phone Manufacturer. After being saved, the change occurs at the next resync or reboot of the affected phones'. Below the subtitle are four buttons: 'OK', 'Cancel', 'Apply', and 'Initialize MAC Address Capture'. The main area has three dropdown menus: 'Enterprise' (selected: 'Moorehouse -- Moore Enterprises of Texas'), 'Group' (selected: 'Hershey'), and 'Phone Manufacturer' (selected: 'Polycom'). Below these are four tabs: 'General Settings', 'Extra Settings' (which is active), 'Dial Plan', and 'Custom Rings'. Under the 'Extra Settings' tab, there's a 'Group Extra Settings' section with a large text area for XML input, a 'Browse...' button, and an 'Upload Group File' button. At the bottom, there's an 'Enterprise Extra Settings' section with another large text area.

**Figure 139 Global Settings for Polycom Phones**

## System, Enterprise, and Group System Configuration File Extension Settings for Polycom Phones

The Device Type for each Polycom phone model includes a **sys.cfg** file that contains system-wide configuration settings used in the configuration files for all Polycom phones of that phone model. These settings can be extended by choosing **Phone Template** from the **Provisioning** menu, selecting **Global Settings** and selecting **Polycom** as the Phone Manufacturer, clicking on the **System Config File Extension** tab, and entering the additional settings on that tab. The additional settings must be in an XML format as are all Polycom configuration settings.

Note that the sys.cfg file and the settings on the System Config File Extension tab have lower-priority than ALL other Global Settings (including Global Extra Settings) and Template Settings. However, the System Config File Extension tab settings have higher-priority than the settings in the sys.cfg file being extended.

The screenshot shows the 'Global Configuration File Settings' interface. At the top, there are buttons for 'OK', 'Cancel', 'Apply', and 'Initialize MAC Address Capture'. Below these are dropdown menus for 'Enterprise' (Moorehouse -- Moore Enterprises of Texas), 'Group' (Hershey), and 'Phone Manufacturer' (Polycom). A tabbed interface at the bottom includes 'General Settings', 'Extra Settings', 'System Config File Extension' (which is selected), 'Dial Plan', and 'Custom Rings'. The 'System Config File Extension' tab contains a text area with XML code for voIP protocol settings, including server, SIP, and outbound proxy configurations. Below the text area are 'Browse...' and 'Upload System Config File Extension' buttons.

**Figure 140 System Config File Extension Settings for Polycom Phones**

## System, Enterprise, and Group Dial Plans for Polycom Phones

Click the Dial Plan tab on the Global Configuration File Settings page to enter dial plan information for System, Enterprise, or Group levels. The dial plan information entered must be in Polycom format and can include any Polycom-specific setting.

## System and Enterprise Custom Rings for Polycom Phones

System-level custom rings are **ONLY** used for system-level Polycom phone templates that need to use a custom ring. Enterprise-level custom rings are used for both the enterprise-level and group-level Polycom phone templates.

To configure custom rings, choose Phone Templates from the Provisioning menu, and then select Global Settings. Choose Polycom as the Phone Manufacturer, and click the Custom Rings tab. The Polycom Custom Rings tab displays.

**Global Configuration File Settings**  
 Display and change the global Clearspan settings for a selected Phone Manufacturer. After being saved, the change occurs at the next resync or reboot of the affected phones.

OK Cancel Apply Initialize MAC Address Capture

Enterprise: Moorehouse -- Moore Enterprises of Texas  
 Group: Hershey  
 Phone Manufacturer: Polycom

General Settings Extra Settings Dial Plan Custom Rings

Enterprise Custom Rings  
 Add Enterprise Custom Ring

Ring Name	Sampled Audio File Name	Time Between Rings	Default Polycom Ring	Edit
No Enterprise Custom Rings exist.				
- End of Enterprise Custom Rings -				

System Custom Rings  
 Add System Custom Ring

Ring Name	Sampled Audio File Name	Time Between Rings	Default Polycom Ring	Edit
AreYouThere	http://tb20xsp.csilab.mitel.com:80/dms/Polycom_VVX400/AreYouThere.wav	3000	Ring 17	

**Figure 141 Custom Rings for Polycom Phones**

Click the button to show either Enterprise Custom Rings or System Custom Rings. Click Edit in the table to change an existing custom ring, or click the appropriate Add Custom Ring button to create a new custom ring.

Enter or change the following fields for the custom ring:

FIELD	SETTING
Ring Name	Unique name to give the custom ring. This name is referenced to select the custom ring when creating the template.
Audio File Name	Complete URL of a wave file containing the audio to be played as the ring. For example:  http://tb20ews1.mitel.com:80/Polycom/AreYouThere.wav
Time Between Rings	Enter the number of milliseconds to wait between the played audio rings. Example: 3000 for 3 seconds.
Default Polycom Ring	Optionally select a Polycom ring (Ring 15 to Ring 24) where this custom ring is to be defined. It is used when creating a new phone template for a Polycom phone.  If a Default Polycom Ring is not selected, the custom ring can still be manually assigned to a Polycom ring in the phone template. Selecting the Polycom ring here simplifies the process of creating the phone template for commonly used custom rings.

## Initialize MAC Address Capture for Polycom Phones

To configure MAC Address Capture tags, choose Phone Templates from the Provisioning menu, and then select Global Settings. Select Polycom as the Phone Manufacturer, and click on Initialize MAC Address Capture. This is typically a one-time task used to add a MAC address tag to each Polycom device in the system. You must have System Administrator privileges to access this function.

**Global Configuration File Settings**  
 Display and change the global Clearspan settings for a selected Phone Manufacturer. After being saved, the change occurs at the

Tabs: General Settings, Extra Settings, Dial Plan, Custom Rings

## Phone Templates: Definitions for Polycom Phones

As with Mitel (Aastra) phones, Polycom phones can only be created using a phone template. Create templates for Polycom phones as described in the Phone Templates section, with the differences described in the following table and shown in the following figures.

Note: The Soft Keys, Incoming Calls and Outgoing Calls tabs are not available while provisioning Polycom Trio 8800 phones, as the Polycom Trio 8800 is a single line conference phone with no soft keys.

TAB / SECTION	FIELD	SETTING
<b>General</b>		
	Name	Template name.
	Description	Description of the template.
General Settings	Type of Expansion Module	If a Polycom expansion module is attached to the phone, select the type of that module. The expansion module choices depend on the Polycom phone device type.
	Expansion Modules	Select the number of Polycom expansion modules attached to the phone, from 0 to 3.
	Use VLAN	Check the "Use VLAN" checkbox if the phone must be assigned to and use a VLAN.
	URI for Soft Keys	Select the <b>URI for Soft Keys</b> from the drop-down list. You cannot save the configuration unless you choose the URI. This entry is used to point to the appropriate EMS server for key definitions using OpEasy phone applications.
	Time Zone	Select the <b>Time Zone</b> from the drop-down list. <b>Use Global Settings</b> uses the time zone from Global Settings

TAB / SECTION	FIELD	SETTING
		in Phone Templates. <b>User Time Zone</b> uses the time zone of the first primary user assigned to the phone. <b>User DHCP</b> uses the time zone from the DHCP server. You can also select a specific time zone.
	Outbound Proxy	Enter the proxy information for this phone if you want it to appear in the Edge Device Utilization report.
	Outbound Proxy Port	Enter the proxy information for this phone if you want it to appear in the Edge Device Utilization report.
	Encryption (TLS/SRTP)	Select the setting for encryption.
	Subscription Time	Use Global Settings for subscription time, or uncheck the <b>Use Global Settings</b> check box and enter the subscription time in seconds.
Polycom Settings	Voice Volume Persistent	Check the 'Handset' and/or 'Headset' checkboxes to have the voice volume of the handset and headset remain at the same level through calls and a restart of the phone.
	Sound Effects	Check the 'Stuttered Dial Tone for Unread Voice Mail Messages' checkbox to have a stutter played to the user and followed by dial tone when the user goes off-hook and unread voice mail messages exist in the user's mailbox.
	Voice Quality Monitoring	Check the 'RTCP Extended Reports (RTCP XR) Enabled' checkbox to have the Polycom phones send RTCP messages for quality monitoring purposes.
	Sticky Auto Line Seize	Determines whether taking the phone off-hook automatically picks up an incoming call.
	Background Image URL	Enter the address and/or name of the image used for the background display on a VVX phone. This field does not apply to SoundPoint or SoundStation phones.
	Idle Display Image URL	Enter the address and/or name of the image used for the idle display on a SoundPoint or SoundStation phone. This field does not apply to VVX phones.
<b>Lines</b>		
	BLF Line/User	Change the <b>BLF Line/User</b> if necessary. This value applies when the Busy Lamp Field (BLF) feature is assigned. The default of 1 is generally the desired setting. The value is used to identify which line will be associated with the BLF list URI.
	Max Calls Per Line	<p>Select the maximum number of calls allowed for each phone line. This setting is valid for VVX phones only. The maximum number of concurrent calls supported per line depends on the model:</p> <p>VVX 101/201 = 8</p> <p>VVX 300/301/310/311 = 24</p> <p>VVX 400/401/410/411 = 24</p>

TAB / SECTION	FIELD	SETTING
		VVX 500/501/600/601 = 24  Note: This option is not available while provisioning Trio 8800 phones.
	Clearspan Line Position	Select the <b>Clearspan Line Position</b> that you want to assign. This is the Clearspan line to use for the <b>Phone Line</b> . A single <b>Clearspan Line Position</b> can appear on one or more <b>Phone Lines</b> , which are on separate buttons on the phone.
	Line Label	Choose the <b>Line Label</b> , which determines the label shown on the phone display. Choosing <b>Text</b> allows you to enter up to 16 characters of text along with the Extension, represented by the tag {Ext}, or phone number, represented by the tag {Number}. To display a name, set the Text label to "{First Name} {Last Name}" or "{Last Name}, {First Name}".
	Ring	Select the ring to use for the specified Clearspan Line Position. The ring includes the default rings (1 to 14) and custom rings (15 to 24). The custom rings are setup on the Ring tab.
	Missed Call Tracking	Determines whether the phone displays an updated count of missed calls and a Missed Call List.
	Call Fwd Ring Count	Select the number of rings to allow before initiating a no-answer call forward.
<b>Phone Keys</b>		
	Key Reassignment	Enable <b>Key Reassignment</b> if you want to manually assign keys on the phone and expansion modules. Each key can individually be assigned as a Line, BLF List, or Favorites. At least one Line key must be assigned to the phone on the template Phone Keys tab. Otherwise, leave the setting Disabled to have the phone automatically assign the keys. When keys are automatically assigned, the Line keys are assigned first, followed by the BLF List and Favorites.
	Line Keys	On the VVX phones only, select whether Line keys on the phone are used for a BLF List, a Favorite, or a Line.
<b>Soft Keys</b>		
Standard Soft Keys	Basic Call Management	On the VVX 500/501 and VVX 600/601 phones only, when this option is checked, standard soft keys will be displayed even if the phone already has a hard key for the same function. Normally, there is no reason to set this option.
	Callers	On the SoundPoint IP 321 phone only, when this option is checked, the Callers soft key appears on the phone so the user can see the list of received calls.

TAB / SECTION	FIELD	SETTING
	Directories	On the SoundPoint IP 321 phone only, when this option is checked, the Directories soft key appears on the phone so the user can use a local directory.
	End Call	When checked, an End Call soft key appears on the phone.
	Forward	When checked, the Forward soft key appears on the phone, allowing the user to control the different types of forwarding for received calls.
	Join	When checked, a Join soft key appears on the phone, allowing the user to join two calls into a three-way conference.
	New Call	When checked, a New Call soft key appears on the phone.
	Split	When checked, a Split soft key appears on the phone, allowing the user to split a three-way conference into two separate calls.
Soft Keys	Soft Key Position	<p>Select the position of a specific soft key within the soft keys displayed on the phone. By selecting <b>Floating – before standard keys</b> or <b>Floating – after standard keys</b>, you can set the order of soft keys to be assigned on the phone automatically, either before or after standard soft keys. Otherwise, select <b>Soft Key 1</b> to <b>Soft Key 10</b> to assign the soft key to a specific soft key position.</p> <p>Note that the fixed position soft keys (<b>Soft Key x</b>) are always displayed first, followed by the <b>Floating – before standard keys</b> and, finally, the <b>Floating – after standard keys</b>.</p>
	Label	Configure any or all of the soft keys defined under the Key Definitions for Polycom phones. Only the keys available to Polycom phones are selectable in the Label drop-down.
	Insert	<b>Insert</b> a new Soft Key within the list of Soft Keys, before the key where <b>Insert</b> was clicked. The key where <b>Insert</b> was clicked and all following keys shift down in the fixed list of Soft Keys to make room for the new keys. You will then need to properly set both the <b>Soft Key Position</b> and <b>Label</b> for the inserted key.
	Delete	<b>Delete</b> an existing Soft Key within the list of Soft Keys. The key where Delete was clicked is removed and all following keys shifted up in the fixed list of Soft Keys, with a new empty key placed as the last key in the list.

## Features

Enabled Features	ACD Agent	<p>ACD Agent enables the use of Auto Call Distribution (ACD) agent sign in, sign out, available, and unavailable (without reason codes) on the phone. You must select an ACD line.</p> <p>Available on SoundPoint® IP 320, 321, 330, 331, 335, 450, 550, 560, 650, and 670 desktop phones; VVX 101, 201, 300/301/310/311, 400/401/410/411, 500/501, 600/601, 1500 business media phones.</p>
	Feature Sync ACD	<p>Enables Polycom's premium ACD feature. If not enabled, then only the basic capabilities of sign in, sign out, available, and unavailable (without reason codes) can be used. If enabled, then Agent Unavailable with reason codes, Queue Status Notification (for some phone models), View Incoming Call Center Information, Transfer Call Information to a Supervisor (Dispensation Code, Trace, Emergency Escalate) can be used.</p> <p>Available on SoundPoint® IP 320, 321, 330, 331, 335, 450, 550, 560, 650, and 670 desktop phones; VVX 101, 201, 300 / 301 / 310 / 311, 400 / 401 / 410 / 411, 500 / 501, 600 / 601 phones.</p>
	ACD Agent Unavailable with Reason Codes	<p>ACD Agent Unavailable with Reason Codes allows the agent to enter a reason code when becoming Unavailable. The set of reason codes is provisioned in the AS at the Enterprise level.</p> <p>Available on SoundPoint® IP 320, 321, 330, 331, 335, 450, 550, 560, 650, and 670 desktop phones; VVX 101, 201, 300 / 301 / 310 / 311, 400 / 401 / 410 / 411, 500 / 501, 600 / 601phones.</p>
	Audio/Video Toggles	On the VVX 500/501 and VVX 600/601 phones with a camera only, enables the switching of the call between audio and video using a soft key.
	Bluetooth	On the VVX 600/601, Trio 8800 phone only, enables Bluetooth operation.
	Call List	On Polycom phones except the SoundPoint IP 321 and 331, enables the display of lists of received, placed, and missed calls using the Call List soft key.
	Corporate Directory	Allows an LDAP directory key to be programmed on Polycom phones.
	Directory	Enables the display and entry of directory entries into a directory local to the phone using the Directory soft key.
	Do Not Disturb	Enables and disables the use of Do Not Disturb (DND) on the phone. When <b>Local to the phone (managed)</b> is enabled, DND is managed locally by the phone. When <b>Local to the phone (managed)</b> is not enabled, DND functionality is managed by the Clearspan server.

Enhanced Call Display	Enables the removal of the protocol "[SIP]" from the calling party identification of received calls.
Hoteling	<p>Enables a user to use an available host phone as a guest user by logging in with their credentials. After logging in the user has access to their guest profile on the host phone. Using Hoteling in conjunction with the ACD Agent feature enables the agent to use any available host phone by logging in with agent credentials. After logging in, agents have access to their guest profile and ACD settings on the host phone. You must select a Hoteling Line.</p> <p>Available on SoundPoint® IP 320, 321, 330, 331, 335, 450, 550, 560, 650, and 670 desktop phones; VVX 101, 201, 300 / 301 / 310 / 311, 400 / 401 / 410 / 411, 500 / 501, 600 / 601 phones.</p>
Last Call Return	Enables the use of last call return.
Non Volatile Ringer Volume	Enables retaining the ringer volume through restarts of the phone.
Conference Management	Enables the conferencing of multiple calls (not just a 3-way conference). To use Clearspan conferencing, select a Conference Server Address. Conference Server Addresses are configured by your administrator.
Picture Frame	On the VVX 500/501, VVX 600/601 and Trio 8800 phones only, enables the display of images on the phone when idle. The images are contained in files from a device connected to the phone via a USB connection.
Queue Status Notification	<p>Enables agents to view the queue status for a call center, so that they can adjust their call response accordingly. To use this feature, Premium ACD must be enabled.</p> <p>Available on SoundPoint® IP 450, 550, 560, 650, and Trio 8800 desktop phones.</p>
Ring Download	Enables the use and download of custom rings. When enabled, the Ring tab appears to allow display and configuration of the custom rings.
URL Dialing	Enables dialing of calls using a URL, in addition of dialing just using digits.
Video	On the VVX 500/501, VVX 600/601 and Trio 8800 phones with a camera only, enables video in calls.
Ring	
Custom Rings	<p>Selects the custom ring to assign to each of the 10 custom rings (Ring 15 through Ring 24).</p> <p>The list of available custom rings that can be assigned is obtained from the set of System Custom Rings or Enterprise Custom Rings that were configured in the Phone Templates / Global Settings. System Custom Rings only apply to system-level templates. Enterprise Custom Rings only apply to enterprise-level or group-level</p>

templates. This tab only appears when custom rings are defined.

## POLYCOM PHONE USERS

When creating a user or adding a phone to an existing user, any phone device created for that user may be a Polycom phone. An OpEasy Polycom Phone License is required for each added or modified Polycom phone. An error message displays if no license is available.

### User Device Settings for Polycom Phones

For any of the supported Polycom phones, the Device Access: User Name and Password fields appear and are *required* for definition of the phone. Valid password characters are a-z, A-Z, 0-9, blank, or special characters: - \_ . , ! \$ % & \* + / = ? ^ { } | ~ @.

When a phone uses device credentials, the MAC Address field is optional. However, if entered for a Polycom phone, the contents of the MAC Address field **MUST** be valid, matching the MAC address of the physical Polycom phone assigned to that phone device. The Polycom phone will not be able to load its configuration files if an incorrect MAC address is entered. Therefore, it is highly recommended to leave the MAC Address field empty. If Polycom Phone Support licensing is installed and enabled, the MAC address is automatically provisioned when the phone starts up.

### Advanced: User Add

Select a User Profile and complete the user information to add a new Clearspan user.

## User General Settings for Polycom Phones

As with Mitel (Aastra) phones, when creating a user with a Polycom phone as the primary phone, an E-mail message can be sent to that user to notify of the new phone. Mitel phones and Polycom phones have a different new user E-mail message because of the differences in setting up the phones.

To set up the new user E-mail notification message for a Polycom phone from the Users page of Provisioning, click General Settings and New User E-mail Notification. Then, select the specific enterprise and Polycom from the Phone Manufacturer drop-down. Change the new user E-mail message as you would for a Mitel phone, with the text appropriate for a Polycom phone.

**User General Settings: New User E-mail Notification**

Display and modify the E-mail message that is sent to new users based on phone type. The E-mail notification typically provides instructions on phone setup.

OK Cancel Apply Save As System-Wide Default

Enterprise: Moorehouse -- Moore Enterprises of Texas

Phone Manufacturer: Polycom

**New User E-mail Message:**

Enter or modify the 'From' address, 'Subject' line, and body of the E-mail message that is to be sent to new phone users. The subject line and message body can contain any of the substitution tags (identified by {} braces) listed at the bottom of the page. When the E-mail is sent, these tags are replaced by the appropriate user-specific information.

The text between {CCDesktopStart} and {CCDesktopEnd} is sent only when the new user has a Clearspan Communicator - Desktop device configured. Similarly the text between {CCS4BStart} and {CCS4BEnd} is sent for a Clearspan Communicator - S4B device, between {CCMobileStart} and {CCMobileEnd} is sent for a Clearspan Communicator - Mobile device, and between {CCTabletStart} and {CCTabletEnd} is sent for a Clearspan Communicator - Tablet device.

Similarly, the {DMMACAddressStart} and {DMMACAddressEnd} tags surround text only sent when the user's phone device is configured using the device's MAC Address. The {DMCredentialsStart} and {DMCredentialsEnd} tags surround text only sent when the user's phone device is configured using the device's credentials (access User Name and Password).

Reset to System-Wide Default Clear

From: No-Reply@tb20ems1.us.aastra.com

Subject: Your New Polycom Phone

Greetings {UserName}:  
 {DMMACAddressStart}  
 Your organization has provided you with a new Polycom {PhoneModel} phone. Setup your phone as described in the installation instructions provided with the phone.  
 {DMMACAddressEnd}  
 {DMCredentialsStart}  
 Your organization has provided you with a new Polycom {PhoneModel} phone. The following steps are required to install and activate your new phone:  
 1) When you receive your phone, unpack the phone and follow the assembly instructions as described in the installation instructions provided with the phone.  
 2) Please complete the following steps to activate your phone:  
 a) Connect your telephone to the Ethernet network. The phone should power on with no external power source. If the phone does not power on, a power adapter is required; connect the supplied power adapter to the phone and apply power.

**Figure 153 User General Settings E-mail Notification for Polycom Phones**

## PHONE MANAGEMENT FOR POLYCOM PHONES

As with Mitel (Aastra) phones, Polycom phones can also be added or modified under the Phone Management page of Provisioning. On this page, the User Name and Password fields are optional to allow an administrator to create incompletely-defined phones that are to be completed at a later date.

### Phone Device Modify

## APPENDIX B: OPEASY SETUP FOR PANASONIC PHONES

---

OpEasy supports the provisioning of Panasonic KX-TGP600 phone model. The phone can support a maximum of 8 handsets. The following settings must be configured within OpEasy prior to installing Panasonic phones at users' desks, as described in the following sections:

- User Profiles – One or more User Profiles must be created so that the administrator can build Panasonic phones for provisioning.
- Phone Templates
  - Key Definitions – In addition to the Panasonic standard soft keys, some OpEasy-configured soft keys may be assigned to Panasonic phones.
  - Global Settings – System, Enterprise, and Group level settings must be configured for Panasonic phones.
  - Definitions – One or more templates must be created for the Panasonic phone.

**Note:** For new settings added to Templates and Global Settings, the '(Unspecified)' selection option or text value is displayed. The '(Unspecified)' value indicates no value has ever been set, causing OpEasy to NOT generate configuration file fields for that new OpEasy setting. As such, any existing Global Extra Settings for that configuration file field continue to be used.

However, once a setting has been changed to an actual value (replacing the '(Unspecified)' value), then OpEasy generates configuration file fields for that setting from then on. These actual values then override any Global Extra Settings for that field. Once a value is selected to replace the '(Unspecified)' value, the '(Unspecified)' value is no longer an option.

- Users – Users must be created with a Panasonic phone.
- Phone Management – Panasonic phones can be added or modified under the Phone Management page of Provisioning.

**Note:** For Panasonic phones, OpEasy does not support Auto Install and MAC Address Capture like the Mitel (Aastra) and Polycom phones, respectively. For security reasons and to help in managing the Panasonic phones, the MAC address of the base station must be entered when provisioning the Panasonic device in OpEasy.

In addition, the following phone capabilities and features are not supported: the Panasonic phone's "Import/Export" Phonebook feature, Shared Call Appearances (SCAs), Busy Lamp Field (BLF), ACD, and Multicast paging.

## USER PROFILES FOR PANASONIC PHONES

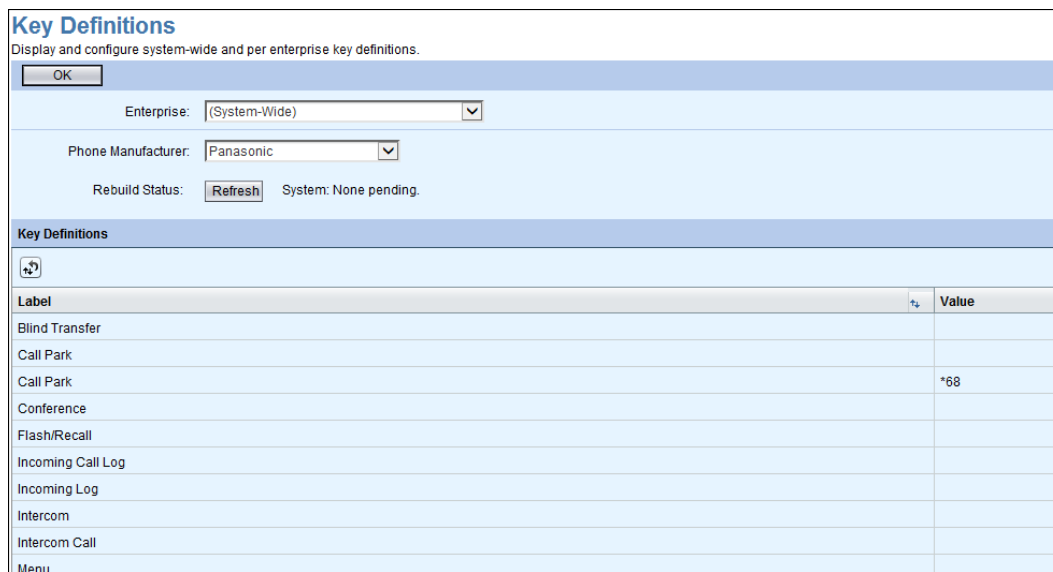

In order to allow administrators to quickly set up users with Panasonic phones, one or more User Profiles should be created. When creating a User Profile, the administrator selects the Panasonic phone as the Device Type. The Panasonic phone will be created as the primary phone device for the new user. “MAC Address” is the device’s MAC address and not auto generated.

## PHONE TEMPLATES FOR PANASONIC PHONES

### Key Definitions for Panasonic Phones

The OpEasy soft keys are configured on the Key Definitions page for provisioning Phone Templates. Key Definitions are typically accessible by system administrators only, as they affect keys system wide.

When Panasonic is selected as the Phone Manufacturer on the Key Definitions page, definitions specific to Panasonic phones are displayed.

**Key Definitions**  
Display and configure system-wide and per enterprise key definitions.

OK

Enterprise: (System-Wide)

Phone Manufacturer: Panasonic

### Phone Templates: Global Settings for Panasonic Phones

The following settings are configured on the Phone Templates / Global Configuration File Settings page of Provisioning.

### System, Enterprise, and Group Extra Settings for Panasonic Phones

To enter extra settings that are to be applied to all Panasonic phones within the scope of the level, choose Phone Templates from the Provisioning menu, and then select Global Settings. The extra settings must exist for the Panasonic phones and are in an XML format, as are all Panasonic phone settings. Click Dial Plan to enter dial plan information for System, Enterprise, or Group levels. The dial plan information entered must be in Panasonic format and can include any Panasonic-specific setting.

**Global Configuration File Settings**  
Display and change the global Clearspan settings for a selected Phone Manufacturer. After being saved, the change occurs at the next resync or reboot of the affected phones.

Note: For integration with Clearspan, Panasonic phone firmware must be version 3.2 or later.

### *System, Enterprise, and Group System Configuration File Extension Settings for Panasonic Phones*

The Device Type for each Panasonic phone model includes a **KX-TGP600.cfg** file that contains system-wide configuration settings used in the configuration files for all Panasonic phones of that phone model. These settings can be extended by choosing **Phone Template** from the **Provisioning** menu, selecting **Global Settings** and selecting **Panasonic** as the Phone Manufacturer, clicking on the **System Config File Extension** tab, and entering the additional settings on that tab.

Note that the KX-TGP600.cfg file and the settings on the System Config File Extension tab have a lower-priority than ALL other Global Settings (including Global Extra Settings) and Template Settings. However, the System Config File Extension tab settings have higher-priority than the settings in the KX-TGP600.cfg file being extended.

**Global Configuration File Settings**

## Group Settings for Panasonic Phones

To configure group-specific Panasonic phone settings, choose Phone Templates from the Provisioning menu, and then select Global Settings and click on Group Panasonic Phone Settings. The common group settings for Panasonic phones are described in the following table.

FIELD	SETTING
<b>SIP Settings</b>	
Outbound Proxy	Enter the hostname or IP address of the outbound proxy server used by the Panasonic phones.
Outbound Proxy Port (No Encryption)	Enter the port number for the outbound proxy server used by the Panasonic phones when encryption is not used by the Panasonic phone. The port number may be 0, 5060, or another port.
Outbound Proxy Port (Encryption)	Enter the port number for the outbound proxy server used by the Panasonic phones when encryption is used by the Panasonic phone.
Encryption (TLS/SRTP)	Select the setting for encryption.
Encryption Certificate File	Name for certificate file. Must be entered if Encryption is set to Required.
<b>DNS Servers</b>	
Enable DNS	Enable or disable DNS.
Primary DNS Server	Server address for primary DNS server.
Secondary DNS Server	Server address for backup DNS server.
<b>Time Settings</b>	
Time Server	Enter the hostname or IP address of a timer server.
Time Zone	Select the time zone that the phones are in.
<b>Device Settings</b>	
Admin Password	Enter a password that is entered into the phone to access the advanced settings within the phone.
User Password	Enter a password that is entered into the phone to access the user settings within the phone.
<b>Voice Codecs</b>	
Voice Codec #1 to #5	<p>Identify the voice codecs that the phone is to use when placing or receiving calls. The codecs are in priority order, with codec #1 as the highest priority codec to codec #5 as the lowest priority codec.</p> <p>Wideband is enabled if G.722 or G.722.2 is selected. Voice Codec options include the following:</p> <ul style="list-style-type: none"> <li>• G.722</li> <li>• G.711 u-Law</li> </ul>

FIELD	SETTING
	<ul style="list-style-type: none"> <li>• G.722.2</li> <li>• G.729A</li> <li>• G.711 A-law</li> </ul>
<b>SNMP Settings</b>	
SNMP Enable	Enable or disable SNMP.
SNMP Server Address	Hostname or IP address of SNMP server.
SNMP Server Port	Port for SNMP server.
<b>Quality Monitoring</b>	
Quality Monitoring	Choose whether periodic and/or session quality monitoring is used.
Collector Server Address	Enter the hostname or IP address of the server to which quality monitoring messages are sent by the phone.
Collector Server Port	Enter the port to use on the collector server. The port number defaults to 5060.
Alert Report MOSQ Critical	Criteria (critical) to send the VQ report when the MOSQ occurs.
Alert Report MOSQ Warning	Criteria (warning) to send the VQ report when the MOSQ occurs.
<b>Handset Settings</b>	
Power on Display Logo Path	URI for logo image file displayed when power is turned on.
Display Wallpaper Dark Path	Specifies the wallpaper for DARK display setting in IDLE mode.
Display Wallpaper Light Path	Specifies the wallpaper for LIGHT display setting in IDLE mode.
<b>General Settings</b>	
Conference Server	Specifies the conference server to use for conference calls.
Firmware File	Text Field that contains the URL of the firmware file to be loaded.

## Phone Templates: Definitions for Panasonic Phones

As with Mitel (Aastra) phones, Panasonic phones can only be created using a phone template. Create templates for the Panasonic phone as described in the *Phone Templates* section, with the differences described in the following table and shown in the following figures.

TAB / SECTION	FIELD	SETTING
<b>General</b>		
General Settings	Time Zone	Select the <b>Time Zone</b> from the drop-down list. <b>Use Global Settings</b> uses the time zone from Global Settings in Phone Templates. <b>User Time Zone</b> uses the time zone of the first primary user assigned to the phone. <b>Use DHCP</b> uses the time zone from the DHCP server. You can also select a specific time zone.
	URI for Soft Keys	Select the <b>URI for Soft Keys</b> from the drop-down list. You cannot save the configuration unless you choose the URI. This entry is used to point to the appropriate EMS server for key definitions using OpEasy phone applications.
	Use VLAN	Check the “Use VLAN” checkbox if the phone must be assigned to and use a VLAN.
	Outbound Proxy	Enter the proxy information for this phone if you want the information to appear in the Edge Device Utilization report.
	Outbound Proxy Port	Enter the proxy information for this phone if you want the information to appear in the Edge Device Utilization report.
	Encryption (TLS/SRTP)	Select the setting for encryption.
	Encryption Certificate File	Name for certificate file. Must be entered if Encryption is set to Required.
	Subscription Time	Use Global Settings for subscription time, or uncheck the <b>Use Global Settings</b> check box and enter the subscription time in seconds
Panasonic Settings	Voice Quality Monitoring	Check the ‘RTCP Extended Reports (RTCP XR) Enabled’ checkbox to have the Panasonic phones send RTCP messages for quality monitoring purposes.
	Conference Server	Select the conference server to use for conference calls.
	Hand Set Display Names	Select the name to display on the handset in standby mode.
<b>Lines</b>		
	Clearspan Line Position	Select the <b>Clearspan Line Position</b> that you want to assign. This is the Clearspan line to use for the <b>Phone Line</b> . A single <b>Clearspan Line Position</b> can appear on one or more <b>Phone Lines</b> , which are on separate buttons on the phone.
	Line Label	Choose the Line Label, which determines the label shown on the phone display. Choosing Text allows you to enter up to 16 characters of text along with the Extension, represented by the

TAB / SECTION	FIELD	SETTING
		<p>tag {Ext}, or phone number, represented by the tag {Number}. To display a name, set the Text label to "{First Name} {Last Name}" or "{Last Name}, {First Name}".</p> <p>When a single number is used for all handsets, the handset name display for all handsets comes from the Line Label for Clearspan Line Position 1. When different numbers are used for the handsets, the handset name display comes from Line Label for Clearspan Line Position 1 for handset 1, Line Label for Clearspan Line Position 2 for handset 2, and so on.</p>
<b>Soft Keys</b>		
Programmable Soft Keys	Park Retrieve Soft Key	"Park" is the only supported programmable soft key in "Talking" status and also appears when the call is parked on the handset and ready to be retrieved.
	Call Park in Function Menu	Enables Call Park in the function menu on the phone.
Soft Keys	Key	Displays the position of a specific soft key within the soft keys displayed on the phone.
	Label	<p>Configure any or all of the soft keys defined under the Key Definitions for the Panasonic phone. Only the keys available to the Panasonic phone are selectable in the Label drop-down. The following are valid soft key labels in idle status.</p> <ul style="list-style-type: none"> <li>• Phonebook</li> <li>• Menu</li> <li>• Outgoing Call Log</li> <li>• Incoming Call Log</li> <li>• Redial</li> <li>• Page</li> </ul> <p>Soft Key 1(left) defaults to "Phonebook", Soft Key 2 (center) defaults to "Menu", Soft Key 3 (right) defaults to 'Outgoing Call Log'. Soft keys defined are used for all handsets on line configured.</p>
<b>Incoming Calls</b>		
	Line	Displays the line number on the phone.
	Ring Handset 1-8	Sets the ringtone for each line on each handset. Ring tones range from Ring 1- Ring 32. If None is selected, the handset on that line doesn't ring and doesn't accept incoming calls on that line.

**Outgoing Calls**

Handset	Displays the number of the handset.
Line 1-8	Check the boxes to configure which lines can be used to make calls. By default, all lines are checked.
Default Outgoing Line	Specifies line used to make calls.

**Extra Settings**

Extra Settings	Enter extra settings that are to be applied to all Panasonic phones using this template. The extra settings must exist for the Panasonic phone and are in an XML format, as are all Panasonic phone settings.

## PANASONIC PHONE USERS

When creating a user or adding a phone to an existing user, any phone device created for that user may be a Panasonic phone.

### User Device Settings for Panasonic Phones

For a Panasonic phone, the Device Access: User Name and Password fields appear and are *required* for definition of the phone. Valid password characters are a-z, A-Z, 0-9, blank, or special characters: - \_ . , ! \$ % & \* + / = ? ^ { } | ~ @.

Device credentials and MAC address fields are required and **MUST** be valid, matching the MAC address of the physical Panasonic phone assigned to that phone device. The Panasonic phone will not be able to load its configuration files if incorrect device credentials and/or an incorrect MAC address are entered.

Figure 162 User Primary Phone Device Settings for Panasonic Phones

## User General Settings for Panasonic Phones

As with Mitel (Aastra) phones, when creating a user with a Panasonic phone as the primary phone, an E-mail message can be sent to that user to notify of the new phone. Mitel phones and Panasonic phones have a different new user E-mail message because of the differences in setting up the phones.

To set up the new user E-mail notification message for a Panasonic phone from the Users page of Provisioning, click General Settings and New User E-mail Notification. Then, select the specific enterprise and Panasonic from the Phone Manufacturer drop-down. Change the new user E-mail message as you would for a Mitel phone, with the text appropriate for a Panasonic phone.

### User General Settings: New User E-mail Notification

Display and modify the E-mail message that is sent to new users based on phone type. The E-mail notification typically provides instructions on phone setup.

Enterprise:

Phone Manufacturer:

**New User E-mail Message:**

Enter or modify the 'From' address, 'Subject' line, and body of the E-mail message that is to be sent to new phone users. The subject line and message body can contain any of the substitution tags (identified by {} braces) listed at the bottom of the page. When the E-mail is sent, these tags are replaced by the appropriate user-specific information.

The text between {CCDesktopStart} and {CCDesktopEnd} is sent only when the new user has a Clearspan Communicator - Desktop device configured. Similarly the text between {CCS4BStart} and {CCS4BEnd} is sent for a Clearspan Communicator - S4B device, between {CCMobileStart} and {CCMobileEnd} is sent for a Clearspan Communicator - Mobile device, and between {CCTabletStart} and {CCTabletEnd} is sent for a Clearspan Communicator - Tablet device.

Similarly, the {DMMACAddressStart} and {DMMACAddressEnd} tags surround text only sent when the user's phone device is configured using the device's MAC Address. The {DMCredentialsStart} and {DMCredentialsEnd} tags surround text only sent when the user's phone device is configured using the device's credentials (access User Name and Password).

From:

Subject:

Greetings {UserName}:

Your organization has provided you with a new Panasonic phone. Setup your phone as described in the installation instructions provided with the phone.

To learn more about the new telephone service, information about using the service and features of your new telephone can be found on the web at:  
[http://panasonic.net/pcc/products/sipphone/products/kx\\_tgp600/index.html](http://panasonic.net/pcc/products/sipphone/products/kx_tgp600/index.html)

If you have difficulty or other questions about the new service, please contact your administrator or help desk.

**Figure 163 User General Settings E-mail Notification for Panasonic Phones**

## PHONE MANAGEMENT FOR PANASONIC PHONES

As with Mitel (Aastra) phones, Panasonic phones can also be added or modified under the Phone Management page of Provisioning. On this page, the User Name and Password fields are optional to allow an administrator to create incompletely-defined phones that are to be completed at a later date. Also includes phone custom tags “HandSet Name” and “HandSet Password”, both are set per base station and used across all handsets for all lines used by the base station.

## INSTALLING PANASONIC PHONES

For information about installing Panasonic phones, refer to the *Device Management Configuration Guide*.

## APPENDIX C: MITEL KEY DEFINITIONS

Phone applications can easily be assigned to phone buttons using the OpEasy Phone Templates function and selecting the appropriate key Label for each soft key. Some of the applications already have default entries in the Key Definitions list (you will have to check your system to see which ones exist), but new ones can be added as needed. These can be managed in OpEasy by navigating to Provisioning | Phone Templates | Key Definitions, as shown in the following figure.

**Note:** Only SR administrators and above are allowed to create or modify Key Definitions.

**Key Definitions**  
Display and configure system-wide and per enterprise key definitions.

All phone applications are entered with a key type of "XML" (since the applications are XML-based). The URL assigned to each key should use the built-in tag %CS\_SOFT\_KEY\_URI%. This tag is replaced with the URI that is configured in OpEasy (in Provisioning | Phone Templates per the URI for Soft Keys field on the General tab).

**Note:** Only SR administrators and above are allowed to add or modify URI addresses for use in this tag.

The key definitions may be set up to use http or https (SSL) if the system has been installed using SSL.

## ACD (AUTO CALL DISTRIBUTION)

The ACD (Auto Call Distribution) phone application provides Clearspan® Call Center agents with buttons to perform the following functions:

- Sign In
- Sign Out
- Available
- Unavailable
- Wrap

This application provides these functions as separate buttons, and also has an option to play an audio prompt indicating the agent's new state, both to meet ADA requirements.

Key definitions for the ACD functions must be formatted as follows:

```
http://%CS_SOFT_KEY_URI%/acd.php?function=<type>&playaudio=1&featureuri=%CS_SOFT_KEY_URI%
```

Where:

- The function parameter <type> must be one of the following: "signin", "signout", "available", "unavailable", or "wrap"
- The playaudio parameter may be 1 or 0, and if omitted it defaults to 0 (disabled)
- The featureuri parameter is the URI for the location to play the audio files (usually the same as the main URI).

### ACD Audio Prompts

The following prompts are installed to be played on the phone if the "playaudio" parameter is enabled:

SignIn.wav	"ACD agent is signed in"
SignOut.wav	"ACD agent is signed out"
Available.wav	"ACD agent is available"
Unavailable.wav	"ACD agent is not available"
Wrap.wav	"ACD agent is in wrap"
Error.wav	"Unable to process request, if the problem persists contact your administrator"

### User Guide

When each button is pressed, the associated function is executed and, if enabled, the audio is played indicating the agent's state. For ADA compliance there are no menus to navigate to perform these functions.

## CALL MARK

The Call Mark application provides a convenient mechanism to log user issues so the Mitel technical support team can troubleshoot the cause.

The support organization normally determines when this button should be used (generally for issues that may be intermittent and information needs to be collected). In those cases a button may be added to a user phone using the following key definition:

```
http://%CS_SOFT_KEY_URI%/callmark.php
```

This function logs the event in the phone\_app\_log table of the OpEasy database, logs the event in the CSInterface log and also sends an SNMP trap to notify support that the event has occurred. Log information includes the time that it occurred, the MAC address of the phone, the phone's device name and the currently active or last active line/port.

### User Guide

The support team communicates to users when they should press this button. Typically, when the issue occurs, the user simply presses the button, allowing the support team to receive notification of the problem.

## CLID BLOCK

You can add the CLID Block key to support Calling Line ID Delivery Blocking per Call. Hides the user's calling line ID for the next call. A CLID Block softkey can be added with the following definition:

```
%BWFAC-CLID-DELIVERY-BLOCKINGPER-CALL-1%
```

### User Guide

Before placing a call, the user presses the **CLID Block** key; and then places the call as usual.

## DIRECTORY LOOKUP

The directory application provides functions to search from an LDAP directory and then display the list on the user's phone for dialing.

LDAP Lookup: Servers are provisioned in OpEasy (for an enterprise or for groups), allowing the phone to display the appropriate directory for each user.

Important: One of the available functions within directory lookup is the ability to add a number to the user's Speed Dial list. If this feature is desired then the application must know which Speed Dial type the user has provisioned, which is done by adding the parameter "speedtype" with one of the following values:

- Speedtype=0 – Indicates directory uses Speed Dial 8
- Speedtype=1 – Indicates directory uses Speed Dial 100

If this function is not required, this parameter may be omitted, otherwise you will likely need 2 separate soft key definitions in order to support users with each type of speed dial.

For example, the following key definition provides LDAP lookup using Speed Dial 100:

```
http://%CS_SOFT_KEY_URI%/ad.php?speedtype=1
```

## LDAP Servers and Credentials

LDAP servers and credentials can be set up for an entire enterprise or a separate one for each group as desired. This is provisioned with OpEasy via Provisioning | Group Settings | Phone Directory Management.

When the directory application is launched (via ad.php), it first identifies which group the device is associated with and connects to the provisioned LDAP server to fulfill the requests.

### *Secure vs. Non-Secure Access*

Note that the URI field for the directory uses the format of `ldap://<ldap server name>`

The option to use TLS 1.2, which provides added security when accessing an active directory, is available. To allow this, the URI field must use the format of `ldaps://<ldap server name>`

To convert from non-secure to secure LDAP access, edit the Phone Directory entry and update the Server URI field to insert the 's' as shown in the following figure.

**Phone Directory Modify**  
Modify the selected Directory server.

OK Cancel Apply

Enterprise: Moorehouse -- Moore Enterprises of Texas

Cell Phone Field: <input type="text" value="mobile"/>	

If a secure LDAP connection cannot be established because the server cannot validate the client's certificate, contact your system administrator.

## Directory Search

When the directory application is launched, the user is prompted with "Enter Name" to perform a search. The following functions are available from this screen:

### *Directory Search*

BackSpace:	Back space entered characters to correct the entry
Space:	Add a space character to the entry
abc:	Change from alpha to digits, etc
Lookup:	Perform a lookup search with the entered name
Cancel:	Exit the application

### *Directory Search->Lookup*

Pressing "Lookup" retrieves the list of possible names from what was entered. The user may then move up or down in the list to select one of the entries. The following functions are available on the search results screen:

Dial:	Dial the selected name from the list (using the default phone)
Display:	Display additional phone numbers for the selected name
Back:	Return to the previous page
Cancel:	Exit the application
Page Up:	Go to the previous page in the list (if more than one page)
Page Down:	Go to the next page in the list (if more than one page)

### *Directory Search->Lookup->Dial*

Pressing "Dial", dials the selected entry from the list using the first number in the list (default number).

### *Directory Search->Lookup->Display*

Pressing "Display", performs an additional search for this entry to find and display any additional phone numbers available for the selected name. The following functions are available on this results screen:

Dial:	Dial the selected name from the list
Edit:	Edit the number if it cannot be dialed as shown (add prefix, etc.)
Speed Dial:	Add this number to Speed Dial
Back:	Return to the previous page
Cancel:	Exit the application

### *Directory Search->Lookup->Display->Dial*

Pressing "Dial", dials the selected number from the list.

## CALL LOGS

The Call Logs (recent call list) application displays the most recent received, placed, and missed calls for the user to view and dial. The application also provides functions to add a phone number to the user's speed dial list.

The Call Logs application displays missed calls immediately when the feature button is invoked. From the 'Missed' calls screen, buttons are available for 'Dialed' and 'Received' calls.

The call information displayed is retrieved from the Clearspan system itself (not the local phone information). Buttons are available to navigate the list and to 'Dial' or 'Display' the selected entry.

**Note:** This application attempts to format phone numbers such that they can be dialed as required by the system (adding or removing outside line digit, etc.). See section *Phone Number Formatting* for more information about this function.

Important: The function to add a number to the user's Speed Dial list requires the application to know which Speed Dial type the user has provisioned. This is done by adding the parameter "speedtype" with one of the following values:

- Speedtype=0 – Indicates directory uses Speed Dial 8
- Speedtype=1 – Indicates directory uses Speed Dial 100

Your System Administrator might provide two separate soft key definitions in order to support users with each type of speed dial.

For example, the following key definition provides Call Logs using Speed Dial 100:

```
http://%CS_SOFT_KEY_URI%/calllog.php?speedtype=1
```

### User Guide

When the Call Logs application is launched, the user is presented the "Missed" calls display. The phone numbers listed are in chronological order with the most recent missed call at the top.

The following functions are available on this screen:

#### Select Missed

Dial:	Dial the selected name from the list
Page Up:	Go to the previous page in the list (if more than one page)
Page Down:	Go to the next page in the list (if more than one page)
Display:	Display details including the phone number and the date/time
Dialed:	View the calls that were dialed
Received:	View the calls that were received

#### Select Missed->Navigate to Number

The list of phone numbers is displayed as a menu. The user presses the up and down navigation buttons to select an entry. If multiple pages exist, the Page Up or Page Down buttons are visible (also, the page number and total pages are displayed e.g. 1/5). Once at the selected entry, press either Dial or Display.

*Select Missed->Navigate to Number->Dial*

Pressing "Dial" dials the phone number for the selected entry.

*Select Missed->Navigate to Number->Display*

Pressing "Display", shows details including the name, phone number and the date/time for the entry. The following functions are available on this screen:

Dial:	Dial the selected name from the list
Add Speed:	Add this number to Speed Dial
Back:	Return to the previous page

*Select Missed->Navigate to Number->Display ->Add Speed*

Pressing "Add Speed" adds the number to the user's speed dial list (it is added to the next available empty speed dial code in the list). The screen displays "Speed Dial Entry Added" to confirm the number was added. The following function is available on this screen:

Done:	Return to the previous main page (i.e. Missed, Dialed or Received)
-------	--

Rather than dialing or displayed missed calls, from the "Missed" calls screen, the phone user may also view dialed or received calls.

*Select Missed->Received->Dialed*

Or

*Select Missed->Dialed*

The user is presented the "Dialed" calls display. The phone numbers listed are in chronological order with the most recent dialed call at the top. Navigation to an entry on the list is allowed just as described from the "Missed" calls display.

The following functions are available on this screen:

Dial:	Dial the selected name from the list
Page Up:	Go to the previous page in the list (if more than one page)
Page Down:	Go to the next page in the list (if more than one page)
Display:	Display details including the phone number and the date/time
Missed:	View the calls that were missed
Received:	View the calls that were received

From either the "Missed" display or the "Dialed" display, the received calls can be displayed.

*Select Missed->Dialed->Received*

Or

*Select Missed->Received*

The user is presented the "Received" calls display. The phone numbers listed are in chronological order with the most recent received call at the top. Navigation to an entry on the list is allowed just as described from the "Missed" calls display.

The following functions are available on this screen:

Dial:	Dial the selected name from the list
Page Up:	Go to the previous page in the list (if more than one page)
Page Down:	Go to the next page in the list (if more than one page)
Display:	Display details including the phone number and the date/time
Dialed:	View the calls that were dialed
Missed:	View the calls that were missed

## RSS FEEDS

The RSS Feed application provides several channels of information to the user's phone display.

This function may be added to a user phone using the following the following key definition:

<code>http://%CS SOFT KEY URI%/rss.php</code>
---

The URIs for the various RSS feeds are maintained in ".rss" files in /var/www/html/rss. There is a definition file for each category provided for the user.

## User Guide

Pressing the RSS button provides a menu with 5 main categories:

1. CNN (News)
2. Weather
3. ESPN (Sports)
4. Movies
5. Today (Today in history, quote of the day, etc.)

## RSS

Select:	View the selected channel
Move Up:	Move up in the list
Move Down:	Move down in the list
Exit:	Exit the application

## RSS->Select

Pressing "Select" brings up a list of topics or articles from the selected channel. Each subsequent page provides the following functions:

Select:	View the selected topic or article
Back:	Return to the previous page

## SPEED DIAL 8/100

The Speed Dial application provides users with the ability to dial from their Clearspan® Speed Dial list. As well, if the phone type allows, the add, remove, and edit of entries in the list is possible. It works with either Clearspan® Speed Dial 8 or 100.

Important: This application must know which Speed Dial type the user has provisioned. This is done by adding the parameter "is100" with one of the following values:

- Is100=0 – Indicates Speed Dial uses Speed Dial 8
- Is100=1 – Indicates Speed Dial uses Speed Dial 100

Your System Administrator might provide two separate soft key definitions in order to support users with each type of speed dial.

For example, the following key definition provides Speed Dial using Speed Dial 100:

```
http://%CS_SOFT_KEY_URI%/cs.php?is100=1
```

### User Guide

The Speed Dial 8 and 100 applications are available for assignment to any program key, soft key or hard key on a Mitel (Aastra) phone. However, the application's capabilities on phones that have no soft keys are significantly reduced in that no adds, edits, moves or deletes are allowed. This section is divided to describe functionality for phones that have no soft keys vs. phones that have soft keys.

#### *Speed Dial 8/100 Functionality for Phones with no Soft Keys*

When the Speed Dial application is launched on a phone that has no soft keys, the user is presented a screen similar to the following that identifies the number of Speed Dial entries.

The list of Speed Dial entries may be scrolled through via the navigation keys. The user navigates to the desired entry and presses the Line key to initiate a call to the selected speed dial number.

The speed dial entries are managed by editing the user on OpEasy and selecting the 'Speed Dial 8' or 'Speed Dial 100' service. There is no ability to add, delete or modify entries via the phone.

#### *Speed Dial 8/100 Functionality for Phones with Soft Keys*

When the Speed Dial application is launched on a phone that has soft keys, the user is prompted with the "Speed Dial" menu to select the entry to dial or modify. The list is displayed as a menu (the user may move Up or Down the list to select an entry). If multiple pages exist the Page Up or Page Down buttons are visible (also, the page number and total pages are displayed e.g. 1/5). From this display the user has the following options:

### *Speed Dial*

Dial:	Dial the selected name from the list
Display:	Display phone number and name for the entry
Options:	Select additional options (Add, Delete, etc.)
Cancel:	Exit the application

### *Speed Dial->Dial*

Pressing "Dial", of course, dials the phone number for the selected entry.

### *Speed Dial->Display*

Pressing "Display", shows the phone number and the name assigned to the selected entry. The following functions are available on this screen:

Dial:	Dial the phone number for the selected entry
Edit:	Edit the phone number for the selected entry
Back:	Return to the previous page
Cancel:	Exit the application

### *Speed Dial->Display->Dial*

Pressing "Dial", of course, dials the phone number for the selected entry.

### *Speed Dial->Display->Edit*

Pressing "Edit" displays the speed dial entry and allows the user to modify the phone number. The following functions are available on this screen:

Backspace:	Back space entered characters to correct the entry
Space:	Add a space character to the entry
abc:	Change from alpha to digits, etc
Done:	Save changes and return the previous screen
Back:	Return to the previous page
Cancel:	Exit the application

### *Speed Dial->Display->Done*

Pressing "Done" saves the change and return to the previous screen.

### *Speed Dial->Options*

Pressing the "Options" button provides a menu with the following 4 options:

1. Add (add a new entry)
2. Edit (edit the selected entry)
3. Delete (delete the selected entry)
4. Move (move the selected entry to a new speed code)

The following functions are available on this screen:

Select:	Execute the selected option
Back:	Return to the previous page
Cancel:	Exit the application

### *Speed Dial->Options->Add*

Selecting the "Add" function allows the user to add a new Speed Dial number to their list. The user is prompted to enter the following:

1. "Enter Speed Code"
2. "Enter Number"
3. "Enter Name"

Each of these screens provides the following functions:

Backspace:	Back space entered characters to correct the entry
Done:	Save changes and return the previous screen
Back:	Return to the previous page
Cancel:	Exit the application

### *Speed Dial->Options->Add->Done*

Pressing "Done" saves the change and continues. After the name has been entered it returns to the previous screen.

### *Speed Dial -> Options->Edit*

Selecting the "Edit" function allows the user to modify the name for the selected speed dial entry. The following functions are available on this screen:

Backspace:	Back space entered characters to correct the entry
Space:	Add a space character to the entry
abc:	Change from alpha to digits, etc
Done:	Save changes and return the previous screen
Back:	Return to the previous page
Cancel:	Exit the application

### *Speed Dial->Options->Edit->Done*

Pressing the "Done" button saves the change and return to the previous screen.

### *Speed Dial->Options->Delete*

Selecting the "Delete" function allows the user to delete the selected speed dial entry. The user receives a confirmation screen asking if they want to delete the displayed speed dial entry. The user must press one of the following:

Yes:	Will delete the entry and return to the previous screen
No:	Will just return to the previous screen without change

### *Speed Dial->Options->Move*

Selecting the "Move" function allows the user to modify the speed code for the selected speed dial entry. The following functions are available on this screen:

Backspace:	Back space entered characters to correct the entry
Done:	Save changes and return the previous screen
Back:	Return to the previous page
Cancel:	Exit the application

### *Speed Dial->Options->Move->Done*

Pressing the "Done" button saves the speed dial entry to the new code and returns to the previous screen.
