1. NEW AND UPDATED FEATURES FOR MIVOICE CONNECT 19.3 SP2

The following new features and enhancements are available as part of MiVoice Connect Release 19.3 SP2.

1.1 PROVISION TO ENTER THE JACK NUMBER

You can use the **Jack Number** option in the **IP Phone Address Map** page in Connect Director to enter the name of the telephone jack associated with the IP phones. A new flag **Use Jack number from IP address Map** has been added in the Additional Parameters page.

For more information, see the *Reviewing the IP Phone Address Map* section and *Configuring the Additional Parameters* pages in the *MiVoice Connect System Administration Guide*.

1.2 MYSQL UPGARDE

Beginning with Release 19.3 SP2, MiVoice Connect MySQL version must be upgraded to 5.7.40.

For more information, see the *Capacity and Hardware Requirements for HQ Servers* section of the *MiVoice Connect Planning and Installation* guide.

1.3 SUPPORT FOR DELL 15 SERVERS

Beginning with Release 19.3 SP2, MiVoice Connect extended the support DELL 15 server components.

For more information, see the *Upgrading the Server System* section of the *Planning and Installation* Guide.

1.4 SECURITY GUIDELINES TO DEPLOY MIVOICE CONNECT

A new section Security Guidelines has been added with the details on MIVC DMZ deployment Mode and Database access to allowed list.

For more information, see the *Security Guidelines* section of the *Planning and Installation* Guide.

1.5 MIVOICE CONNECT OAUTH UPDATES TO USE REDIRECT URL

Azure AD Application Registration process to access redirect URL has been updated.

For more information, see the *Azure AD Application Registration* section of the *Application Registration with Azure AD for MS Office 365* Guide.
