Microsoft Dynamics CRM

Overview

This describes the features that are available when integrating with Microsoft Dynamics CRM.

Supported Versions

The following Microsoft Dynamics CRM versions are supported.

Version	On-premise deployment	Internet-facing deployment (IFD)	Microsoft Online
v5 (2011)			
v6 (2013)	S		I
v7 (2015)	S		I
v8 (2016)	I	I	0

Features

Integration with Microsoft Dynamics CRM supports the features listed below:

- Screen pop for contacts
- Automatic call history entry
- Calendar & DND synchronization

Screen pop

CRM *Contact*, *Account* and/or *Lead* entities can be screen popped directly within CRM when an incoming call is received using the caller id or from an outgoing call using the dialed number. The telephone number is then used to find any matching entities that have this number. For example an inbound call is received from 7774441111 as shown on the toaster. The plugin performs a search to find any records that have matching telephone numbers. A matching *Contact* entity was found and the record was automatically displayed using the Users default browser.

/// → ↑		\oplus	Isa Sastre Mitel	ې 🔍	?		
CONTACT -	_			↑ ↓	ল		
Luka	Раре		<u>Isa</u>	a <u>Sastre</u>			
Summary					^		
CONTACT INFORMATIC	DN .						
Full Name*	Luka Pape			POST			
Job Title							
Company Name	E <u>MITEL</u>					د. د	_ ×
Email						ands source converse	
Business Phone	2225554444					7774441111	00:02
Mobile Phone	7774441111					7774441111	
Fax							
Preferred Method of	Any						
Address					~		
Active							Clear call

If multiple matches are found then the *Multiple Contacts Found* is shown and enables the User to select the correct record to be displayed. For example a call is made to 222555444 and this has found three matching *Contact* entities that have this telephone number. This also will then show the any related entities, in this example the *Account* the contact is associated with.

Multiple Contacts Found – – ×		
Results Contact: Pippa Crane Account: BUSINESS CONTACT Contact: Alberto Puga Account: BUSINESS CONTACT Contact: Aurora Rojas Account: BUSINESS CONTACT		
	C 2225554444 2225554444	_ × 00:01
Display		Clear call

The correct Entity can then be highlighted and then clicking on the Display button will open this record.

The plugin will only search for Accounts and Contacts that are in the Active state. If any records have been Deactivated then they will not be displayed.

Entity and matching options

Configuration options are available on the plugin that allow the type of *Entities* to be used in the searching to be set. For example it can be configured so that only the *Contact* Entities are searched. These options are set on the *Options* tab

Microsoft Dynamics CRM							
Settings	Server	Profile	Options	Call Details	Activitie	•	۲
Screen	Screen Pop Accounts Contacts Leads						
	isplay bla ustom Sea	nk entity arch	Туре	contact		*	

If no match is found then the *Custom Search* option can be selected and this will display a form to allow the user to enter the first name, last name, date of birth or post code and these values will then be used to try and find any matching records.

Ò	Advanced Search		×
First Name	Last Name		
Postal/Zip	Check Date of Birth	2014-03-10 🗸	•
			_
		Display	

If still no match is found when searching for an Entity than a blank form can be automatically displayed to create a New Entity. The Type of Entity, *Contact, Account* or *Lead* that is created can be set here.

Advanced options

The Advanced tab allows control over if related Entities of a matching Contact, Account or Lead are shown in the Multiple Contacts Found window.

Microsoft Dynamics CRM						
Account Fields	Contact Fields	Lead Fields	Advanced	/ • •		
-Related Search	nes					
Search fo	or related entities	5				
Select the re	lated Entites to s	earch for:				
✓ Opportunities ✓ Incidents / Cases ✓ Tasks						

Any related Entities that have their *statecode* as *Open* (for Opportunities & Tasks) or *Active* (for Incidents/Cases) will then be displayed in the *Multiple Contacts Found* window. Selecting these related matches in the *Multiple Contacts Found* window and clicking *DIsplay* will then pop this record.

Search fields

The range of telephone numbers that are to be searched for can be configured for each of the *Contact, Account* or *Lead* Entities individually. By default the common telephone number fields are listed on the *Leads Fields, Contacts Fields* or *Account Fields* tab.

Telephone number formats

Microsoft Dynamics CRM does not provide a standard format for storing telephone numbers within the system by default. The plugin supports searching for multiple different formats dependent on the region (UK or US) where the client is running. The default formats for the UK and International are shown below. This is based on the number 08001831234 been searched for.

UK & International Telephone Formats					
08001831234	(0123) 4567890	44 (08001)831234	+44 (080)0183 1234		
08001 831234	08001-831234	(08001)831234	(08001)-831234		
080 018 31234	080-018-31234	080 0183 1234	080-0183-1234		

The default formats for the US are shown below. This is based on the number 9876543210 been searched for.

US Telephone Formats					
9876543210	987.654.3210	+1 (987) 654-3210	19876543210		
987-654-3210	(987) 654-3210	1-987.654.3210	1-987-654-3210		
1(987) 654-3210					

Call details

The call information that is used to search for matching records can be configured. By default the dialed number or the caller id are used to search with, depending on the call direction, but other call details can configured. There are options for the direct dial number or the direct dial name (or DNIS) as shown.

Microsoft Dynamics CRM

Profile	Options	Call Details	Activities	Account Fields	4	×
Inform Sele use sele that iten sea	nation for the call for the sea ect items to n one and ns in prefe rch order.	details to arch. Multi o use more re order the rence of	Caller	ID (CLI) Dial (DDI/DID) DDI Name		

Caller ID represents either the caller ID for inbound calls or the dialed number for outbound calls.

The configuration box lets you select multiple different types of call detail with the details to be used having the check box next to each one selected. The order of the searching can also be configured by dragging and dropping the entry and ordering the list accordingly.

When multiple call details are used the searching will stop as soon as a match is found with the first call detail.

Automatic call history entry

The plugin supports the ability to be able to automatically create and display a Microsoft Dynamics CRM Phone Call Activity entity. The Entity to associate this with is found using the caller id received or the number dialed, and if multiple matches are found then the *Multiple Contacts Found* window is shown as for the screen popping. The telephone numbers used to search are set in the screen popping section.

The Activity record is automatically created with the information relating to the call entered into the description field and the related entities are linked as shown.

Phone Number	+44 1291 430000	Direction	Outgoing	
Description				
Phone number: +4 DDI: DDI Name: Direction: Outbou Account Code:	14 1291 430000 nd			

Phone number	For inbound calls this is the caller ID and for outbound calls this is the dialed number.
DDI/DID	For external inbound calls only, the DDI/DID number that the call came in on.
DDI/DID Name	For external inbound calls only, the DNIS of the DDI/DID that the call came in on.
Direction	The direction of the call.
Account Code	The account codes that was set on the call.
Trunk	For external calls the outside network trunk number that the call was made or received
Transferring Extension	The device that the call was transferred from.
Duration	The duration of the call. The call event trigger must have been set to Call End as they not known until the call is cleared.
Call Recording	If integrating with a Xarios Call Recorder then this can contain a URL link to the call recording (this is not a clickable hyperlink but can be copied and pasted into a browser The call event trigger must have been set to at least Call Answered as the call recorde only create the recording id when the call has been answered.

The plugin configuration has several options that can be set to determine how the record is created.

	/licro	soft D	ynamio	cs CRN	1

	Complete	Activity Re	ecord		
√ [Display Ad	tivity Reco	ord		

Complete Activity Record: This will set the status of the Activity to be Completed.

Display Activity Record: This will display the Activity form, if this is not set then the record will be created without the user seeing the form.

Calendar & DND synchronization

.

The calendar within Microsoft Dynamics CRM can be synchronized with the DND status of the extension of the User. For example when there is an appointment in the calendar and this is due to start the extension can be automatically placed into extensionDND with the DND text set to the *Subject* field of the appointment. When the appointment ends, the extension will be automatically removed from DND.

There are several options to be able to control the types of Activities that cause the extension to go into DND. The *Priorities* tab allows Activities with a specific priority to be included or excluded.

Configuration

For any of the features there needs to be some basic configuration that needs to be performed to authenticate and allow access to Dynamics CRM.

Settings and versions

The correct version of Dynamics CRM that is used needs to be selected from the Version drop down on the Settings tab.

M	licros	oft D	ynam	nics CRI	M	
Settings	Server	Profile	Options	Call Details	Activitie	• •
Inform	ation					
Vers	ion M	SCRM 6.0	(2013)		¥	
					Test.	•

Server connection

. .

The specific connection details to the CRM server need to be set on the Server tab.

	licros	oft D	ynam	nics CRI	N

Orga	nisation N	Name	Mitel				
En toj	ter the fri p right ha	endly org nd corne	anisation r of the pa	name (found a ge in CRM).	at the		

Discovery Server: This is the URL of the Microsoft Dynamics CRM discovery server. This is normally the same as the CRM server. Contact your administrator for details on what this should be.

For the Microsoft hosted version use the following based upon the organization location.

Location	Discovery Server
North America	crm.dynamics.com
North America 2	crm9.dynamics.com
Europe, Middle East and Africa (EMEA)	crm4.dynamics.com
Asia Pacific Area (APAC)	crm5.dynamics.com
Oceania	crm6.dynamics.com
Japan (JPN)	crm7.dynamics.com
South America	crm2.dynamics.com

Does this server use SSL: If SSL/HTTPS connection is required to connect to the CRM system enable this option. **Organization Name**: This should be set to the organization name configured for the company that will be used to integrate

with. This should match the exact name shown in the top right hand corner of the CRM web page when you are logged in.

Authentication and profile details

The Profile tab enables the security credentials used to access Microsoft Dynamics CRM to be configured.

Settings	Server	Profile	Options	Call Details	Activitie 1
- Details					
Us	se Integra	ted Wind	ows Authe	entication (IW	A)
✓ Us	sing Offic	e 365 Aco	count to L	ogin?	
Usern	sing Offic ame:	nacho.vale	count to Lo encia@mite	ogin? I.co.uk	

Use Integrated Windows Authentication: If this is set then the username, password and domain details from user who is logged on the computer will be used.

Using Integrated Windows Authentication is NOT supported when using IFD and claims based authentication.

Depending on the configuration of Microsoft Dynamics CRM and how it is accessed will determine what options are required.
